

Postipankki and Finnish Export Credit were merged in December 1997 under the ownership of a holding company founded with the working name PV Group plc. The Leonia Group acquired its new name on 23 April 1998.

This Annual Report contains the annual accounts of Leonia plc, Leonia Bank plc and Leonia Corporate Bank plc.

The Board of Directors' report of Leonia plc includes sections of text separated by sub-headings referring to Leonia Bank and Leonia Corporate Bank, which correspond in substance to the statutory reports of these companies. They also include sections referring to operating environment, risk management, preparations for the euro and preparedness for the year 2000. The reports are not appended to this annual report as separate documents.

The Board of Management of Leonia Bank has signed the Board of Management report, which was countersigned by the Supervisory Board on 16 February 1999. The Board of Directors of Leonia Corporate Bank also signed the Board of Directors' report on 16 February 1999. The reports are included in the annual accounts of these companies, which have been audited and will be presented to their Annual General Meetings and forwarded to the Trade Register.

INTERIM REPORTS

Leonia Group publishes its Annual Report in Finnish, Swedish and English. Copies may be ordered by email from the address viestinta@leonia.fi , by post from Leonia plc / Corporate Communications, Eteläesplanadi 8, 00007 Helsinki, by telephone from +358 (0)204 25 2623, or by fax from +358 (0)204 25 2608.

The Leonia Group will publish three interim reports in 1999, with the reports for January– March, January-June and January-September appearing on 12 May, 12 August and 11 November respectively.

Information on the results of Leonia Bank and Leonia Corporate Bank will be included in the aforementioned interim reports of Leonia Group. In addition, each of the former will publish one interim report in 1999, for the January–June period, simultaneously with the Group report on 12 August 1999.

The Annual General Meetings of Leonia plc, Leonia Bank plc and Leonia Corporate Bank plc will be held on 10 March 1999.

A NEW BANK – NEW FORMS OF SERVICE

Leonia is an independent, financially sound Finnish banking and finance group providing a full range of services. Besides our network of branches covering the whole of Finland, our customers are served by highly efficient telephone and on-line banking services, comprehensive payment services and flexible international contacts.

LEONIA – A RELIABLE PARTNER

Leonia is a reliable banking and finance expert, which is constantly improving its operating procedures and services, and developing its products and staff. We aim for our customers to see Leonia as a friendly, active, modern partner.

A NEW BANK IS BORN

In December 1997, Postipankki, established in 1886, and Finnish Export Credit, established in 1956, were merged under full Finnish state ownership to become the PV Group plc. The new Group has a greater ability to bear risk, a more solid capital base and capital ratio, and altogether better pre-requisites to improve services and prune overlapping functions.

A NEW NAME IS INTRODUCED

In April 1998, the new financial group was given a new name: Leonia. Postipankki became Leonia Bank, while Finnish Export Credit became Leonia Corporate Bank. The names of most subsidiaries were also changed to incorporate the name Leonia. At the same time, a new group logo was adopted.

IMPROVED PROFIT

Leonia's profit for each quarter of 1998 was an improvement on the previous year. Whole year operating profits rose to FIM 1,151 million from the 1997 figure of FIM 948 million.

INCREASE IN MARKET SHARES

Leonia Bank's market share of home loans increased during 1998 by half a percentage point to 16%. Leonia Bank increased its market share of corporate loans by one percentage point to over 19%. The number of Leonia's fund investment customers nearly quadrupled.

SOUND CAPITAL RATIO

Leonia is one of the most financially sound banks in the Nordic countries. The Group's capital ratio, i.e. the ratio of total capital to risk-weighted assets is 13.9%.

GREATER OPERATIONAL EFFICIENCY

Leonia's business operations were combined and overlapping functions pruned. Payment services were concentrated in Helsinki and the foreign branch network was made more efficient. Support functions were out-sourced.

SERVICES IMPROVED

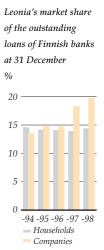

Leonia's telephone bank became the first in the Nordic countries to begin personal service on Sundays. Its automatic service operates round the clock. Internet services were diversified and cash withdrawal facilities for Leonia customers at shop checkouts were increased. Private banking units were established in the larger Finnish cities.

NEW PRODUCTS

The new Leonia account gives loyal customers excellent terms: the highest rate of tax-exempt interest and advantageous charges. Other new products launched include the new Compass investment service, new forms of home finance and new funds for the euro environment and the technology sector, for example. Savings and pension insurances were renewed.

A SMOOTH CHANGEOVER TO THE EURO

At the New Year, Leonia's systems and services were changed over to the euro, according to plan. Euro versions of account, payment, credit and investment products were developed. Leonia Corporate Bank took the lead in arranging the first euro-denominated syndicated loan for a Finnish borrower.

REVIEW BY THE PRESIDENT

For Leonia, 1998 – our first year – was in many respects one of intense activity. As the new Group had only been formed at the end of 1997, a great deal of our attention in the early part of the year was devoted to reorganising functions, eliminating overlaps and refining a new strategy and corporate image. Even so, we were able to improve our results considerably and gain both new customers and market share in the retail and corporate sectors.

Our strategy is clear. We shall concentrate on supplying banking and financial services to Finnish retail and corporate customers.

Leonia has several fundamental strengths. They include a light network of our own branches, in addition to which our operating methods and IT systems support the use of external service networks.

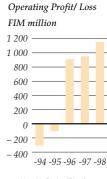

It is obvious that the future will see a growing trend towards routine banking services being channelled to customers by means other than the bank's own branch network. That will leave our branches free to focus more on advisory functions and other more demanding forms of customer service. With this in mind, we are increasing the number of customer service and sales staff and reducing the number of employees in administration and support functions.

One of Leonia's strong areas of growth is investment management services. Our efforts in this area brought an excellent result in 1998. The number of fund investors quadrupled and the assets under management grew by more than 50 per cent.

We also increased our market share in basic banking products: payments, deposits and

Leonia's forte is its flexible service concept, which is based on a light branch network, telephone and on-line banks using most advanced technology, together with the efficient provision of routine services through an external network, post offices. We are a solid, dependable and competitive financial institution. Our special concentration is on retail and corporate customers in Finland, and that is the sector in which we are determined to be the best.

LEONIA 1998	Operating profit (n	Operating profit (millions)			ons) Staff numbers nber at 31 December	
	FIM	EUR	FIM	EUR		
Leonia Bank	775	130	110 256	18 544	4 457

Leonia Group	1 151	194	148 071	24 904	4 700	

1994–1997 Postipankki and Finnish Export Credit

home loans. Volume growth helped us maintain our net income from financial operations at a constant level, even though falling interest rates and tough price competition narrowed interest margins.

Income from fees and commissions grew, due to several factors that included brisk growth in our investment management business. Also credit losses remained very low. All-in-all, Leonia's operating profit improved by over one fifth to nearly 1.2 billion markkas (almost 200 million euros).

The Group's balance sheet is healthy. Problem loans represent less than half a percent of the total, and the bank's exposures in Asia, Latin America and the regions of the former Soviet Union are small. Real estate assets represent only about two per cent of the balance sheet total, and their book value is lower than their market value.

Competition will continue to grow in financial services. This will require banks to choose between growth and specialisation. Both routes can lead to a cost-effective structure. Leonia has opted to make Finnish customers its special focus and is continuing to develop into a leaner, more cost-effective operation. Banks have enjoyed quite a propitious operating environment for the past few years. Although growth expectations have been revised downwards, I believe that the current year will still be a good one in terms of economic activity in Finland. The cost savings measures already implemented by Leonia will have more effect in the current year than last year, and will offset the income losses caused by low interest rates and tough price competition. The bank is continuing its determined drive to make its operational methods more efficient and cut costs.

We have every reason to be satisfied with 1998 and look to 1999 with confidence. Many thanks are due to our staff, who have worked under challenging conditions, and to our old and new customers who have shown faith in us.

March 1999

han them

Harri Hollmén

Our results im-

proved appreciably. Our competitiveness was strengthened, our market share grew - in the financing of both households and businesses. This has been achieved through the expertise and motivation of the staff, supported by new, customer-oriented products. Like the bank's new name and image, these have been well-received. We will continue to improve our services, because our

aim is to be the best

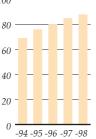

The President of Leonia Bank is Pentti Hakkarainen (front right). Executive Vice President Maarit Näkyvä is responsible for Leonia Bank's investment management services, Executive Vice President Ilkka Hallavo (rear left) for corporate banking, Executive Vice President Jussi Osola for treasury and trading, Executive Vice President Jukka Räihä for retail network customers and Executive Vice President Matti Inha for retail banking products.

LEONIA BANK

Measured by assets, Leonia Bank and its subsidiaries form Finland's second-largest commercial banking group. It provides retail and corporate customers with comprehensive banking services. Leonia Bank has its own nation-wide network of branches and advanced telephone and on-line banking services. The Bank has nearly one million retail customers, who use Leonia as their primary bank. In addition, the Bank has about 200,000 corporate customers.

In 1998, the operating profit of Leonia Bank was a satisfactory FIM 775 million, a 16% improvement on the previous year. Basic profitability improved due to the growth in customer business, and costs were kept under control.

Leonia Bank intends to reinforce its position in retail and corporate banking services, particularly in the main population centres. Simultaneously, the Bank will develop its telephone and on-line banking services, thus ensuring the availability of basic banking services to all customers, at all times and places. Leonia Bank will continue to ensure customer satisfaction and its profitability, through customer-oriented and competitive products and excellent service. Proportion of self service transactions in Leonia Bank's total retail network transactions % 100

RETAIL NETWORK

Leonia Bank's retail network comprises 63 branches, a telephone bank, an Internet on-line bank, and the cash dispensers and automatic teller machines (ATMs) available to Leonia's customers. In addition, 477 post offices also provide the banking services of Leonia Bank. Leonia's diverse service channels give its customers freedom of choice.

Great changes in customer behaviour in recent years have significantly affected the branches. The increased use of ATMs, bank cards, the telephone bank and on-line bank has rapidly decreased the number of transactions in branches. This trend is continuing. Branches are increasingly being used for more demanding banking services.

The branches still have a very strong position in housing finance. 1998 saw an increase of 70% over the previous year in the number of home loans, which resulted in an appreciable increase in Leonia Bank's market share.

TELEPHONE AND ON-LINE BANKING EXPAND

The telephone and on-line banks are the most rapidly growing parts of Leonia Bank's service network. Last year, Leonia's telephone bank handled 1.5 million personal customer calls. About 200,000 customers have the bank keys required for customer identification in the telephone and on-line banks. More than three million calls, and more than one million bills, were handled through the automatic service. Information, in the form of GSM text messages, on balances and transactions, and Visa credit card information browsing were among the new services added to the automatic telephone service. There was a large increase in the number of agreements made in the telephone bank, with, for example, mutual fund agreements worth more than FIM 500 million being made.

At the beginning of 1999, Leonia Bank introduced a new Internet-based on-line bank. In 1998, about three million banking transactions took place through Rahalinja, Leonia's terminal bank.

At the start of 1999, there were also 1,941 'Otto.' cash dispensers, 304 Leonia ATMs and almost 700 Cooperative Bank ATMs available to Leonia's customers. In addition, Leonia's customers can use their bank cards to make cash withdrawals at the checkouts of nearly two hundred shops.

In 1999, Leonia Bank intends to further increase its customer business and strengthen its market position.

High technology telephone bank

Technologically, Leonia's telephone bank system is among the most highly developed in the Nordic countries. It identifies the customer, recognises whether loan, investment or payment services are required, then automatically routes the call directly to a suitable bank expert. Right now, the telephone bank has a staff of more than 200.

At the start of 1999, the telephone bank became the first Nordic bank to offer personal banking services on Sundays, too.

In the Internet on-line bank, customers can leave a contact request, stating what the matter concerns and their preferred time for contact.

RETAIL BANKING PRODUCTS

Leonia Bank's retail banking products function is responsible for developing customer-friendly, competitive products and services, devising service solutions that take advantage of new technology, and creating functional and effective product processes. All loans, accounts and payment services have been adapted for the euro. The new combined markka-euro bank statement has rapidly become popular.

1998 saw a 3% increase in the deposits of Leonia Bank's retail customers. The greatest growth occurred in tax-exempt, two-year deposits.

SECURE BANKING

Leonia's on-line banking system was renewed in 1998. The customer identification method was made more secure and Visa-bank card transaction browsing was added. The on-line billing system, developed with the Helsinki Telephone Corporation, is the first form of billing to operate entirely through the Internet.

The main aim in developing Leonia's bank cards is to offer comprehensiveness and security of use. A smart card version of the Visa-bank card was introduced in 1998, and customers can now set a daily limit to withdrawals from cash dispensers. It is also possible to download cash onto a smart card from the Internet.

In another development, Leonia launched a combined card with the Stockmann department store. This is simultaneously a Leonia bank card, an 'electronic purse' and a Stockmann loyal customer card. It can also be used for cash withdrawals from Stockmann's checkouts.

In 1998, Leonia Card Ltd. issued 340,000

credit cards. Most were cards issued to private individuals.

NEW KINDS OF HOME FINANCE

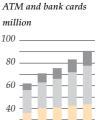

Leonia aims to be a strong home loan bank, offering its customers comprehensive new home finance alternatives. During spring 1998, Leonia introduced fixed-rate home loans, alongside the prime and floating-rate helibor loans.

Together with Skanska Construction, the bank developed a new form of home finance. 'Entré-home' is aimed particularly at first-homebuyers in new housing areas, and is a good alternative to renting or 'right-of-residence' dwelling. The product has been well-received.

In early 1999, the Sato Group launched its own new housing product, known as 'Kolkyt Nyt'. Leonia is responsible for its financing, and offers home loans to future buyers.

In 1999, the main challenge for Leonia's retail banking products will be competitiveness in a rapidly changing environment.

Leonia is involved in real estate agency through the PSW Realty World franchising chain including 59 independent entrepreneurs.

Use of Leonia Bank's

Bank card purchases
 ATM withdrawals

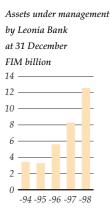

All-in-one account

Leonia Bank renewed its range of accounts at the end of 1998. In the future, the only current account available will be the new Leonia account – a truly innovative product in Finnish banking. Customers will not actually need other accounts, as the Leonia account is suitable for both savings and payments.

The Bank's privilege and loyal customer relationships are closely connected to the Leonia account, which will become more economical the more each customer concentrates his or her transactions in Leonia. The account does not have a fixed rate of interest. Instead, both interest and service charges are determined by the amount of banking services used by the customer. Privilege customers can receive the maximum tax-exempt interest of 2% on their Leonia accounts.

Leonia Bank believes its privilege and loyal customer systems will attract many new customers.

INVESTMENT MANAGEMENT SERVICES

Leonia Bank's investment management services include corporate and institutional asset management, private banking services, mutual funds and insurance. The investment management function is responsible for producing innovative and cost-effective investment products and tailor-made investment management services for customers of the Leonia Group.

Leonia Bank's investment management services made good progress in 1998. Personal investment management services were expanded by establishing private banking units in Helsinki, Turku, Tampere, Kuopio, Oulu and Vantaa. In early 1999, another seven units were opened in different parts of Finland.

MUTUAL FUND CUSTOMERS NEARLY QUADRUPLED

Leonia Bank's mutual fund range was expanded with the addition of international combination funds and global technology funds.

During 1998, the total assets in the mutual funds nearly doubled and the number of unitholders nearly quadrupled, resulting in a substantial increase in Leonia Bank's market share. By the end of the year, Leonia Bank's market share of equity funds investing in Finland had doubled to 18%, the largest in Finland.

SUBSTANTIAL INCREASE IN ASSETS UNDER MANAGEMENT

During 1998, Leonia Bank further strengthened its position as a portfolio manager for companies and institutions. The total amount of assets under discretionary management grew by more than 50% to FIM 12.5 billion. The investments of both the client portfolios and the mutual funds succeeded extremely well.

The Leonia Life Insurance Company Ltd., which commenced operations in 1995, launched renewed unit-linked savings and pensions insurance products in the autumn of 1998. During October-December, unit-linked insurance accounted for about 20% of premium income. Rising equity prices and falling interest rates were behind the investment success. At the end of the year, the company had more than 50,000 customers.

Investment management aims at strong growth in personal customer investment management in 1999, and consolidation of the strong position already achieved among corporate and institutional customers.

Leonia Compass – steers investment in the right direction

In October 1998, Leonia Bank launched its new Compass investment management service for investors and savers. The individual needs and aims of investors are taken into account. The service is clearly more comprehensive than previous investment advisory services in the branches.

A basic strategy, adapted to each investor's aims and requirements, is proposed to users of the Compass service. The five basic Compass strategies differ in terms of expected returns and risk profile, and form the basis for creating a Compass investment plan for each customer.

Compass covers all investment alternatives; i.e. it can be used to invest in insurance, funds, equities, bonds and deposits. Regular contacts form an essential part of the Compass service. The investor receives a report on his or her investments at regular intervals, and the investment plan is re-evaluated when there are changes in the market or in the customer's financial status.

TREASURY AND TRADING

Leonia Bank's treasury and trading function operates on the capital, money and foreign exchange markets, with responsibility for managing the market risks of the Leonia Group, as well as for selling competitive products, risk management services and processing services to corporate and institutional customers. It is also responsible for the Group's liquidity, funding and investment bank services.

Trading on the foreign exchange markets went well in 1998. Interest rate instruments succeeded better than in the previous year, despite the economic crises in Asia and Russia that disturbed international fixed income markets.

INCREASE IN CUSTOMER BUSINESS

Despite the market stabilisation brought by the euro, Leonia increased its customer trading. For example, in 1998 the Bank's market share of issues of commercial paper and local government paper averaged 40% and up to 50% respectively. In customer trading on the money markets, Leonia Bank is in a strong position.

In anticipation of an expected networking of stock exchanges in the euro area, Leonia increased its brokerage of stock exchange products and formed new services more suitable for customer trading.

Leonia Bank was an advisor in the restructuring of several companies. The bank also acted as an originator or adviser in four share issues and sales, and as an adviser in two issues of bonds with warrants and convertible bonds.

FULLY PREPARED FOR THE EURO

Preparations for the introduction of the single European currency, the euro, demanded a considerable work input from the treasury in 1998. Various euro-projects accounted for more than 3,000 person-workdays, with full readiness for the new business environment being achieved on schedule.

Management of the risks and funding of the Leonia Group's banking book was made more effective by concentrating investment management in the treasury function. The Bank's trading on its own book was transferred from the foreign branches to Helsinki.

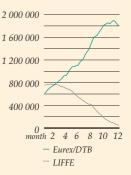

At the end of 1998, Leonia Bank applied for membership of the Frankfurt Stock Exchange. The Bank intends to further expand and diversify its brokerage of bonds and shares.

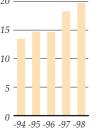

Leonia in the German derivatives exchange

In January 1998, Leonia Bank became the first Nordic financial institution to become a member of the German derivatives exchange, Eurex (Deutsche Terminbörse until 1998). This allows Leonia's customers to manage their risks effectively with euro-denominated derivatives. Derivatives brokerage increased considerably during the year, bringing Leonia many new customers.

The trading volume of 10 year bond futures issued by the German government in Eurex and LIFFE in 1998 units

Leonia Bank's market share of corporate FIM and foreign currency loans at 31 December % 20 _____

COMPANIES AND INSTITUTIONS

The customers of Leonia Bank's corporate banking function are companies, municipalities and other public sector entities as well as non-profit institutions. Corporate banking is also responsible for the Leonia Group's payment, financing and account products, and finance company services.

Customers are served by Leonia Bank's corporate branch network, with 55 service points throughout Finland. Each corporate customer has its own customer responsibility officer, who specializes in the customer's financial requirements.

STRONG GROWTH

The positive development of the Finnish economy created excellent opportunities for growth in Leonia Bank's corporate finance. Profitability was good while credit losses remained minimal. At the end of 1998, Leonia Bank's market share of markka and foreign currency-denominated loans to corporate customers was over 19%, i.e. one percentage point greater than a year earlier. Lending to small and medium-sized businesses increased by about 30% and the number of customers also increased.

Preparations for an increase in demand were made by increasing the numbers of customer responsibility officers and service staff and by diversifying expertise. At the end of the year, there were 276 customer responsibility officers working in corporate services.

Leonia Finance Ltd. reinforced its position, particularly in the financing of information technology and vehicles. Leonia MB Group Oy, which offers capital investment and other special finance services, strengthened Leonia's investment resources by establishing the largest mezzanine fund in the Nordic countries. Lending by Leonia Municipality Bank plc remained practically unaltered.

Preparations were made for the introduction of the euro at the start of 1999. These included the successful creation of a euro product range, with all the necessary alterations to information systems, and the training of both staff and customers. Comprehensive and modern euro-denominated banking services are now available to Leonia's customers, who can change over to the use of the euro in their own time and according to their wishes.

LEONIA – THE PRIMARY BANK FOR AN INCREASING NUMBER OF COMPANIES Leonia Bank is aiming at rapid growth in corporate finance. Leonia is already in a strong position as a financier of large and medium-sized companies. Now the bank is increasing its market share among small companies too.

For several years already, customer satisfaction surveys of corporate customers have given Leonia's customer responsibility officers very high grades for their professional skills and initiative. Leonia aims to handle a greater share of the financing and banking of its customer companies, i.e. to become the primary bank for an increasing number of companies.

Electronic payments take over

1998 saw a 4% growth in payment transactions handled by Leonia, bringing the total to 355 million. There were 1.4 million foreign payment transactions.

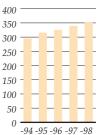

Retail customers' transactions grew by 4%. The greatest increase was in the use of home banking services, self-service telephones and bank cards. Correspondingly, there was a rapid decrease in payments and withdrawals made in branches. The number of transactions made by businesses increased by 7%. The number of payment orders made using paper forms dropped by a quarter.

The demand for payment services was focused mostly on electronic services. Electronic account transfers accounted for 95% of the payments of companies and institutions, and electronic transfers handled nearly 100% of periodic payments. Two-thirds of the account transfers made by personal customers were electronic payments.

Electronic contact agreements between customers and the bank increased by more than 50%. At the end of 1998, there were nearly 30,000 line transfer customers and about 110,000 on-line bank customers.

The number of bank and combination cards increased by more than 10% to over 430,000 cards. By the end of the year, there were nearly 200,000 cards incorporating chips.

DNNECTOR

Leonia Bank joins the Connector club

Leonia Bank became the first Finnish bank to join the international Connector cash management network, with member banks from 15 countries. Besides the euro countries, there are also Connector banks in the United Kingdom, Sweden, Switzerland and the USA.

Through Connector, Leonia can offer comprehensive account and payment services for the cash management of even the most demanding large corporations. The network makes it easier to concentrate cash management in Leonia Bank, from where customers can get all the Connector banks' account terms and prices for payment services. The banks in the cooperation network are experienced in payments. Data travels safely between the banks via the SWIFT (Society for Worldwide Interbank Financial Telecommunication) payment transmission network. Corporate groups operating in the euro area are seeking to save costs by concentrating cash flows and this is where Connector provides a ready-to-use tool.

In 1998, Leonia Corporate Bank was the leading Finnish financial institution in export and project financing and in short and longterm debt issues. Leonia Corporate Bank aims to perform each customer commission with such a degree of excellence that the customer will be convinced of the superiority of Leonia's expertise and cus-

LEONIA CORPORATE BANK

Leonia Corporate Bank provides financing services to large, international Finnish corporations and their customers. Leonia Corporate Bank sells financing and investment solutions developed from the customer's own business needs.

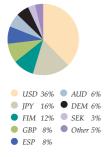

Leonia Corporate Bank's core products are export and project financing, short-term trade finance, bond issues, structured financing and cash management. It tailors these core products into customer-specific applications, with the objective of achieving a leading position in supplying financial and banking services to large Finnish corporations.

Leonia Corporate Bank's results for 1998 were satisfactory. The company's operating profit increased by one-third to FIM 370 million, having been FIM 280 million the previous year. The balance sheet total was FIM 40.8 billion. Leonia Corporate Bank's loan portfolio by customer sector at 31 December 1998 Total FIM 18.3 billion

Export and project financing 74%
 Domestic financing 24%
 Other 2%

Leonia Corporate Bank's longterm funding by currency at 31 December 1998 Total FIM 27.8 billion

LEONIA CORPORATE BANK

Leonia Corporate Bank supplies tailor-made financing and investment services to large, international Finnish companies and their customers. Leonia's entire product range is available to customers, from conventional on-balance sheet financing and Leonia's solid payments expertise to a comprehensive range of money and capital market products, short-term trade finance, structured financing services and export and project financing.

In export and project finance, Leonia Corporate Bank continues the operations of Finnish Export Credit, which was recognized as Finland's leading supplier of export finance. As a part of Leonia, the company has gained improved resources and operating opportunities for export and project financing, to keep in step with the rapidly changing demands of the markets. Leonia Corporate Bank offers Finnish and Nordic corporations financing services for export trade, as well as for extensive infrastructure and industrial projects.

Leonia Corporate Bank's strengths are its sound creditworthiness and the resulting ability to handle customers' financing requirements at home and abroad. Each customer company of Leonia Corporate Bank is appointed its own customer responsibility officer.

CAPITAL ADEQUACY RATIO IS STRONG

Leonia Corporate Bank's capital adequacy ratio strengthened significantly during the year. It stood at 32.0% at the end of the year, having been 26.7% a year earlier.

Financing operations totalled FIM 18.3 billion at the end of 1998, having been FIM 21.5 billion at the end of 1997. During the year, customers drew new loans totalling FIM 3.7 billion. Financing granted to large corporations was also entered in the balance sheets of other Leonia Group companies.

Investment operations decreased to FIM 19.6 billion from the previous year's figure of FIM 30.4 billion. The reduction was due to significant changes in the internal division of responsibilities within the Leonia Group during 1998. In the future, Leonia Corporate Bank's investment operations will mainly concentrate on maintaining liquidity.

A LEADING EXPORT AND PROJECT FINANCIER

Leonia Corporate Bank's expertise in export and project financing is based on an understanding of the customer's business, and a solid familiarity with the forest, telecommunications, energy and mining sectors in particular.

The success of export and project financing rests on extensive co-operation with other financiers, with whom Leonia Corporate Bank has been a trusted partner over many years. The co-operation network includes national guarantee institutions, international banks and multinational development banks in different parts of the world. In co-operation with its partners, Leonia Corporate Bank is able to offer total financing solutions, even for very large projects.

In 1998, new long-term loans and formal standby facilities were granted to Brazil, Chile, the Philippines, India, Italy, China, Korea, Croatia, Lithuania, Romania, Slovakia, Thailand, Turkey and Vietnam. New long-term export and project financing credits were drawn totalling FIM 2.4 billion.

A STRONG PERFORMER ON THE CAPITAL MARKETS

Leonia Corporate Bank was highly successful on the capital markets. The most significant commission in 1998 concerned Fennica 3, a securitisation of state-subsidised home loans. Leonia Corporate Bank acted as one of the two lead managers and as the domestic adviser. The price of the issue was determined by investor demand, using the so-called book-building procedure. Investor demand accumulated to a total of FIM 3.2 billion, with the arrangement finally totalling FIM 2.1 billion, of which the lead managers sold more than 70%.

Leonia Corporate Bank is a leading arranger and intermediary in Finnish commercial issues and bond and commercial paper programmes. In 1998, it had a dominant market share in all markka-denominated commercial bonds. The largest issue on the bond markets was a FIM 2 billion issue for Kemira, in which two series of bonds were launched. In addition, Leonia Corporate Bank arranged four other commercial issues aimed at institutional investors. In the Baltic markets, Leonia, together with the Latvian Investment Bank, arranged a bond issue worth 15 million Latvian lats (FIM 134 million) for Svensk Exportkredit (SEK). The loan was the first by a foreign issuer on the Latvian domestic market. SEK gave Leonia the 'Best Arranger for a New Issue in the Emerging Markets in 1998' award.

In 1998, syndicated loans to the value of approximately FIM 14 billion were arranged for Finnish corporations. In about 50% of these, Leonia was the lead manager. The largest syndicated financing arrangement of 1998 was a stand-by credit limit of DEM 1 billion for Sonera, which Leonia Corporate Bank arranged together with Deutsche Bank.

A NEW FACTOR IN STRUCTURED FINANCING

Leonia Corporate Bank has established a new product function to cover the market demand for structured financing. The service provides pricing and structure proposals, for example, in the arranging of customer issues.

Financing solutions for telecommunications

Sonera utilises Leonia's comprehensive services. Leonia Corporate Bank participated in the financing of a GSM mobile telephone network in Turkey. The borrower is Türkcell Iletisim Hizmetleri, of which Sonera plc is the one of the two main shareholders.

Türkcell has a 71% share in the Turkish mobile phone market. Its network covers about half of the Turkish population and geographically nearly all of Turkey's large cities along with the main tourist areas.

Leonia Corporate Bank also arranged two syndicated loans for Sonera during 1998. A loan of DEM 1 billion was arranged together with Deutsche Bank, and another loan of EUR 100 million was arranged by Leonia Corporate Bank alone.

1) The financial information of the Leonia Group for the years 1994–1997 has been prepared by adding together the information of the Leonia Bank Group and Leonia Corporate Bank plc. The financial highlights have been calculated on the basis of these figures. The financial highlights have been calculated in accordance with the regulations of the Financial Supervision Authority. The figures in the profit and loss account for the year 1997 have been restated to conform with the reporting requirements of the Financial Supervision Authority for the year 1998. The figures for years prior to 1997 have not been restated to conform with the result of the provide the provide the provided the pro amended regulations.

2) Total income includes the income in the formula for the income to cost ratio.

a) Total membratises the membra in the formula for the income to cost ratio.
b) Total operating expenses include the expenses in the formula for the income to cost ratio.
c) Preferred capital notes have not been included in capital and reserves.
c) Provisions for bad and doubtful debts comprise specific provisions for loans and advances and contingent liabilities and commitments, as well as releases of provisions and recoveries of amounts written off.

6) Credit Institutions Act 1994 (1607/93 Sect. 9:78 §), and amendments dated 1 August 1996 (570/96 Sect. 9:78 a-c §) and

1 January 1998 (1340/98 Sect. 9:78 a and c §).

FORMULAS USED IN CALCULATING THE FINANCIAL HIGHLIGHTS

The financial highlights are calculated as referred to in the regulations of the Financial Supervision Authority.

Revenues:	interest income, net leasing income, dividend income, fees and commissions receivable, net income from transactions in securities and foreign exchange dealing and other operating income	
Income to cost ratio:	net income from financial operations + dividend income + fees and commissions receivable + net income from transactions in securities and foreign exchange dealing + other operating income fees and commissions payable + administrative expenses + depreciation + other operating expenses	
Return on equity, % (ROE):	operating profit/loss less taxes capital and reserves + minority interests + untaxed reserves and depreciation difference less x deferred tax liability (average)	100
Return on assets, % (ROA):	operating profit/loss less taxes average balance sheet x	100
Equity/total assets, %:	capital and reserves + minority interests + untaxed reserves and depreciation difference less <u>deferred tax liability</u> <u>balance sheet, total</u> <u>x</u>	100

Preferred capital notes have not been included in capital and reserves in calculating the financial highlights.

LEONIA PLC BOARD OF DIRECTORS' REPORT

LEONIA GROUP

OPERATING ENVIRONMENT

Finland's GDP continued to grow briskly in the first half of the year and, despite the slowdown later, the average growth for the whole year was about 5%. The rise in consumer prices slowed towards the

Economic growth was brisk and the demand for credit strong. es. At year-end consumer prices were only 0.9% higher than in December 1997, and the average year-on-year inflation was 1.4%. This was the fifth consecutive year of low inflation.

end of the year, mainly in response to falling import pric-

In May it became clear that Finland would be among the first countries to join the third stage of the EMU. The Bank of Finland's tender rate remained stable

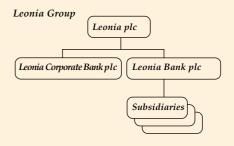

until 3 December when it declined to 3%, as in nearly all of the EMU countries. Bond yield differentials between Finland and Germany remained relatively small, even during the tumult in international financial markets in the autumn. The disturbances were reflected in Finnish equity markets in a similar way to other western countries.

In the latter half of the year, economic difficulties in Asia and Russia began to affect industrial output and orders in Finland, with growth in the final months being focused mainly on the electronics sector. Investments in machinery and equipment grew sluggishly, but corporate borrowing from banks increased. The financial position of companies continued to be quite strong. Building activity was lively in the first months of the year, and total building investments increased by nearly 10%.

Private consumption grew strongly for the fourth consecutive year. Retail sales volumes increased by about 5%, supported by a rise in real disposable incomes, a gradual decline in the unemployment rate and the positive economic expectations of consumers. The number of employed persons grew by 2.5%, and the unemployment rate decreased on average to 11.4%. The confidence of consumers in the economy remained strong.

Housing markets were also lively, partly influenced by migration to the larger cities. The demand for home loans increased, apartment prices rose and the average size of home loans grew. On the other hand, the demand for consumer credits was slack. The growth in the banks' outstanding loans accelerated near the end of the year. From December 1997 to December 1998, lending increased by nearly 12%. Deposits also increased, although households simultaneously became more interested in alternative investment instruments. Markka-denominated deposits were 4.6% higher in December than one year earlier. Tighter competition between the banks narrowed the margin between borrowing and lending.

LEONIA GROUP FORMATION, OWNERSHIP STRUCTURE AND PARENT COMPANY DUTIES

In December 1997, the Finnish government established a holding company under the name PV Group plc, to which it surrendered its shares in Postipankki and Finnish Export Credit under an ownership arrangement implemented on 18 December 1997, and subscribed for the entire share capital of PV Group.

The PV Group became Leonia, Postipankki became Leonia Bank and Finnish Export Credit became Leonia Corporate Bank.

During 1998, the name of the parent company was changed to Leonia plc, the name of Postipankki to Leonia Bank plc and the name of Finn-

ish Export Credit to Leonia Corporate Bank plc. The other companies included in the Group accounts are in the Leonia Bank Group, with Leonia Bank plc as the parent company.

The parent company, Leonia plc, is responsible for strategic leadership of the Group and for certain Group administrative functions that are handled centrally, such as risk control, information technology, group accounting, community relations, economic research and corporate communications.

Monthly averages of HEX general index

Monthly averages of external value of FIM

GROUP RESULTS

Leonia Group's results for 1998 were better than forecast. The operating profit was FIM 1,151 million, which was FIM 203 million up on the previous year. The return on equity was 11.5%, compared with 10.3% in the previous year. Profitability also improved, measured by the income to cost ratio.

Leonia's profits were better than expected. Operating profit improved by a fifth, to FIM 1,151 million, due to increased income and reduced expenses. Lower interest rates decreased the margin between interests receivable and payable, and net income from financial operations was also weakened by a contraction in money market items following the concentration of treasury operations. Due to growth in lending and deposits, however, the Group's net income from financial operations did not weaken during the year.

Fees and commissions receivable were increased by fees and commissions for account transactions and payments, and for the administration and collection of loans at the risk of Asset Management Company Arsenal Ltd.

The net income from securities transactions was FIM 122 million, resulting from income of

FIM 143 million from transactions in equities, offset by a net loss of FIM 21 million from transactions in debt securities. The latter also includes net income from interest rate derivatives including unrealised profits and losses arising from valuation. The interests on debt securities are included in net income from financial operations. In the previous year, securities transactions had shown a net loss of FIM 108 million.

The net income from foreign exchange dealing was FIM 101 million, as against FIM 109 million in the previous year.

Operating expenses and depreciation totalled FIM 2,725 million, compared with FIM 2,660 million in the previous year. The increase was brought about by one-time charges of FIM 70 million related to the restructuring of Leonia Bank's foreign branches.

Of administrative expenses, pension costs increased. This increase was necessitated by an amendment to the Pension Funds Act, valid from the beginning of the year, which required pension funds to strengthen their operating capital and solvency. Other administrative expenses were lowered by a previously agreed reduction in reimbursements to Finland Post. Information technology expenses grew because of extra resources required for systems development – in particular for

Leonia Group income to cost ratio

1994–1997 Postipankki and Finnish Export Credit

projects related to the euro and year 2000 compliance.

The net figure for provisions for bad and doubtful debts remained low, being only 0.06% of loans and advances and contingent liabilities. The new write-offs and provisions of FIM 163 million made during the financial year were offset by recoveries of FIM 109 million from previous write-offs. There was a net increase of FIM 30 million in provisions for exposures to Asia. As a result of new provisions of FIM 99 million made for bad and doubtful debts for corporate and institutional customers, and recoveries and releases of FIM 63 million, the net figure for provisions for bad and doubtful debts was FIM 36 million. Correspondingly, new such provisions for retail customers totalled FIM 64 million, offset by recoveries of FIM 46 million giving a net figure for provisions for bad and doubtful debts of FIM 17 million .

The Group's non-performing and other non-interest-earning loans and advances continued to decrease, totalling FIM 647 million at the end of the year. Of this amount, households accounted for FIM 279 million and corporate and institutional customers for FIM 368 million. One year earlier, non-performing loans and advances had totalled FIM 716 million, with households accounting for FIM 363 million and corporate and institutional customers for FIM 353 million.

On 31 December 1998, non-performing and other non-interestearning loans and advances amounted to 0.5% of all loans and advances and contingent liabilities.

GROUP CAPITAL ADEQUACY

Leonia's capital adequacy ratio was 13.9% at the end of the year, and the Tier 1 capital ratio 10.6%. Leonia Group's capital adequacy ratio was 13.9% at the end of the year. The Tier 1 ratio of total capital to riskweighted assets was 10.6%. At the end of 1997, the capital adequacy ratio had been 13.3%, while the Tier 1 ratio had been 9.4%.

At the end of the year, Leonia Group's Tier 1 capital stood at FIM 8,719 million and total capital at FIM 11,419 million. During the year, Tier 1 capital increased by FIM 80 million. The preferred capital notes included in Tier 1 capital decreased by FIM 640 million. In December 1998, Leonia Corporate Bank purchased from domestic investors preferred capital notes worth FIM 700 mil-

lion that had been issued in December of the previous year by Leonia Bank plc. Of the preferred capital notes issued by Leonia Bank in March 1998, FIM 500 million were allocated to Leonia Corporate Bank and FIM 60 million to other investors. The amount of subordinated debentures included in Tier 2 capital was reduced by FIM 577 million. There was a reduction in total capital of FIM 791 million.

Leonia Group's risk-weighted assets were FIM 82.2 billion at the end of the year, having been FIM 91.8 billion at the end of the previous year.

GROUP BALANCE SHEET

Leonia Group's total assets were FIM 148.1 billion at the end of the year. During the year they contracted by FIM 30.2 billion. This development resulted mainly from the reduction in money market items due to the concentration of the Group's funding and trading operations in Leonia Bank and the transfer of the Bank's treasury and administrative functions from the London and New York branches to the head office in Helsinki. The Group's loans and advances to credit institutions decreased by FIM 20.1 billion and debt secu-

Leonia's lendings increased substantially, despite the contraction in total assets that resulted from a reduction in money market items.

rities by FIM 14.2 billion. The Group's liabilities to credit institutions decreased by FIM 13.7 billion and bond and note funding decreased by FIM 12.0 billion.

The domestic demand for credit continued strong. The Group's loans and advances to customers increased during the year by FIM 5.0 billion to reach FIM 76.0 billion. There was particularly strong growth in markka-denominated loans and advances to companies and institutions. The growth in loans to households also accelerated significantly.

Leonia Group capital adequacy ratios at 31 December

1994–1997 Postipankki and Finnish Export Credit

Liabilities to customers totalled FIM 54.4 billion at the end of the year, a fall of more than one billion markkas compared with the end of the previous year. Customers' markka-denominated deposits in Leonia's accounts increased by about one billion markkas. Foreign exchange denominated deposits and other liabilities to customers diminished.

The book value of Group-owned properties totalled FIM 3.3 billion at the end of the year, corresponding to 2% of the balance sheet total. 40% of this property was occupied for the Group's own activities. The net income from properties occupied for other activities was 6.3% last year.

The net interest margin calculated for the year-on-year average of the interest-earning assets was 1.7% in 1998 and 1.6% in 1997. The widening of the margin was due mainly to a lower share of interestbearing liabilities and higher cash flow from operations.

DERIVATIVE CONTRACTS AND OFF-BALANCE SHEET ITEMS

Derivative Contracts

The amount of the Group's derivative contracts,
measured by the nominal value of the underlying
instruments and the credit equivalent amount, de-
creased significantly during the year. This develop-
ment was influenced by the restructuring of the
Group's treasury operations, the transfer of deriva-
tives trading to stock exchange based transactions
and reduced hedging requirements, due to the euro, in the trading of
both foreign exchange and interest rate contracts.Create equilable
amount of
contracts a
FIM 9.8 bi
year-end.

Based on the value of the underlying instruments, about a quarter of the Group's derivative contracts were treated as hedges. These contracts have been valued on an equivalent basis to the items being hedged. Other derivative contracts have been marked to market, and the resultant profits and losses are included monthly in net income from transactions in securities and foreign exchange dealing.

Calculated in accordance with the requirements of the Finnish capital adequacy standards, the credit equivalent amount of the derivative contracts at the end of the year was FIM 9.8 billion and the riskweighted amount FIM 2.7 billion. A year earlier, the corresponding figures were FIM 15.2 billion and FIM 4.3 billion.

The Group's derivative contracts are specified in the Notes to the Accounts, no. 42.

RISK MANAGEMENT IN LEONIA GROUP

Objectives and organisation

The risk management process in Leonia Group is divided into risk management and risk control independent of operative business lines. These roles are combined in the Board of Directors of Leonia plc, which decides on strategic matters such as the annual operating plans

Risk management in Leonia is divided into operational risk management and independent risk control. ment policy. It decides on the allocation of capital to Leonia plc's subsidiaries and monitors the Group's capital adequacy, profitability and liquidity. Risk management includes the identification and measurement of risks, and their active adjustment. It also involves the continuous development of operations and

of the business operations and the Group's risk manage-

ensuring the functionality of processes. The Board of Management of Leonia Bank and the Board of Directors of Leonia Corporate Bank are responsible for risk management. They set the limits on business risks and ensure that accepted risk management policy is followed in

business operations.

Risk control comprises the preparation of a risk management policy and the measurement and analysis of financial risks on a uniform basis, independent of business operations. A risk control committee under the Board of Directors of Leonia plc is responsible for risk control. This committee prepares a risk management policy and monitors the credit, market and operational risks arising from business. The chairman of the Board of Directors of Leonia plc acts as the chairman of the committee.

RISK MANAGEMENT ORGANISATION IN LEONIA GROUP

Credit risks

Credit Risk Management Procedures

The credit policy of the Group is reviewed annually and is used to guide the targeting of the counterparty credit risk in both lending and treasury operations by country, by business sector and by creditworthiness category. It also determines the maximum amounts for large risk concentrations.

Guidelines for credit risk management are set at Group level. Business credit risks are managed by a system in which each customer is assigned a customer responsibility officer who is thoroughly familiar with the customer's business The majority of Leonia's credit risks are concentrated on customers with good or satisfactory creditworthiness. Credit risks in crisis areas are small.

and monitors its development. The Group has an internal credit rating system, based on the financial status of the customer and the assessment of future development. The Group also uses the analyses of specific international rating agencies, and their classifications are converted to the Group's internal classification scale. Classification covers over 95% of the loans and other exposures to companies and institutions. The measurement of the total amount of credit risk is based on the credit grading. Credit decisions are based on the customer's creditworthiness. The uncertainty associated with assessment of credit risk is reduced by covenants or collateral.

In the case of retail customers, creditworthiness is assessed by relating the credit to the customer's income, living expenses and repayment obligations. In the case of lending without collateral, the creditworthiness of personal customers is assessed by credit scoring, which depicts the customer's credit repayment ability.

Credit risk monitoring is based on the continuous monitoring of customers' creditworthiness and of the value of collateral and covenants, as well as the monitoring of country, customer and product limits, and comprehensive reporting. In the case of customers who belong to the weaker creditworthiness categories, the customer responsibility officers prepare action plans to reduce credit risks.

Leonia's market risks (VaR 1%) 1998 FIM million

In addition to limits for individual countries and counter-parties, Leonia Corporate Bank has set limits for the creditworthiness structure of loan, investment and derivative portfolios and the total exposure portfolio. These limits are defined on the basis of internal credit rating as a percentage minimum for each portfolio. Total and portfolio limits are also set for the percentage share of exposures without a public credit rating.

Independent Measurement of Credit Risks

The bank has had an on-going risk control and business operations joint project to develop a Value-at-Risk (VaR) formula for corporate credit risks since the spring of 1997. This led to the development of a programme based on the Monte Carlo simulation, with the first preliminary risk figures being calculated in summer 1997. The credit risk figure measures the bank's potential credit losses at certain levels of confidence for the following year. The monitoring of risks based on the method was begun at the end of 1998.

Credit Risk Development

The termination of treasury operations in the London and New York branches in the summer of 1998 had the effect of reducing total exposures and particularly exposures to financial institution customers in the USA and Western Europe. In Finland, exposures to small and medium-sized companies grew strongly. Leonia was also a significant financier of corporate acquisitions. The exposure to large companies and foreign companies has fallen due to limited demand. The creditworthiness distribution in the exposure portfolio was in accordance with objectives.

The Group's exposures to areas affected by economic crisis are relatively small, when the amount of loans and advances guaranteed by external guarantors are deducted from the total exposure to each country. Exposures to Russia were FIM 197 million at the end of the year, of which a considerable part has been secured by collateral in western countries. The Asian share of the exposure at the end of the year was 1%, of which 42% consisted of loans to the largest Japanese banks. Loans to South Korea, Indonesia and Thailand totalled FIM 375 million at the end of 1998. Of these 52% was direct company risk, with the remainder being bank or country risk. Latin American exposures at the end of the year totalled FIM 106 million , of which Brazil's share was FIM 10 million. The Group has provisions of FIM 70 million for exposures to Asia, compared to a corresponding figure of FIM 40 million last year.

The number of problem customers did not increase during the financial year. No significant customers went bankrupt.

Funding and Interest Rate Risks in the Banking Book

The banking book is the balance sheet of Leonia Bank cleared of trading items. The banking book is managed essentially by managing the interest margin, which is affected by interest rate and funding risks, credit risks and, in addition, risks that are more difficult to model, such as the premature repayment of credits and the stability and price of account balances. In order to assess the interest rate risk of the banking book, not only items with a known interest basis are modelled, but also certain traditionally stable items such as demand deposits. The interest rate sensitivity of the balance sheet is measured by assuming several alternative interest rate scenarios, to obtain the most comprehensive picture of the risk.

Correspondingly, the funding risk is assessed on the basis of future funding requirements, by taking into account the liquid assets in the balance sheet and predictions of the future development of business.

The maturity analysis of the Group balance sheet items is shown in note 36.

In Leonia Corporate Bank, the funding and market risks of the balance sheet are covered to the extent that this is practicable. The risks are by nature residual, requiring mainly the management of liquidity. For several years, the company has applied VaR risk assessment and supplementary indicators.

The VaR method is also applied to assessing the development of the credit risk, particularly that relating to interest rate and foreign exchange derivative contracts.

The total market risk in Leonia's trading function varied between FIM 4–16 million.

Market Risks in Trading

In Leonia Bank, the daily operational management of market and liquidity risks is concentrated in the trad-

ing function, the business of which comprises both customer oriented activities and the Bank's proprietary trading in interest rate, foreign exchange and equity instruments. The risk taken in business operations must remain within the limits approved by the Board of Management.

Measurement of Market Risks

Market risk assessment based on the VaR procedure has been in use since 1 January 1995. The treasury's limits have been based on VaRbased risk figures (equity, exchange rate and interest rate risks) since 1 May 1996.

The VaR figures are calculated, with a confidence level of 99%, for overnight risks (holding period = 1 day), using models based on the Monte Carlo simulation. The calculation is performed daily by the risk control function. The volatility and correlation parameters required by the model are calculated daily on the basis of 60-banking-day historical market observations.

In addition to the VaR figures, risk monitoring performs daily stress test calculations. Stress test-based limits are also set for the most important risks.

Market Risk Development

In 1998, Leonia Bank's market risks were at a fairly low level historically. During 1998, the total overnight risk of the trading function varied between FIM 4 – 16 million. The interest rate risk clearly dominated in the total risk, with currency and equity risks being substantially lower.

ADMINISTRATION

The Constitutive Meeting on 11 December 1997 elected Eino Keinänen, Eva Liljeblom, Esko Mäkeläinen, Raimo Sailas, Anssi Soila, Ossi Virolainen and Matti Vuoria as members of the Board of Directors of Leonia plc. Harri Pynnä and Jarmo Väisänen were elected as deputy members.

The Annual General Meeting elected Eino Keinänen as Chairman of the Board of Directors. A meeting of the Board of Directors on 11 December 1997 elected Raimo Sailas and Matti Vuoria as Vice Chairmen of the Board and Harri Hollmén as Chief Executive of the company.

The Constitutive Meeting on 11 December 1997 elected Tilintarkastajien Oy – Ernst & Young, Authorised Public Accountants, as the auditors of Leonia plc, with Jorma Jäske APA as the responsible auditor, assisted by Kunto Pekkala APA and Pekka Luoma APA. Mikael Holmström APA was elected deputy auditor.

The term of office of the members of the Board of Directors and the auditors will end at the conclusion of the Annual General Meeting in 1999.

STAFF

In 1998, the staff of the Leonia Group averaged 5,027, which is 385 less than the previous year. At the end of the year, the Group staff num-

Leonia's staff numbers were reduced by over 500 during the year. bered 4,700, i.e. 537 less than at the end of the previous year. Of these, 165 were employed in Leonia plc, 4,457 in

the Leonia Bank Group, and 78 in Leonia Corporate Bank. At the end of the year, the Leonia Group had 4,482 permanent full-time employees and 218 part-time or temporary employees.

The administration of companies in the Group was combined and streamlined by trimming overlapping

operations and out-sourcing services. Reductions in staff took place mainly in Leonia Bank's payments function and in central administration units.

The terms and conditions of the Group's employment contracts are based on the national collective incomes' policy agreement for 1998–1999.

Profit bonuses totalling FIM 17.9 million were transferred to the staff fund from the 1998 financial year. The regulations of the staff fund were altered with effect from 1 January 1999, to allow all companies in Leonia Group to join the staff fund. At the same time, the name of the fund was changed to the Staff Fund of Leonia Group. A profit bonus is paid to the staff fund, if the net profit of the Group exceeds an approved threshold income limit.

The basic and supplementary pensions of the staff of Leonia plc and Leonia Bank plc were arranged with the Postipankki Pensions Fund during 1998. The pensions of employees of other companies in the Group were taken care of through insurance.

Since the start of 1999, the basic and supplementary pensions of the employees of all companies in the Group have been arranged in a pensions fund whose name has been changed, along with changes in its rules, to Leonia Pension Fund. The arrangement is intended to ensure a uniform level of pensions security in the various companies in the Group.

PREPARATIONS FOR INTRODUCTION OF THE EURO

Leonia began to prepare for the EMU and the euro in 1996. Business and technical preparations took place in 1997 and 1998.

The project's first stage was completed on schedule at the end of 1998, and since the beginning of this year euro-denominated versions of all Since the beginning of 1999, all of Leonia's products have also been available in euros.

ning of this year euro-denominated versions of all of Leonia's products have been available. The project's second stage, in which the full capacity for operating in euros will be ensured, will start in late 1999 and finish in March, 2001.

Leonia's guiding principle is to be flexible in transferring to the euro, while supporting its customers in their transfer to the euro, according to their own requirements and timetable.

PREPARATIONS FOR THE YEAR 2000

Leonia began preparations for the year 2000 in 1996. Leonia's Year 2000 project has been divided into the following sections: information technology, legal aspects, integrated systems, customer risk surveys, and information and stand-by plans. The project is progressing according to plan and resources for its implementation have been allocated. It is estimated that the whole project will cost FIM 59 million, completion being scheduled for June 1999, when Leonia will be fully prepared for the year 2000 in all product sectors.

PROSPECTS FOR THE CURRENT FINANCIAL YEAR

Low interest rates and competition in the financial sector restrict possibilities for increasing income.

However, expenses are estimated to decrease as a result of the Group's development programme. To improve profitability, particular attention will continue to be paid to cost effectiveness.

It is estimated that Leonia Group's profit in the current year will not differ substantially from the profit for 1998.

LEONIA BANK GROUP

RESULTS

The profit of Leonia Bank Group developed favourably in 1998. The Group's operating profit was FIM 775 million, which is FIM 107 million up on the previous year.

The improved performance derived from income growth which, calculated in markkas, was triple the increase in operating expenses. Provisions for bad and doubtful debts increased, but remained at a low level.

The net income from financial operations in Leonia Bank Group was FIM 2,195 million. Due to growth in domestic lending, net income from financial operations remained at nearly the level of the previous year, despite the narrowing of interest margins due to lower interest rates and the considerable contraction in the money market items.

The profit for 1999 will not differ substantially from that of the previous year. Margins in lending to customers shrank a little. Arising from the contribution to the deposit protection fund included in interest payable, the net interest income fell by FIM 53 million.

The net income from securities transactions was FIM 33 million. Income from transactions in equity shares was FIM 78 million, most of it being dealing profits. Trading in debt securities produced a net loss of FIM 46 million. This resulted from FIM 60 million in dealing profits and FIM 26 million in profits arising from mark-to-market valuation of debt securities, offset by losses from derivative contracts totalling FIM 132 million, of which one half were valuation losses. In accordance with the new accounting practice regulated by the Financial Supervision Authority, interests on interest rate contracts treated as hedges for trading debt securities and on contracts used in trading, which were earlier included in the net income from financial operations, are now included in the net income from transactions in debt securities. Interests on debt securities are entered in the net income from financial operations. In addition, in 1998 the accounting practice has been changed to allow the securities held for trading purposes to be valued at market value, and the resultant profits to be included in the profit and loss account. The comparative figure for the net income from transactions in securities in 1997 showed a loss of FIM 175 million. The net income from foreign exchange dealing was almost as big as in the previous year.

Fees and commissions receivable grew by FIM 66 million to reach FIM 973 million. Fees and commissions for account transactions and payments, for the administration and collection of loans at the risk of Asset Management Company Arsenal Ltd, and for asset management services increased. Fees and commissions for bank guarantees, securities brokerage and securities issues decreased. Fees and commissions payable decreased by FIM 7 million.

Other operating income grew by FIM 43 million to FIM 265 million. Most of this income consisted of property rentals which increased by FIM 15 million mainly due to higher utilisation of premises for lease. This item also includes income of FIM 31 million from the cancellation of a payment of stamp taxes related to bonds. This amount had previously been included in accrued expenses.

Operating expenses and depreciation increased altogether by FIM 91 million to FIM 2,638 million.

Expenses for 1998 included FIM 70 million in one-time charges related to the restructuring of Leonia Bank's foreign branches. The most significant increase in operating expenses was in information technology. FIM 30 million of the costs of transferring to the euro were covered by an earlier provision. Expenses were also incurred in building Leonia Bank's corporate image. Included in the Group's other administrative expenses were payments defined in a co-operation agreement with Finland Post for the use of their service network and amounting to FIM 473 million, a decrease of FIM 78 million on the previous year.

The Bank Group's profit before provisions for bad and doubtful debts improved by a good third, i.e. by FIM 216 million, and was FIM 815 million.

The Group's net figure for provisions for bad and doubtful debts was FIM 63 million. New write-offs and provisions of FIM 147 million were made, of which FIM 40 million constituted countryspecific provisions for exposures in Thailand and Pakistan. Recoveries from previous write-offs totalled FIM 84 million . In 1997, recoveries had been FIM 54 million greater than write-offs during the year.

Leonia Bank Group's non-performing and other non-interestearning loans and advances decreased during the year by FIM 82 million, totalling FIM 567 million at the end of the year. FIM 118 million of this amount was in non-interest-earning loans and advances.

A liability deficit of FIM 61 million to the pension fund, originating from earlier years, was covered during the financial year. The item has been dealt with as an extraordinary expense. Consequently, the pension fund now has no uncovered pension liabilities.

CAPITAL ADEQUACY

Leonia Bank Group's capital adequacy ratio was 11.1% at the end of the year, whereas at the end of 1997 it had been 9.5%. The Tier 1 ratio of total capital to risk-weighted assets was 7.9%, compared with 5.7% a year earlier.

At the end of the year, Leonia Bank's Tier 1 capital stood at FIM 5,458 million and its total capital at FIM 7,651 million. During the year, Tier 1 capital increased by FIM 1,230 million. FIM 661 million of the increase consisted of the net profit for the financial year. An addition of preferred capital notes increased Tier 1 capital by FIM 560 million. In March, the Bank issued preferred capital notes included in Tier 1 capital, of which Leonia Corporate Bank subscribed for FIM 500 million and other investors FIM 60 million.

Leonia Bank's risk-weighted assets were FIM 69.1 billion at the end of the year. During the year, they decreased by FIM 4.9 billion, despite a considerable increase in lending. The reduction was due to a significant decrease in the volume of investment operations. The risk-weighted amount of guarantees and other off-balance sheet items declined by FIM 1.2 billion.

The Bank's commitments are also backed by a state guarantee for up to half the combined amount of the Bank's Tier 1 and Tier 2 capital in the terms of the Credit Institutions Act. Should the Bank's total assets be insufficient to meet its commitments, the state will take responsibility for meeting them, up to the guaranteed amount (Postipankki Act, Section 7).

BALANCE SHEET

Leonia Bank Group's total assets contracted by FIM 15.0 billion, a reduction of 12%, to stand at FIM 110.3 billion at the end of the year. Loans and advances to customers rose by about 15%. On the other hand, market investments and funding from the money and capital markets decreased by over one third. This was mainly the result of relocating the treasury operations of the London and New York branches to Helsinki.

Lending and Investments

With strong credit demand continuing, Leonia Bank Group's loans and advances to customers rose during the year by FIM 7.9 billion. The Bank's loans to households grew by 12% to FIM 25.0 billion. New home loans increased by about 70% on the previous year. As a result, the total amount of home loans grew by FIM 2.6 billion during the year to reach FIM 18.0 billion.

Markka-denominated loans and advances to companies and institutions increased by one quarter and one fifth respectively. The Bank's foreign-exchange-denominated loans grew by more than a tenth. The Bank's investments in domestic bonds and notes increased substantially, totalling FIM 14.0 billion at the end of the year. At the same time investments in foreign bonds and notes fell, due principally to the restructuring of the Bank's foreign operations. In this connection, the Bank sold the New York branch's investment portfolio of collateralised mortgage obligations (CMOs) amounting to FIM 1.5 billion.

Funding

Liabilities to customers stood at FIM 54.4 billion at the end of the year, which was FIM 1.1 billion less than at the beginning of the year. Of these liabilities, total customer deposits in Leonia Bank's savings, current and deposit accounts increased by over a billion markkas, or 3%. Deposits grew substantially in investment accounts, but decreased in savings accounts. Deposits in bank giro accounts increased to some extent, compared with the end of the previous year – also when calculated by average daily balances for the whole year. Funds in foreign currency accounts decreased considerably during the year.

Leonia Bank Group's liabilities to credit institutions and central banks fell by FIM 13.5 billion, with a particularly steep decline in funding from foreign markets. Bond and note funding from the markets increased a little.

Leonia Bank plc's Debt Rating

	Short-term	Long-term
	Funding	Funding
Fitch IBCA	F1	A+
Moody's Investors Service	P-1	A1
Standard & Poor's	A-2	A-
Thomson BankWatch	TBW-1	A+

At the end of October, Standards & Poor's raised the Bank's long term debt rating from BBB+ to A–. The rating agency justified the change on the Bank's strong position in the domestic consumer and corporate customer markets and in payments, as well as its improved potential as a part of Leonia Group. In addition, the debt rating agency referred to the Bank's stronger capital structure and profitability and the improved quality of the loan portfolio.

ADMINISTRATION

The Act governing the Postipankki Oy was amended by an Act of 5 June 1998 to allow the business name of Postipankki to be defined in the Articles of Association. An extraordinary general meeting of Postipankki on 8 June 1998 decided that the business name of Postipankki plc would be recorded in the Articles of Association as Leonia Pankki Oyj in Finnish, Leonia Bank Abp in Swedish and Leonia Bank plc in English. The change in the Articles of Association was filed in the Trade Register on 9 June1998.

The Annual General Meeting on 5 March 1998 re-elected Mari Kiviniemi, Antti Paasio and Anssi Rauramo, who had resigned by rotation, to the Supervisory Board of Leonia Bank for a term of 3 years. Ann-Sofi Hurme was elected for a term of three years, to replace Gustav Björkstrand, who resigned by rotation. Pekka Vennamo, having requested release from the duties of membership of the Supervisory Board, was replaced by Asko Saviaho for the remainder of his term, i.e. until the close of the Annual General Meeting in 2000.

On 1 April 1998, the Supervisory Board elected Anssi Rauramo as Chairman and Antti Paasio as Vice Chairman. The other members of the Supervisory Board were Tuulikki Kannisto, Jarmo Kilpelä, Raimo Liikkanen, Juhani Nyyssönen, Maija Perho, Jarmo Rantanen, Pertti Valtonen and Jukka Wuolijoki.

Leonia plc's Chief Executive Harri Hollmén is acting as Chairman of the Board of Management of Leonia Bank while President Pentti Hakkarainen is acting as Vice Chairman. At a meeting on 25 February 1998, the Supervisory Board accepted the resignations of Peter Johansson and Eero Tuomainen from the Board of Management upon their transfer to the management of the Group's parent company on 1 March 1998, and appointed Ilkka Hallavo as Executive Vice President with effect from 1 June 1998, when Juhani Paloheimo retired. At the same meeting, Jukka Räihä was appointed a member of the Board of Management from 1 April 1998. At a meeting held on 12 August 1998, the Supervisory Board appointed Leonia Corporate Bank's President Orvo Siimestö as a member of the Board of Management. The other members of the Board of Management were Matti Inha, Maarit Näkyvä and Jussi Osola.

The Annual General Meeting elected Tilintarkastajien Oy – Ernst & Young, Authorised Public Accountants, as the auditors of Leonia Bank, with Jorma Jäske APA as the responsible auditor, assisted by Kunto Pekkala APA and Pekka Räisänen APA. Mikael Holmström APA was elected deputy auditor.

STAFF

The staff of the Leonia Bank Group averaged 4,825, which was 439 fewer than in the previous year. At the end of the year, the staff numbered 4,457, representing a reduction of 631 from the previous year. At the end of the year, there were 4,244 full-time permanent employees and 213 part-time or fixed-term employees.

The greatest reductions in staff occurred in the payments function and administration. Overlapping operations in Group companies were trimmed back and administrative services were out-sourced. There were also reductions in the staff working abroad.

PROSPECTS FOR THE CURRENT FINANCIAL YEAR

Stiffening competition in the financial sector and generally lower levels of interest will act to reduce Leonia Bank's income. Recent years have seen provisions for bad and doubtful debts at an exceptionally low level. However, these are expected to increase to some extent, despite the good economic situation. The Bank aims to maintain income by increasing business, particularly in consumer and corporate services. The aim is also to preserve the profitability structure by making further improvements in cost effectiveness.

It is estimated that the Leonia Bank Group's profit in the current year will be at about the same level as in 1998.

LEONIA BANK'S OFFICES AND PRINCIPAL SUBSIDIARY UNDERTAKINGS

At the end of the year, Leonia bank had a network of 63 branches servicing retail customers, 22 branches servicing corporate customers and five units for private banking. The number of post offices providing banking services was 477.

The international network of the Bank comprised branches in London and New York and representative offices in Moscow, Tallinn, Tokyo and Stockholm. The Singapore Branch was closed in the summer of 1998.

Leonia Finance Ltd

Leonia Finance Ltd's operating profit was FIM 42 million in 1998, compared with FIM 31 million in the previous year. The company has been able to compensate the narrowing of financial margins with a significant increase in business, though profit has also been partly improved by one-off profits from sales of equities.

The company's total assets increased by 35% to FIM 3.3 billion. The large increase in loans reduced the capital adequacy ratio to 8.7%. The staff averaged 110 during the year.

Leonia Municipality Bank plc

At the end of the year, the operating profit of Leonia Municipality Bank plc remained at the level of the previous year, standing at FIM 16 million.

Total assets declined by 7% to FIM 2.3 billion at the end of the year. Leonia Municipality Bank's capital adequacy ratio was 14.9%. The staff averaged 8 persons.

Leonia Card Ltd

On 13 May 1998, the name of Suomen Tililuotto Oy was changed to Leonia Card Ltd. Leonia Card's outstanding loans have more than doubled from the previous year, mainly due to the merger of Suomen Tilirahoitus Oy with the company on 30 April 1998. Performance was good, with operating profit for the year totalling FIM 23 million.

Due to the merger, total assets more than doubled to FIM 317 million. At the end of the year, the company's capital adequacy ratio was 13.5%, with 42 staff on average.

Tietoleonia Oy

Tietoleonia Oy is an IT services company jointly owned by the Tieto Group and Leonia Bank, which provides IT operating and systems services for the Leonia Group.

The restructuring of Leonia Bank's data management resulted in 33 employees of the Bank being transferred to Tietoleonia at the beginning of July 1998.

The company's net sales were FIM 283 million and its operating profit FIM 20 million. The staff averaged 257.

Leonia MB Group Oy and MB Funds

The Leonia MB Group Oy (formerly MB Finance Group Oy) is a capital investor and special financier. Together with MB Equity Partners Oy, it manages four capital funds, in which the investors include Finnish insurance and pension companies and Leonia Bank plc. The investment resources of Leonia MB Group Oy and MB Funds total about FIM 2.5 billion.

In 1998, the operating profit of Leonia MB Group Oy was FIM 29 million. The company's total assets at the end of the year were FIM 132 million and the capital adequacy ratio 40.1%. The staff averaged 8 during the financial year.

The operating profit of MB Funds totalled FIM 115 million, and total investments including all commitments FIM 379 million. During 1998, Leonia MB Group Oy and MB Funds withdrew from four investments, two of them due to the listing of A-Rakennusmies Oy and Tryckinvest i Norden AB on the Helsinki and Stockholm Stock Exchanges respectively. At the end of the year, MB Funds, together with the management of the company, purchased a majority shareholding in Engel-Yhtymä Oy.

The MB Mezzanine Fund II was established on 24 June 1998, jointly with Leonia Bank and other investors. The fund is the largest mezzanine fund in the Nordic countries, with capital of FIM 1 billion. Leonia MB Group's and Leonia Bank plc's combined share of the capital is FIM 600 million.

Leonia Life Insurance Company Ltd

The share capital of Leonia Life Insurance Company Ltd was raised during 1998, with the result that Leonia Bank owned 90% and Finland Post Ltd 10% on 31 December 1998.

The company's profit from the insurance business was FIM 8 million and its total assets FIM 1.5 billion. Income from premiums fell by 14% from the previous year to FIM 421 million. At the end of 1998, the premium reserve stood at FIM 1.3 billion.

The net yield from the company's investment operations grew by 57% to FIM 59 million. During the year, the company had an average staff of 16 employees.

PSW Realty World Ltd

PSW Realty World Ltd's operating profit was FIM 1.6 million and the total assets FIM 6 million. During the financial year, the company's average staff was 7.

At the end of the year, PSW Realty World's franchising chain comprised 52 enterprises, which carried on realty operations in 59 sales outlets.

Leonia Bank's Fund Management Companies

The Leonia Fund Management Company Ltd and the PSP Fund Management Company Ltd are Leonia Bank's subsidiaries, which manage investment funds. Finland Post Ltd owns a 1/3 minority in the Leonia Fund Management Company Ltd.

The companies manage a total of 11 funds and have a combined 8% market share of mutual funds registered in Finland. The total assets of the funds at the end of the year were FIM 2.4 billion, while the companies had more than 23,000 unit holders.

LEONIA CORPORATE BANK

RESULTS

Leonia Corporate Bank's operating profit was FIM 370 million, which was up FIM 90 million on the previous year. The most significant contributors to improved profit were the profit on the sale of equity shares and the positive change in provisions for bad and doubtful debts.

Net income from financial operations was almost at the level of 1997, although the balance sheet was considerably lightened by restructuring within the Group.

The net income from securities transactions was FIM 89 million, compared with FIM 67 million in the previous year. This was the result of a net income of FIM 65 million from equities trading and a net income of FIM 24 million from transactions in debt securities. The realised net income from securities transactions totalled FIM 69 million. Valuation gains from debt securities were FIM 54 million, resulting from a change in accounting practice at the beginning of the year, according to which the profits arising from valuation of the trading securities on a mark-to-market basis are included in the profit and loss account. Profits of FIM 71 million were gained from the sale of equity shares.

Operating expenses and depreciation totalled FIM 108 million, which was 5% lower than in the previous year.

Provisions for bad and doubtful debts gave an income of FIM 10 million, as FIM 25 million was released from provisions made in earlier years, while only FIM 15 million in new write-offs and provisions were made during the year. In the previous year, write-offs had been FIM 47 million.

The amount of non-performing and other non-interest-earning loans and advances was FIM 80 million at the end of the year.

CAPITAL ADEQUACY

Leonia Corporate Bank plc's capital adequacy ratio at the end of the year was 32.0%. The Tier 1 ratio of total capital to risk-weighted assets was 28.6%. At the end of 1997, the capital adequacy ratio had been 26.7% and the Tier 1 ratio 22.9%.

At the end of the year, Leonia Corporate Bank plc's Tier 1 capital totalled FIM 4,273 million and total capital FIM 4,780 million. Tier 1 capital increased during the year by FIM 44 million. Total capital decreased by FIM 157 million, due to Tier 2 capital being reduced by FIM 201 million.

Leonia Corporate Bank plc's risk-weighted assets totalled FIM 14.9 billion at the end of the year. The decrease compared with the previous year was FIM 3.5 billion, which resulted from a reduction of the balance sheet, largely in investments. Preferred capital notes issued by Leonia Bank plc are included in Leonia Corporate Bank plc's risk-weighted assets amount to FIM 1.2 billion.

BALANCE SHEET

Leonia Corporate bank's total assets at the end of the year were FIM 40.8 billion. The corresponding figure at the end of the previous year was FIM 54.9 billion. The balance sheet was reduced by the concentration of Group funding and trading operations in Leonia Bank and the consequent reduction in liquidity.

Debt securities fell by FIM 8.4 billion and stood at FIM 17.7 billion at the end of the year. Of this amount, markka-denominated debt securities eligible for refinancing with the Central bank and issued by the Finnish government, Bank of Finland and domestic banks, totalled FIM 2.3 billion at the end of the year.

Loans and advances to customers were FIM 17.3 billion, compared with FIM 20.2 billion one year earlier. Loans and advances to credit institutions contracted by FIM 2.6 billion to reach a level of FIM 2.8 billion.

The loans outstanding were FIM 18.3 billion, compared with FIM 21.5 billion one year earlier. The reduction in loan portfolio was due to a procedure adopted in the Leonia Group in 1998 to enter new loans principally in the balance sheet of Leonia Bank.

Bond and note funding was FIM 30.1 billion at the end of the year, compared with FIM 44.4 billion at the end of the previous year. Total short-term borrowings diminished from FIM 9.0 billion to FIM 5.1 billion. Long-term debts decreased by FIM 9.5 billion, standing at FIM 27.8 billion at year-end.

Leonia Corporate Bank plc's Debt Ratings at 15 February 1999

	Short-term	Long-term
	Funding	Funding
Moody's Investors Service	P-1	A1
Standard & Poor's	A1+	AA-

The Moody's rating agency confirmed in May that Leonia Corporate Bank's long term debt rating would be re-classified as Aa3, instead of the previous Aa1, and on 15 February 1999, further from Aa3 to A1. Moody's justified the changes on the Leonia Corporate Bank's position as a part of Leonia Group, and on the fact that, in addition to the export credits secured by government, the company will also, according to the new strategy, record loans to large business customers, which tends to increase the company's risk profile.

In October Standard & Poor's changed its views within the rating given to Leonia Corporate Bank from stable to negative.

ADMINISTRATION

On 8 June 1998, the business name of Suomen Vientiluotto Oyj (Finnish Export Credit) was changed to Leonia Yrityspankki Oyj, finally becoming Leonia Corporate Bank plc on 29 December 1998.

Since 1 May 1998, Orvo Siimestö has been the company's President. Antti Lehtinen, who had held the post of President since 1983, resigned from these duties on 10 February 1998. During the interim period, from 10 February to 30 April 1998, the President was Tomi Dahlberg. At the start of the financial year, the Board of Directors of the company comprised Harri Hollmén, Chairman; Markku Mäkinen, Vice Chairman; and Raine Vairimaa. At the Annual General Meetings on 24 February 1998 and on 12 August 1998, Orvo Siimestö and Pentti Hakkarainen respectively were elected as members. Markku Mäkinen and Raine Vairimaa resigned from the company's Board of Directors on 29 September 1998. An extraordinary general meeting of the company on 22 December 1998 elected Matti Virtanen and Matti Copeland as new members of the Board of Directors.

The Annual General Meeting held on 24 February 1998 elected Pekka Luoma APA and Erkka Talvinko APA as auditors of the company, with Tilintarkastajien Oy – Ernst & Young, Authorised Public Accountants, as the deputy auditors, with Päivi Virtanen APA as the responsible auditor, assisted by Marja Tikka APA.

The terms of office of the members of the Board and of the auditors end at the conclusion of the 1999 Annual General Meeting.

STAFE

Leonia Corporate Bank had an average staff of 103 persons, which was 45 less than during the previous year. At the end of the year, the staff numbered 78, i.e., 58 less than a year ago. At the end of the year, there were 75 full-time, permanent employees and 3 part-time or fixed term employees.

FOREIGN OFFICES

At the end of the year, the company had a representative office in Singapore. An office that had operated in conjunction with the consulate general in Hong Kong was closed on 31 August 1998.

IMPORTANT EVENTS SINCE THE END OF THE FINANCIAL YEAR

Leonia Corporate Bank adopted the euro as a basic accounting currency on 1 January 1999. During the transition period, from 1 January 1999 to 31 December 2001, the financial accounts will be in both markkas and euros.

The Board of Directors of Leonia plc approved in February 1999 a proposal of Leonia Corporate Bank to change its operating principles. As of March, the company has had its own Credit Committee, and Asset & Liability Management Committee, which have begun to independently perform the duties that were previously handled by Asset & Liability Committees jointly set up by the company and Leonia Bank. In 1999, the majority of the loans granted by Leonia Corporate Bank will be written in the company's own balance sheet, in a change from the procedure followed in 1998.

PROSPECTS FOR THE CURRENT FINANCIAL YEAR

It is estimated that Leonia Corporate Bank's financial income and fees and commissions arising from operational activities will remain at the level already achieved. As no significant non-recurring realisation profits are to be expected during the financial year, the profit for 1999 will be weaker than in the previous year.

LEONIA PLC BOARD OF DIRECTORS' PROPOSAL TO THE ANNUAL GENERAL MEETING FOR THE DISTRIBUTION OF THE PROFITS OF THE PARENT COMPANY

According to the consolidated balance sheet, the Group's distributable capital totalled FIM 3,543,331,152.49 at 31 December 1998, of which FIM 770,970,212.40 consisted of items transferred from untaxed reserves to capital and reserves. The distributable capital of the parent company was FIM 2,913,282,286.26, which comprised:

Profit for the financial year	FIM 283,282,286.26
Distributable reserves	FIM 2,630,000,000.00
Distributable capital at 31 Dec. 1998	FIM 2,913,282,286.26

We propose that dividends totalling FIM 230,000,000.00, i.e. 17.9 per cent, be distributed.

We propose that the remainder of the profits for the financial year be retained in distributable capital, making a total of FIM 2,683,282,286.26, including distributable reserves.

Helsinki, 16 February, 1999

TO LEONIA PLC'S SHAREHOLDERS

We have audited Leonia plc's bookkeeping, annual accounts and administration for the financial year 1 January – 31 December, 1998. The annual accounts prepared by the Board of Directors and the President include a report on operations and the consolidated and parent company's profit and loss accounts, balance sheets and notes to the accounts. On the basis of our audit, we hereby issue a statement on the annual accounts and administration.

The audit was conducted in accordance with generally accepted auditing standards. The bookkeeping, and the accounting policies, content and presentation of the annual accounts, were thus examined to a sufficient extent to confirm that the accounts do not contain essential errors or shortcomings. In the audit of administration, the legality of the activities of the members of the Board of Directors and of the President was studied on the basis of the provisions of the Companies Act and the Act on Credit Institutions.

We state that the annual accounts have been drawn up in accordance with the Bookkeeping Act and other rules and regulations concerning the compilation of annual accounts. The annual accounts give a true and fair view of the results and financial position of the Group and the parent company in the manner referred to in the Bookkeeping Act. We have studied the interim reports published during the financial year. In our opinion, the interim reports were drawn up in accordance with the relevant provisions. The annual accounts and consolidated accounts can be approved, and discharge from liability can be granted to the members of the parent company's Board of Directors and the President for the financial year audited by us. The proposal by the Board of Directors regarding the disposition of the profit for the year, as outlined in the annual report, is in compliance with the Companies Act.

LEONIA BANK PLC BOARD OF MANAGEMENT'S PROPOSAL TO THE ANNUAL GENERAL MEETING FOR THE DISTRIBUTION OF THE PROFITS OF THE PARENT COMPANY

According to the consolidated balance sheet, the Group's distributable capital totalled FIM 2,082,651,201.84, at 31 December 1998, of which FIM 430,410,212.40 consisted of items transferred from untaxed reserves to capital and reserves.

The parent company's distributable capital was FIM 1,537,411,159.72, which comprised:

Profit for the financial year	FIM 637,072,430.59
Profit brought forward	FIM 900,338,729.13
Distributable capital at 31 Dec. 1998	FIM 1,537,411,159.72

We propose that no dividend be distributed and that the profit for the financial year be retained in distributable capital.

TO LEONIA BANK PLC'S SHAREHOLDERS

We have audited Leonia Bank plc's bookkeeping, annual accounts and administration for the financial year 1 January – 31 December, 1998. The annual accounts prepared by the Board of Management and the President and approved by the Supervisory Board include a report on operations and the consolidated and parent company's profit and loss accounts, balance sheets and notes to the accounts. On the basis of our audit, we hereby issue a statement on the annual accounts and the Bank's administration.

The audit was conducted in accordance with generally accepted auditing standards. The bookkeeping, and the accounting policies, content and presentation of the annual accounts, were thus examined to a sufficient extent to confirm that the accounts do not contain essential errors or shortcomings. In the audit of administration, the legality of the activities of the members of the Bank's Supervisory Board and Board of Management and of the President was studied on the basis of the provisions of the Companies Act, the Act on Postipankki Ltd and the Act on Credit Institutions.

We state that the annual accounts have been drawn up in accordance with the Bookkeeping Act and other rules and regulations concerning the compilation of annual accounts. The annual accounts give a true and fair view of the results and financial position of the Group and the parent company in the manner referred to in the Bookkeeping Act. We have studied the interim reports published during the financial year. In our opinion, the interim reports were drawn up in accordance with the relevant provisions. The annual accounts and consolidated accounts can be approved, and discharge from liability can be granted to the members of the Bank's Supervisory Board, the Chairman of the Board of Management, the President and Executive Vice President, plus other members of the Board of Management for the financial year audited by us. The proposal by the Board of Management regarding the disposition of the profit for the year, as outlined in the annual report, is in compliance with the Companies Act.

TO LEONIA CORPORATE BANK PLC'S SHAREHOLDERS

We have audited Leonia Corporate Bank plc's bookkeeping, annual accounts and administration for the financial year 1 January – 31 December, 1998. The annual accounts prepared by the Board of Directors and the President include a report on operations, the profit and loss accounts, balance sheet and notes to the accounts. On the basis of our audit, we hereby issue a statement on the annual accounts and administration.

The audit was conducted in accordance with generally accepted auditing standards. The bookkeeping, and the accounting policies, content and presentation of the annual accounts, were thus examined to a sufficient extent to confirm that the accounts do not contain essential errors or shortcomings. In the audit of administration, the legality of the activities of the members of the Board of Directors and of the President was studied on the basis of the provisions of the Companies Act and the Act on Credit Institutions.

We state that the annual accounts have been drawn up in accordance with the Bookkeeping Act and other rules and regulations concerning the compilation of annual accounts. The annual accounts give a true and fair view of the results and financial position of the company in the manner referred to in the Bookkeeping Act. We have studied the interim reports published during the financial year. In our opinion, the interim reports were drawn up in accordance with the relevant provisions. The annual accounts can be approved, and discharge from liability can be granted to the members of the Board of Directors and the President for the financial year audited by us. The proposal by the Board of Directors regarding the disposition of the profit for the year, as outlined in the annual report, is in compliance with the Companies Act.

Helsinki, 25 February, 1999

NOTES TO THE ACCOUNTS

ACCOUNTING POLICIES

The annual accounts and Group accounts of Finnish financial institutions are prepared in accordance with the provisions of Article 4 of the Act on Credit Institutions, the Decision of the Ministry of Finance concerning annual accounts and Group accounts of financial institutions and investment services companies (30 December 1997/1376), and the regulations of the Finnish Financial Supervision on annual accounts and Group accounts of financial institutions. The regulations of the Financial Supervision meet the requirements of the Fourth Council directive(78/660/ EEC) and the Seventh Council directive (83/349/EEC), and the Council directive on the annual accounts and consolidated accounts of banks and other financial institutions (86/635/EEC). In addition, the provisions of the Accounting Act and Companies Act are followed, with the exceptions mentioned in the Act on Credit Institutions, 30:2 §.

The annual accounts and Group and sub-Group accounts of Leonia plc and its subsidiary undertakings, either directly or indirectly owned, have been drawn up according to the provisions mentioned above and the following accounting policies.

SCOPE OF CONSOLIDATION

The Group accounts include the accounts of Leonia plc and all its domestic and foreign subsidiary and associated undertakings, either directly or indirectly owned.

Companies of whose equity voting rights the Group holds more than 50 per cent, either directly or indirectly, have been treated as subsidiary undertakings. Companies of whose equity voting rights the Group owns 20-50 per cent are treated as associated undertakings.

Subsidiary and associated undertakings with a balance sheet total under FIM 60 million and no material effect on the financial position and distributable capital and reserves of the Group have been excluded from consolidation. In addition, two other subsidiary undertakings, which are property companies and have been acquired in settlement of problem loans, have, with the permission of the Financial Supervision Authority, been excluded from consolidation.

Details of the subsidiary and associated undertakings included in the Group accounts are given in Note 44.

BASIS OF CONSOLIDATION

The accounts of subsidiary undertakings which are credit and financial institutions and those of subsidiaries engaged in investment fund operations and activities ancillary to banking have been consolidated in full. All intra-group transactions including distribution of profits and debts and claims have been eliminated.

The accounts of Leonia Bank plc ja Leonia Corporate Bank plc have been consolidated by using the pooling method of accounting, in which the assets and liabilities, and income and expenditure of the companies have been brought into the Group accounts at book value. The intra-group holdings in the Leonia Bank Group have been eliminated, using the acquisition method of accounting, against the capital and reserves at the date of acquisition. The differences arising from elimination are entered under relevant balance sheet items or treated as goodwill, which is amortised on a straight-line basis over a period of 10 years. In the consolidated balance sheet, the untaxed reserves in the accounts of the individual Group undertakings, including the depreciation in excess of or less than plan, have been divided and included in the capital and reserves and in deferred tax liability. In the consolidated profit and loss account, correspondingly, the changes in the untaxed reserves have been divided and included in the profit for the financial year and the change in the deferred tax liability. If a Group undertaking has recorded losses which can be used for balancing losses in taxation, the deferred tax liability has been calculated only to the extent that the untaxed reserves exceed the amount of the confirmed losses. In accordance with the Companies Act, the untaxed reserves and depreciation difference included in the capital and reserves cannot be taken into account in calculating the maximum amount of the distributable profit

The minority interests in the capital and reserves and profits and losses of the subsidiary undertakings are disclosed separately in the consolidated balance sheet and profit and loss account, respectively.

The accounts of the other subsidiary and associated undertakings have been dealt with by using the equity method of accounting and the Group's share of the results of these companies is shown separately in the consolidated profit and loss account. When calculating the profit or loss of these companies, the change in the untaxed reserves and depreciation difference less the change in the deferred tax liability has been taken into account.

ITEMS IN FOREIGN CURRENCIES

The assets, liabilities and off-balance sheet items of the Group companies denominated in foreign currencies and the accounts of the foreign subsidiaries have been translated into Finnish markkas at the Bank of Finland's middle rate ruling on the balance sheet date. Assets and liabilities hedged by a currency swap are stated at the rate of the original currency. Exchange rate differences arising from valuation are included in Net income from foreign exchange dealing. Exchange rate differences arising from consolidation are included in Capital and reserves.

ASSETS AND LIABILITIES

Loans and advances, as well as liabilities, are stated in the balance sheet at the value paid or received on them at the time of acquisition, adjusted for the amortisation of premiums and discounts arising on acquisition. In the profit and loss account, the amortisation of premiums and discounts is accrued as interest receivable or interest payable over the life of the contract.

If the probable value of a loan or advance is estimated at lower than the book value, the loan or advance has been stated in the balance sheet at this estimated value.

The items Other assets and Prepayments and accrued income, and Other liabilities and Accruals and deferred income in the balance sheet have been stated at their nominal value.

Derivative contracts have been treated in the balance sheet as shown in Off-balance sheet items and derivative contracts.

LEASE ASSETS

Lease assets are stated in the balance sheet at cost less depreciation according to plan. The depreciation is stated at the amount of recovered capital from lease rentals. In the consolidated profit and loss account, the lease rentals less depreciation according to plan is included in Interest receivable. The additional depreciation, which is actually write-downs of lease assets, is included in Provisions for bad and doubtful debts. Other income from and expenses on lease assets are included in the item corresponding to their nature.

In the profit and loss accounts of individual Group companies, Net income from leasing activities includes additional depreciation and profits and losses on disposal of lease assets, fees and commissions, as well as other income and expenses relating to leasing activities.

SECURITIES

Securities are classified as securities held for trading purposes and those held as financial fixed assets, the bases for classification being defined as is explained below.

The premiums and discounts arising on the acquisition of debt securities, if material, have been amortised or accreted over the life of the contract and included in Interest receivable. The cost of the security is adjusted to reflect the amortisation or accretion of the premiums and discounts.

Securities held for trading purposes

Securities held for trading purposes consist of treasury bills and other eligible bills, debt securities and equity shares which are included in the trading book, and of other securities held for trading.

Securities included in the trading book have been stated at market value, and other securities held for trading purposes at the lower of cost and market value.

The market value of listed securities is the last transaction price on the balance sheet date. The estimated market value of unlisted debt securities is the net present value of future cash flows discounted at the current market rate, while equity shares are stated at the lower of cost and market value. The unrealised profits and losses arising from valuation of the securities held for trading purposes are included in Net income from transactions in securities.

Securities held as financial fixed assets

Securities held as financial fixed assets consist of treasury bills and other eligible bills and debt securities acquired with the intention of holding them until maturity. In addition, shares and participations in companies needed in order to acquire services ancillary to banking, and in subsidiary and associated undertakings, are treated as securities held as financial fixed assets.

Securities held as financial fixed assets are stated at cost less any permanent diminution in value. The permanent diminution in value of these securities is shown separately in the profit and loss account under the heading Write-offs in respect of securities held as financial fixed assets. The item also includes the potential write-backs of these securities.

AGREEMENTS FOR SALE AND REPURCHASE OF SECURI-TIES, AND SECURITIES LENDING

Securities which are sold or purchased under commitments to resell or repurchase them, or lent securities, are included in the original balance sheet item irrespective of the contract.

The purchase price is treated as a loan and the selling price as a liability in the balance sheet item which is relevant to each counterparty. The difference between the resell price and the purchase price of a purchased security is treated as interest receivable and accrued income over the life of the contract. Conversely, the difference between the repurchase price and the sale price is treated as interest payable and accruals over the life of the contract. Securities lending is not recorded in the balance sheet.

TANGIBLE AND INTANGIBLE ASSETS

The shares and participations in property companies are stated at cost, less any permanent diminution in value in the balance sheet.

Properties are stated at cost, less depreciation according to plan. The cost includes the direct expenses of purchase and improvements in properties.

Other tangible and intangible assets are stated at cost, less depreciation according to plan.

The depreciation plan is made on a uniform basis within the Group based on the estimated useful economic life of the items. Buildings and constructions are depreciated on a straightline basis over a period of 20-40 years and equipment over 4-10 years. Intangible assets are depreciated over their estimated useful economic life.

If there have been permanent diminutions in the values of tangible and intangible assets on the balance sheet date, the amounts have been charged to the profit and loss account.

Valuation principles and methods relating to properties, and shares and participations in property companies

Properties, and shares and participations in property companies, are classified as those occupied for the Group's own activities and those for other activities. If only a part is occupied for the Group's own activities, the classification is made in relation to the square metres occupied.

The fair values of properties are reviewed quarterly. The assessment of the values of properties occupied for other than the Group's own activities is based on the net rental income received or that can potentially be received as well as the rates of interest applied in property markets. The values of properties occupied for the Group's own activities are assessed on the basis of rentals which can potentially be received, assuming that a property is used for similar purposes. In assessing the values of properties, location, use and particular characteristics, as well as potential increase in value, have been taken into account. In addition, statistical data and forecasts for the property markets have been used. The write-downs of values are based on the permanency and materiality of the diminution.

No revaluations have been made in the book values of the properties, and shares and participations in property companies.

PROVISIONS FOR LIABILITIES AND CHARGES, AND UNTAXED RESERVES

Provisions for liabilities and charges

Provisions for liabilities and charges stated in the balance sheet include future specifiable charges which are probable or likely to occur, but whose amount and date of occurrence are still unknown.

Provisions made for certain balance sheet items have been deducted from the item in question.

Untaxed reserves

Untaxed reserves are used in planning the accounts and taxation of companies. The amount of the untaxed reserves or changes in it do not reflect the risk in the Group. The reserves shown in the accounts of the individual Group companies are presented without deducting the deferred tax liability arising from them. In the Group accounts the untaxed reserves have been treated as shown in Basis of consolidation.

PROVISIONS FOR BAD AND DOUBTFUL DEBTS

Provisions for bad and doubtful debts consist of specific provisions made for loans and advances to credit institutions and customers, and for contingent liabilities and commitments and amounts written off these items. The amount also includes the unrealised losses arising from valuation of the assets acquired in settlement of unpaid loans, and the losses on the sale of such assets. In addition, in the Group accounts, the additional depreciation on lease assets is included in Provisions for bad and doubtful debts.

A specific provision can be made against an individual loan or, with the permission of the Financial Supervision Authority, against a certain group of loans pooled by customers or by countries. A specific provision is made when it is considered that recovery is doubtful and the estimated sales value of the asset pledged as collateral security does not cover the principal of the loan. The loans classified as bad debts are written off when the authorities have confirmed the insolvency of a customer. In assessing the amount of a provision, the assets pledged as collateral have been valued at their fair values.

Recoveries of loans and advances and other items previously written off, releases of provisions, and profits on the sale of assets acquired in settlement of unpaid loans have been deducted from Provisions for bad and doubtful debts.

Under Finnish regulations, general provisions and allowances used to describe the accumulated balance sheet amount created by bad debt provisions and held against the value of loans and advances are not made.

NON-PERFORMING LOANS AND OTHER NON-INTEREST EARNING LENDINGS

Loans are regarded as non-performing if either the principal or the interest on a loan become overdue by 90 days. Loans to companies declared bankrupt are classified as non-performing on the date that the bankruptcy is declared. Bank guarantees are treated as non-performing when the bank has made a payment on the basis of a guarantee. Unpaid interest on loans recorded as nonperforming is not accrued, except for loans to public sector customers or loans which are secured by a public body. In respect of leased assets, the cost less depreciation according to plan is recognised as non-performing when a rental becomes overdue by 90 days.

Other non-interest earning lendings comprise loans from which no income of any kind will be received, based on agreement with customers. Under Finnish regulations, such loans and advances are presented under the item non-performing loans.

OFF-BALANCE SHEET ITEMS AND DERIVATIVE CONTRACTS

Off-balance sheet items

Off-balance sheet items consist of contingent liabilities and commitments. Contingent liabilities comprise transactions in which companies have underwritten the obligations of third parties, including guarantees and assets pledged as collateral security. Commitments consist of irrevocable commitments such as sale and option-to-resell transactions, underwriting commitments, undrawn formal standby facilities, credit lines and other commitments to lend.

Contingent liabilities are recorded to the extent that the obligation in respect of a guarantee or an asset pledged is met on the balance sheet date. The commitments are stated at the maximum amount that can be required to be paid on the basis of the commitment.

Derivative contracts

Most derivative contracts are made for trading purposes and marked to market. The resultant profits and losses are included in Net income from transactions in securities and foreign exchange dealing.

Derivative contracts which are accounted for as hedges are mainly used for specific hedging and treated in the accounts in accordance with the treatment of hedged contracts. Interest on interest rate contracts, hedging loans and advances, liabilities and debt securities held as financial fixed assets are included in Net income from financial operations. Profits and losses on derivative contracts that are used for hedging securities held for trading purposes are included in Net income from transactions in securities and foreign exchange dealing.

In Note 3, Net income from securities transactions, the item Net income from transactions in debt securities includes the profits and losses on interest rate contracts, while the profits and losses on equity contracts are included in Net income from transactions in equity shares. Profits and losses on exchange rate contracts are included in Net income from foreign exchange dealing.

Assets and liabilities arising from derivative contracts are presented in Other assets and Other liabilities in the balance sheet.

CHANGES IN ACCOUNTING REGULATIONS IN 1998

Debt securities which are eligible for refinancing with the Bank of Finland are presented as a separate item Treasury bills and other eligible bills in the balance sheet.

Securities including in the trading book are marked to market and the resultant profits and losses are included in Net income from transactions in securities.

Assets and liabilities arising from derivative contracts are presented in Other assets and Other liabilities in the balance sheet.

Interest on interest rate contracts, hedging loans and advances, liabilities and debt securities held as financial fixed assets are included in Net income from financial operations. Interest on interest rate contracts, hedging debt securities held for trading purposes and on those used in trading are included in Net income from transactions in securities.

Other staff-related costs (i.e. other than social security costs, either statutory or voluntary) have been transferred from staff costs to other administrative expenses.

Profits and losses on disposals of properties, and shares and participations in property companies occupied for the Group's own activities are included in Other operating income and Other operating expenses, respectively.

The figures for 1997 have been restated to reflect the structural changes required in the regulations of 1998.

The capital employed is the cost less depreciation or a diminution in value added by the Group's share of liabilities relating to the shares held in property companies and/or the share of the debts of these companies. The percentage of the surplus property is the ratio of unoccupied properties to all properties which can be leased out. Unoccupied properties are properties which can be leased out, but which yield no rental income based on a lease on the balance sheet date. The net income has been calculated by deducting the property costs of the leased and unleased properties, calculated as a share of total property costs, from the rental income.

When founded, the initial share capital of Leonia plc was FIM 15 million. The increase in the share capital to FIM 1,284 million was registered on 30 December 1997. The premium in excess of the nominal value of the shares, FIM 6,920 million, was included in the share premium account in undistributable capital.

In increasing the share capital, the extraordinary general meeting decided to establish a contingency fund and transfer FIM 2,630 million from the share premium account to this fund. The fund is included in distributable capital. The registration authorities permitted the reduction in the amount of the share premium account on 11 June 1998.

32. Share capital and restrictions on shareholding

Leonia plc

The share capital of Leonia plc amounts to FIM 1,284,270,000, comprising 1,284,270 shares of FIM 1,000 each. Each share has one vote. According to the Act on the State's shareholder rights, section 5, a disposal of shares or a shareholding arrangement which will result in the State losing the majority or the qualified majority of the voting rights can be implemented, provided that the parliament permits the arrangement (19 April 1991/740).

Leonia Bank plc

The share capital of Leonia Bank plc is FIM 630,000,000, comprising 63,000,000 shares of FIM 10 each. Each share has one vote. The Postipankki Act, section 3, provides that the State, or a company which the State controls by virtue of a direct ownership of shares, shall own and control an amount of shares which equals at least 51 per cent of all the shares and voting rights in the Bank (5 December 1997/1071).

Leonia Corporate Bank plc

The share capital of Leonia Corporate Bank plc is FIM 639,270,000, comprising 5,903 shares of FIM 100,000 each. Leonia Corporate Bank has previously redeemed 4,897 of its own shares, each having a nominal value of FIM 10,000. The redemption was registered on 31 December 1993. The redeemed shares have been cancelled.

In December 1997, Leonia Bank plc issued preferred capital notes totalling FIM 700 million. The notes bear interest at a rate of 5.96% fixed for 5 years, and thereafter at the Helibor 3-month rate plus 225 basis points. The fixed interest rate will be paid annually in arrears, the first time being in December 1998 and the last time in December 2002. The floating interest rate will be paid quarterly in arrears, the first time being in March 2003.

In March 1998, Leonia Bank plc issued preferred capital notes totalling FIM 560 million. The notes bear interest at the Helibor 12-month rate plus 100 basis points for 5 years, and thereafter the Helibor 12-month rate plus 225 basis points. The interest will be paid annually in arrears, the first time being in March 1999.

Both of the loans are undated. They are repayable, with the consent of the Finnish Financial Supervision Authority, 5 years after the date of issue. The preferred capital notes are included in the Tier 1 capital of the Bank. The interest on the loans can be paid only from the distributable capital. Leonia Corporate Bank plc subscribed for FIM 500 million worth of the notes that were issued in March 1998. In addition, in December 1998 Leonia Corporate Bank plc purchased the preferred capital notes issued by Leonia Bank in December 1997, totalling FIM 700 million, from domestic investors. In calculating Leonia Corporate Bank plc's capital adequacy ratio, these loans have been weighted at 100% risk.

40. Pension commitments

At 31 December 1998, the statutory basic and supplementary pensions of the staff of Leonia plc and Leonia Bank plc were arranged in the Leonia Pension Fund (known as the Postipankki Pension Fund until 31 December 1998). The basic and supplementary pensions of the staffs of Leonia Corporate Bank plc and of the other Group undertakings were taken care of through insurance.

The Leonia Pension Fund's pension liabilities of FIM 1,959 million are fully covered. In 1998, employers' contributions to the Pension Fund totalled FIM 95.9 million, Leonia plc's share being FIM 3.7 million and Leonia Bank plc's share FIM 92.2 million.

Leonia Bank's direct pension liabilities stood at FIM 0.6 million.

From the beginning of 1999, the pensions of the staffs of Leonia Corporate Bank plc and of other majority-owned Group undertakings have been arranged in the Leonia Pension Fund.

49. Formation of the Leonia Group

In December 1997, the Finnish government set up a holding company, as referred to in the Credit Institutions Act, Article 4, named PV Group plc. Through an ownership arrangement on 18 December 1997, the government disposed of the shares of Postipankki and Finnish Export Credit to the PV Group and subscribed for all of the share capital of the PV Group.

The PV Group recorded no business in 1997 and its first accounting period ended on 31 December 1998. In 1998, the name of the parent company was changed to Leonia plc, the name of Postipankki plc to Leonia Bank plc and the name of Finnish Export Credit plc to Leonia Corporate Bank plc.

The accounts of Leonia Bank plc and Leonia Corporate Bank plc have been included in the Leonia Group accounts by using the pooling method of accounting. In accordance with this method, the accounts of the combined companies have been recognised in the Group accounts in the year of combination and in the years prior to that year, as if the companies had been combined already from the beginning of the first period of comparison. The capital and reserves of the companies are brought forward at book value and no goodwill arises.

The key figures for 1997, the year prior to combination

	Postipankki	Finnish	PV
	Group	Export Credit	Group
Net income from financial operations	2 210	371	2 581
Other income	1 072	77	1 149
Operating expenses	- 2 684	- 121	- 2 805
Provisions for bad and doubtful debts	54	- 47	7
Income from the companies accounted for by the equity a	nethod 15		15
Operating profit	668	280	948
Capital and reserves at 31 December 1997 ¹⁾	4 525	4 457	8 881
Total assets at 31 December 1997	125 258	54 920	178 237

¹⁾ Incl. untaxed reserves less deferred tax liability

50. Subsidiary and associated undertakings

Subsidiary and associated undertakings included in the Group accounts, the methods of accounting and detailed information on ownership are given in Note 44.

Subsidiary undertakings excluded from consolidation are shown in Note 44.

51. Changes in Group structure

Suomen Tilirahoitus Oy was merged with Suomen Tililuotto Oy on 30 April 1998, and the company was renamed Leonia Card Ltd.

Leonia MB Group set up a mezzanine finance company, MB Mezzanine Fund II Ky, on 10 June 1998. The Group's holding in the company is 60 per cent and the value of the investments on 31 December 1998 were FIM 41.1 million.

The MB Mezzanine Ky mezzanine finance company was closed to new investments. The total amount of investments at the closing date was FIM 145.5 million.

The share capital of MB Equity Partners Oy was increased to FIM 500 000, based on a decision made on 30 December 1998. The stake of the Group in the company remained unchanged (40 per cent).

The share capital of Leonia Life Insurance Company Ltd was increased, based on a decision made on 26 January and 30 December 1998, by a total of FIM 100 million. As a result of the increase, the share capital of the company amounts to FIM 170 million and Leonia Bank plc's holding in the company has increased to 90 per cent.

LEONIA STANDS FOR STRENGTH AND FLEXIBILITY

The new bank received its new name 'Leonia' in April 1998. The name was selected from 1,600 proposals, after research had eliminated most of the rest. The name Leonia signals strength and flexibility. Leonia is also linked to the bank's Finnish origin and previous symbols. Linguistically, the root of the new name, Leo or Leon, means a lion. Leonia could also be a woman's name.

Along with the new name, Leonia also introduced a new logo. Its shape symbolizes the money of the future - a bank card or smart card. The soft interior of the logo communicates human values and closeness to people. In the logo's colours, blue stands for reliability, clarity and calmness. Blue also refers to traditions and Finnishness. Green gives the logo youth, freshness and a new start, while yellow refers to warmth, light and courage, as well as to Europe.

The name and logo were designed by the Viherjuuri Group, in co-operation with Leonia Group's own design team. The logo was the work of the graphic designer Ilmo Valtonen.
