# HACKMANGROUP

Annual Report 2000

## NOTICE TO THE SHAREHOLDERS

## **Annual Shareholders' Meeting**

Thursday 19 April 2001, 3.00 p.m. Scandic Hotel Continental Helsinki, conference room Nordica I, Mannerheimintie 46, Helsinki.

All shareholders who have been registered no later than 9 April, 2001 in the official company shareholder register kept by Suomen Arvopaperikeskus Oy may participate in the Annual Shareholders' Meeting.

Notification of attendance no later than 17 April, 2001, 2.00 p.m. to: Hackman Oyj Abp, Share register, P.O.Box 955, 00561 HELSINKI or by phone + 358 (0) 204 39 5717 or e-mail: yvonne.kaleij@hackmangroup.com

Please notice, if your address has changed, inform the bank that takes care of your stocks on your new address.

## Payment of dividends

The Board of Directors has proposed a dividend of EUR 0.50 per share for 2000 on both Series A and K shares. The dividend clearing day is to be 24 April, 2001 and the date of payment, 2 May, 2001, if the proposal of the Board is approved. Shareholders who have not changed over to the Book-Entry Securities System by the clearing day will receive their dividend payment once their shares have been changed over to the system.

## Financial information

HackmanGroup will publish the following reports in Finnish, Swedish and English:

Annual Report 2000	Week I2 (	19-23 March, 2001)
Interim Report I Q	Friday 4 May, 2001	(I-3 months)
Interim Report II Q	Thursday 2 August, 200	I (I-6 months)
Interim Report III Q	Thursday I November,	2001 (I-9 months)

## The publications can be ordered by writing to

Hackman Oyj Abp, Group Communications, P.O.Box 955, FIN-00561 HELSINKI or by phone + 358 (0) 204 39 5732 or by fax + 358 (0) 204 39 5708

All financial information will also be published on HackmanGroup's home pages:

## HackmanGroup

Hackman Oyj Abp is a holding company, whose primary task within the Group is to serve as a source of financing. In operational terms, the Group Head Office assumes responsibility for the business areas' financing, investor and financing relations, property management, and the necessary coordination projects. We are concentrating on our two main divisions, Designor and Metos. The common feature of these divisions is that their growth is based on the consumer's increasing purchasing power and desire to invest in the quality of life. Our other activities include the Hadwaco Division, Group functions and the management of real property.

From the beginning of 2001 operational business followup of the divisions was forwarded to the board of Hackman Oyj Abp by closing the external divisional boards. This arrangement increases the Boards awareness of the main business drivers of both divisions as well as the Boards possibilities to contribute the strategy development.

Designor is a leading manufacturer and marketer of housewares based on Scandinavian design. The four Designor brands – iittala, Arabia, Rörstrand and Hackman – are well known throughout the Nordic countries.

Metos develops and produces services, systems and individual products for the needs of food and beverage production in professional kitchens. Metos's operations are divided into two main areas: Metos-brand products and manufacturing, and end-user operations. Importers and distributors are responsible for the international distribution of Metos-brand products. The objective is to be the best global supplier in the sector by virtue of those products. The end-user operations, which rely on Metos' marketing and logistics concept, aim at being the best local supplier of professional kitchens in selected markets. In Europe, Metos

is among the five largest firms in its sector.

The HackmanGroup operates in over 20 countries. In 2000 the HackmanGroup's sales were valued at EUR 315.8 million and the group's personnel numbered 2 610, of whom worked outside of Finland 1 221.

We have defined our way of operating on the basis of the following shared values:

## A STRONG BUSINESS ETHIC

At Hackman we take responsibility for the environment and show concern for the employees. In our operations we adhere to high morals and the principles of sustainable development.

## A CUSTOMER ORIENTATION

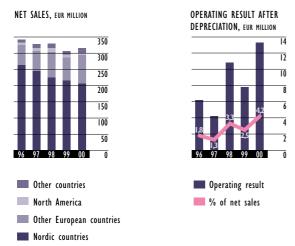

Superior product and service quality are important to us, because that quality is the foundation of customer satisfaction. We collect customer feedback actively and develop our operations on that basis.

## **OPENNESS AND PARTICIPATION**

At Hackman, openness, interaction and cooperation constitute an essential aspect of everyday life. We consider it important that employees participate in the development of their own jobs and the work community. This increases both motivation and work efficiency.

## A WILLINGNESS TO CHANGE

We are constantly developing our personnel and our organization. We are always striving to anticipate what's ahead and to change in accordance with spirit of the time – without forgetting our strong traditions.

2000 IN BRIEF		2000	1999	Change	%

## Events and New Products in Main Divisions - 2000

## D E S I G N O R

## Chicago Athenaeum Good Design Award

The award was given to the following products from Hackman tools® - collection: Lovegrove 2000, Citterio Collective tools 2000, Lindfors 98, Seth-Andersson 98, Citterio 2000, Citterio 98, Koskinen 2000 and Piano Workshop 98.

## Arabia Artists' Exhibition at Retretti Art Center, May 31-August 28, 2000

Those participating in the show were Inkeri Leivo, Kati Tuominen-Niittylä, Heljä Liukko-Sundström, Olli Vasa, Pekka Paikkari, Pekka Toivanen, Fujimo Ishimoto, Kristina Riska, Nathalie Lahdenmäki, and Julia Virkkunen and Zia.

## Harri Koskinen - 2000 Young Designer of the Year

The Design Forum Finland issued its Young Designer of the Year Prize to honor the 125th anniversary of the Finnish Association for the Applied Arts. The prize was awarded in special recognition of an international breakthrough in the field of design. Designor's Harri Koskinen (1970-) was one of the two to receive the honor. Harri's most recent undertaking was an invitational show at Issey Miyake's gallery in Tokyo.

## Design Plus Prize at Frankfurt's Ambiente Fair

Awarded in February to Carina Seth-Andersson's bowls and Konstantin Grcic's tumblers of the iittala relations -collection and Ross Lovegrove's water pitcher of the Hackman tools  $^{\! @}\! ,$  collection.

### Stefan Lindfors's Housemix in Milan

Housemix, held during the Milan Furniture Fair, brought together the fruits of Stefan's industrial design. The show represented the cooperative effort of Arabia, iittala, Hackman, Marimekko and P.O. Korhonen. In spring 2001 the show will be seen in Tokyo.

## Design Yearbook 2000

From Hackman tools®, collection the Lovegrove 99 -kettle was choocen into the 2000 Design Yearbook.

## Utmärkt Svensk Form

From the jittala relations -collection Carina Seth-Andersson -bowls and her Grade°C-dishes from Rörstrand were awarded the Utmärkt Svensk Form -diploma. The jury gave also to Rörstrand's Qvint-set the Utmärkt Svensk Form -special prize.

## Media Finlandia Gold Medal to Teema Advertisement

Arabia's Teema campaign took the gold medal in the Finnish newspaper company A-lehdet's advertising competition. The same advertisement received a silver medal in Grafia's "Year's Best" competition for graphic works.

## Tapio Wirkkala - Eye, Hand, Thought

This retrospective exhibition at Helsinki's Museum of Art and Design awakened broad international interest. Wirkkala's name is associated with iittala's emergence as a trail-blazer in modern glass design. littala was the museum's main partner in organizing the Wirkkala show. Its run at the museum now over, the exhibition is going on tour internationally.

Tapio Wirkkala - Eye, Hand, Thought

24h in blue, design Heikki Orvola

## iF Product Design Award 2000

To the Citterio Collective tools 2000 -series has been awarded the iF Product Design Award. The awarded products had been set out on the iF Design Exhibition and in the iF Yearbook.

## Heikki Orvola - Craft Design

This Heikki Orvola retrospective exhibition, held at Helsinki's Museum of Art and Design, showcased his production from a period of 30 years. In connection with the show, a book of the same name was published. The book's systematic presentation of Orvola glasses from iittala serial production represents a tool of vital importance to collectors and researchers.

## CEO's Review

In accordance with our strategy, we are concentrating on two divisions: Designor, which manufactures and markets housewares based on Scandinavian design; and Metos, which specializes in equipment and systems for professional kitchens. The foundation of both divisions' growth is identical – the consumer's increasing purchasing power and desire to invest in the quality of his or her life.

It is vitally important that we understand and anticipate changes connected with people's living environments and behavior. Among our target groups, we especially follow city-dwellers over the age of 30. Their way of living is characterized by two parallel trends - furnishing their homes and eating out. They eat out regularly in restaurants, at fast-food establishments and at work. The home is an important counterweight to the haste of working life. People want to make their homes retreats, which reflect their own personal identity.

Consumer behavior has taken on a fast pace: its cycles are shorter than before. Consumers react quickly to the image of the world that product offerings and the media create. The speed-up/slow-down way of thinking is clearly visible in demand. People react rapidly to fashion trends – a factor also visible in the purchasing behavior of people

over 40, who have the most purchasing power.

As part of the description of our strategic operating environment, we are beginning, in this annual report, a series of articles on megatrends in consumer behavior. In this operating environment, one can stand out from one's competitors only by being better. Superiority means more than the products' quality, design and distribution channels. As Rolf Jensen notes in this annual report, the one with the best, vital story with which the consumer can identify will emerge the victor. Therein lies the great challenge for us.

Our Group has numerous well-known brands, whose value we are increasing by making them clearer. During 2001 we will refine the definitions so as to apply them on a practical level. Designor's main brands are in Finland and the other Nordic countries - Arabia, Hackman, iittala and Rörstrand. Of these, Hackman and iittala are international brands. Designor's most important competitive factor is cutting edge Scandinavian design. We are supporting the brand image with the Designor outlet concept.

Through corporate acquisitions, Metos has obtained regional brands for its product selections. Metos continues to serve as the main brand, however, both in Finland and abroad. In addition to the Metos brand, we are using strategic brands with solid market positions in their own regions. Metos stands out clearly from its competitors by its characteristic way of operating. We are strengthening the Metos brand and corporate image by making Metos a system supplier whose strength is founded on a clear service concept and direct customer contacts.

## **ACTIVITY IN 2000**

Hackman Oyj Abp is a holding company, whose primary task within the Group is to serve as a source of financing. In operational terms, the Group Head Office assumes responsibility for the business areas' financing, investor and financing relations, property management, and the necessary coordination projects.

During the year under review, the general economic trend was good in the market areas where our Group operates. As part of our concentration strategy, we divested ourselves of the TTT Division at the end of the year. The Eurotanks Division's operations are in the exit process, in

accordance with the plan drafted in 1999.

In the Nordic countries, HackmanGroup is the market leader in its most important business areas. Metos's market share increased through both corporate acquisitions and organic growth, which exceeded that of market growth. Metos has become an important international supplier of systems in the professional-kitchen sector.

Designor's market share remained constant in the most important markets. During the year under review, the creation of products proceeded according to plan and profitability improved. Designor increased its marketing investments primarily in the EU countries and the United States. We believe that exports will get new impetus from both the new international brand strategy and the development of the shop-in-shop concept, with which we are making the purchasing event exciting for the consumer.

## **PROFITABILITY**

Although our profitability clearly increased from the level of preceding years, we still cannot be satisfied with the level achieved. The result level nevertheless corresponds to the structural development program's long-term plan.

Metos and Designor already account for 87 percent of the Group's net sales. In both divisions, the business result is progressing towards the established objective, 8 percent of net sales. Hadwaco's low volume of orders in hand and major after-sale expenses for certain of its previous deliveries represented disappointments. The high price of the most important single raw material, stainless steel, also led to major cost pressures in all areas of operations.

## **DEVELOPMENT CHALLENGES**

One of Designor's greatest challenges is to combine the creativity of designers with systematic product development. During the year under review, the product development decision-making process was given greater precision. That process will be a key factor in the process-management development project that has been launched.

Generally, the streamlining of production has been continued by centralizing resources and increasing the use of subcontractors. Investments have concentrated on removing bottlenecks with the aid of automation.

## **ACCELERATING CHANGE THROUGH PERSONNEL TRAINING**

HackmanGroup's principle of ongoing change is being supported firstly by training. The year under review witnessed the launching of the third Optimus training program – the first in English, and the first in which representatives of units outside of Finland have taken part. The training is based on Hackman's values, which the trained messengers carry forward into the organization's everyday operations. In addition, the training acquaints the participants with the legalities of economics and, especially, the development of what the participants themselves do.

The modernization of initiative activities is putting our company's key values into action. Those values include participation, a willingness to change, as well as openness. By financially supporting personnel recreational pursuits, we are helping people cope on the job.

The Hackman Euroforum, which began its activity in 1998, convened for the second meeting in its history on April 14, 2000. The Hackman Euroforum promotes interaction among employees, and between employees and the management. The objective is also to develop modes of interaction between meetings. We have already received favorable feedback about those efforts.

## **OUR WILLINGNESS TO CHANGE**

## WILL BE EVIDENT IN OUR 2001 OPERATIONS

During the past year, that willingness - one of our basic values – proved a central factor. Our customers, partners and owners have reacted favorably to the strategy of change that we are implementing. Our personnel have found themselves caught up in the whirl of many sorts of change and have internalized the organizational changes admirably. It will be good to proceed from this point in 2001, as the directions are in place and the realization of many things awaits us.

Tapio Hintikka CEO and President

# A Vision of the Future THE BEST STORY WINS

What is the future of business after the Information Age? It won't be the latest technology or newest product, but the story behind the product that will provide the competitive edge.

In his book The Dream Society<sup>1)</sup> Dr Rolf Jensen describes the consumer of the future, who instead of buying material items buys stories.

To illustrate his point, Dr Jensen holds a green and a red glass egg in each hand.

– This is the logical part of the brain, this is the dream brain, he says. When you are buying a brand product, you buy it using your dream brain. When you get home to your family, you will be asked to defend your choice. Why did you pay so much? It is the logical mind that has to defend the decision: the product can be washed over and over again. Even though the logical part of the brain was not involved in the decision, it has to defend the decision like good lawver.

 Not only are we seduced by stories – it is worse than that. We have no defence whatsoever. The point of storytelling is that we need them.

People have always needed stories. The difference is that today we can afford to buy them. The average European consumer has become six or seven times richer over the past hundred years. On the other hand, automation of production of goods and data is has cut down prices.

As an example, Dr Jensen tells about a truck that drives from a small town in Southern Sweden to Italy with a tank full of spring water. At the same time another truck leaves from Italy to Sweden. The drivers cross each other somewhere in Germany. - This actually happens, Jensen smiles, yet any expert can tell you that tap water is healthy. What people buy is the story of Italian or Swedish spring water.

As another example of the Dream Society, Dr Jensen refers to an advertisement he saw in the US of a "single-sheep blanket", a blanket marketed as the product from the wool of a particular sheep whose photo is shown with the product.

## Who tells the stories?

 In the Information Society, stories were told by people from the art world – authors and actors. In the Dream Society, companies are also taking that role.

Advertising is the most common forum of storytelling by companies. Dr Jensen believes that it might soon reach a limit – there is advertising anywhere. Event marketing and guerilla marketing have come to complete traditional advertising. As an example of guerilla marketing he recalls a campaign in New York, where 1800 wallets were thrown on the pavement. Each wallet contained a message asking to donate money to a charity organisation. –That was theatre outside the theatre, people wandering whether or not to pick up the wallet, he comments.

Dr Jensen believes that in the Dream Society, the product's material qualities become secondary. In that sense, the Dream Society marks the end of material domination.

- First you had the product with a certain quality. The second stage is the brand that you can identify yourself with.
   This is where most companies are today. In the third stage the product itself becomes a byproduct.
- The creation of a product's story begins with the choice of a theme. We have identified eight Deep Desires

that range from love via freedom and control to recognition. It is a very useful exercise to determine which emotional market your product is being launched into.

The next step is to construct the story. Researches have identified six building blocks that should be strategically placed in relation to one another. - One of the most important parts in the story is the opponent. Think of Star Wars without Darth Vader, or Titanic arriving safely in New York. The opponent is often missing in marketing.

## The Scaninavian design concept is based functional features. How does that fit into the emotional setting of the story?

– Indeed, how to emotionalise the clean and nice design, their neutral lines? What is the story really about? It can be about love and about the loving family, which would be a natural story when we talk about the kitchen and the home. There is also the recognition aspect – this is a family with good taste.

One trend could be that professional kitchen equipment is marketed for the home, Dr Jensen reflects. - When you invite family and friends for the weekend, you buy good raw materials directly from the farmer. To illustrate to your friends and family that you are serious about them, you have professional equipment to prepare your food. And you also invite your guests into the kitchen to observe the ritual.

## What happens to design?

 Design as I understand it will disappear. What the designer must first do is to build the story, and out of the story comes the design. The order is reversed. You have to add more emotion into design.

## Will people get tired of all the stories that they are being told all the time?

– The best story wins. I can easily imagine a minimalistic story entering the market. GAP recommended its clients not to buy ego-gratifying things, but just a few good items. I can easily imagine a no-nonsense section in a department store for the "rational" consumer – which in turn becomes a story.

## Is the human mind changing?

– We have been fascinated by science and technology for centuries, with a strong focus on rational thinking. Traditional societies have few but very powerful stories, about farming, wars, families. The Great Stories are about ideologies you are willing to die for, stories about good and evil. In the Dream Society, you buy your own story, and you as a consumer make the choice. People will always crave stories.

Rolf Jensen is Director of The Copenhagen Institute for Future Studies, one of the world's largest future-oriented think tanks. Strategic advisor to over 100 leading international companies and government agencies, he is also Council Advisor to The Futures Council of The Conference Board, Europe. His articles on future issues and business strategy have been published in numerous periodicals, including The Futurist. Dr Jensen is a member of the World Future Society based in Washington, DC.

## DESIGNOR

Designor is a leading manufacturer and marketer of housewares based on Scandinavian design.

#### SCANDINAVIAN DESIGN IS OUR CORE COMPETENCE

We operate in a sector in which local brands have traditionally enjoyed a strong position. Our sector is however internationalizing ever more quickly. Today, we are already one of the sector's major enterprises. We are one of Europe's leading manufacturers of products that embody modern Scandinavian design. Success in internationalization defines who will survive in our market. The Nordic countries, in which our position is strong, provide a good springboard for our further internationalization.

Design and an in-depth understanding of consumer behavior play a central role in our product development. The designer's name is a part of the product and is prominently featured in the products and their marketing. Most of our designers have already worked for all our brands and know what those brands represent. Clear definition of the brand's values in connection with the work assignment helps the designer. In this context we have succeeded with the designers of Hackman tools®, as attested to by the Good Design Award presented to that series by the Chicago Athenaeum Museum of Architecture and Design. The Athenaeum gave the award to selected products that represented the innovativeness, vitality and energy of contemporary international design. The award is presented yearly to designers and manufacturers who demonstrate new and innovative product thinking and thus revitalize conventional consumer-goods design. <sup>1)</sup>

Consumer trends speak strongly in favour our strategic decision to concentrate on modern Scandinavian design. Today, people are investing in their homes. They are making their homes places in which they can express themselves and their values. Various trends come and go in home furnishings as in other sectors. Alongside the trends of the moment, the popularity of modern Scandinavian design has endured. There is thus no reason to think that Scandinavian design will lose its standing in the future, either.

## IN DEVELOPMENT PROJECTS, WE ARE INVESTING IN GROWTH

Designor's business result developed favourably and our profitability improved for the fifth year in a row. In terms of profitability, we can be fairly satisfied with developments at Designor, although we did fall short of our growth objectives for net sales. The healthy level of profitability we have achieved does however assure us of good points of departure for developing our operations dynamically, and for creating the necessary growth. Indeed, the developmental projects now in progress emphasize the generation of growth.

Our growth strategy has six cornerstones. We are concentrating on developing and strengthening our position in our Nordic home market, international growth, improvement of internal efficiency, development of retailing concepts, improving industrial competitiveness, and developing our organization.

We are improving our market positions in our home market by developing our sales organization and creating new sales channels. By improving our competitiveness we will be able to increase further our market share. In our Nordic home market we are emphasizing the further development and refinement of our strong brands.

In the international market we will grow by concentrating on fewer brands than

before, and by targeting our products at city-dwellers with purchasing power who are attracted to modern Scandinavian design.

Internal efficiency requires constant improvement. During the year under review, we defined our key processes: developing brands and new products, managing the product portfolio on a market-by-market basis, sales forecasting and production planning, innovation, development of retailing concepts, and the planning and control of our business. In 2001 we will focus on improving these processes.

### THE SHOP-IN-SHOP IDEA IS ONE OF OUR STRATEGIES' CORNERSTONES

In competition, those who can productively influence the distribution channel will prevail. Development of shop-in-shops concept is one of our growth strategies' cornerstones. We believe that growth can be achieved in both grocery and department stores through close cooperation with our trading partners. We are developing the shop-in-a-shop idea in all our main markets.

We are working towards creating a more complete shopping experience for our consumers. In this manner it's possible to increase the number of impulse purchases in supermarkets especially. We've had good results, for example, in Holland, where we opened six shops-in-shops during the year under review. All in all, the year 2000 saw the implementation of more than 20 shop-in-shop concepts in Finland, Sweden, Spain, Holland and the Baltic countries.

## IN PRODUCTION WE CONCENTRATE ON KEY TECHNOLOGIES

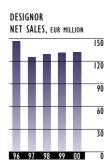

Our investment in improving industrial competitiveness means that in our own production we will concentrate on key technologies. In accordance with our strategy, we are centralizing the production of all steel-based products in Sorsakoski, Finland, where the necessary investments will be completed this spring. The production of aluminum based products is being concentrated at the Moss plant in Norway. The closing of the Klepp, Norway, plant was completed at the end of 2000. In the future we will develop all our industrial operations according to this same sort of logic.

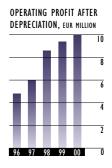

## INNOVATIVENESS CONSTITUTES THE ENTIRE ORGANIZATION'S WAY OF THINKING

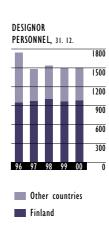

We are constantly developing our organization on the basis of our target values. We want to make innovativeness our most important competitive advantage. It has become customary to combine innovativeness with only design and product development. At Designor, however, innovativeness constitutes the entire organization's way of thinking and attitude - an attitude that we want to reflect in everything we do.

By creating this change we change the perception about our whole industry. The objective is ambitious: it calls for a genuine revolution in culture, and for commitment of all personnel. We will best reach our objective by anchoring our values as a tangible part of our new operating culture.

The following Hackman tools®, products received the Good Design Award: the Lovegrove 2000 cookware, Citterio Collective tools 2000, the Lindfors 98 salad bowl and servers, the Seth-Andersson 98 bowls and salad servers, the Citterio 2000 flatware, the Citterio 98 flatware, Koskinen 2000, and the Piano Workshop 98 flatware.

## M E T O S

### **GROWTH AND INTERNATIONALIZATION CONTINUED IN 2000**

The rapid growth that began five years ago has continued. Our net sales have almost tripled since 1995. About half of the growth has been organic, the rest originating via corporate acquisitions.

The most significant event of 2000 was the purchase of Italy's Olis S.p.A. and Polaris S.p.A. The firms were consolidated in April. They account for slightly less than 20 percent of the Metos Group's 28 percent overall growth. With the acquisition of Olis and Polaris, the range of Metos-brand products has been complemented, so that it now covers the most important needs of professional kitchens.

Internationalization has progressed in a promising fashion. We are one of Europe's top five firms in the sector. Our strategic objective is to strengthen our market position in Europe. In the future, Finland's share of net sales will drop below one quarter, and we will be an important supplier in more and more countries.

The bulk of organic growth likewise came from outside the Nordic countries. We increased exports of Metos-brand products to importers and distributors and benefited from distribution synergies. Product development has brought many new products onto the market in recent years.

At the end of 1999, with the reawakening of demand in Russia and Eastern Europe, the European market clearly recovered. In a number of product and market areas, demand grew by more than 10 percent in the first half of the year. After summer, however, demand slackened, as many customers shifted their investment decisions to the end of the year. We assume that that factor will make itself visible in invoicing in early 2001.

# END-USER OPERATIONS AND OUR METOS-BRAND PRODUCTS AND MANUFACTURING ARE THE PILLARS OF OUR BUSINESS

Our operations are divided into two main areas: our Metos-brand products and manufacturing, and end-user operations.

We develop and manufacture products whose international distribution is handled by importers and distributors. Our objective is to be the sector's leading supplier - the best global supplier - of these products in our market area. In Holland we are already about to achieve the position of market leader in dishwashing machines for professional kitchens. We are one of the three major international suppliers of dishwashing machines for in-flight catering at airports. Our production is concentrated in Italy, Finland and Sweden. In order to benefit from the opportunities presented in areas near Finland, we have commenced manufacturing – of labor-intensive products especially – in Tallinn, Estonia. Experiences to date have been good.

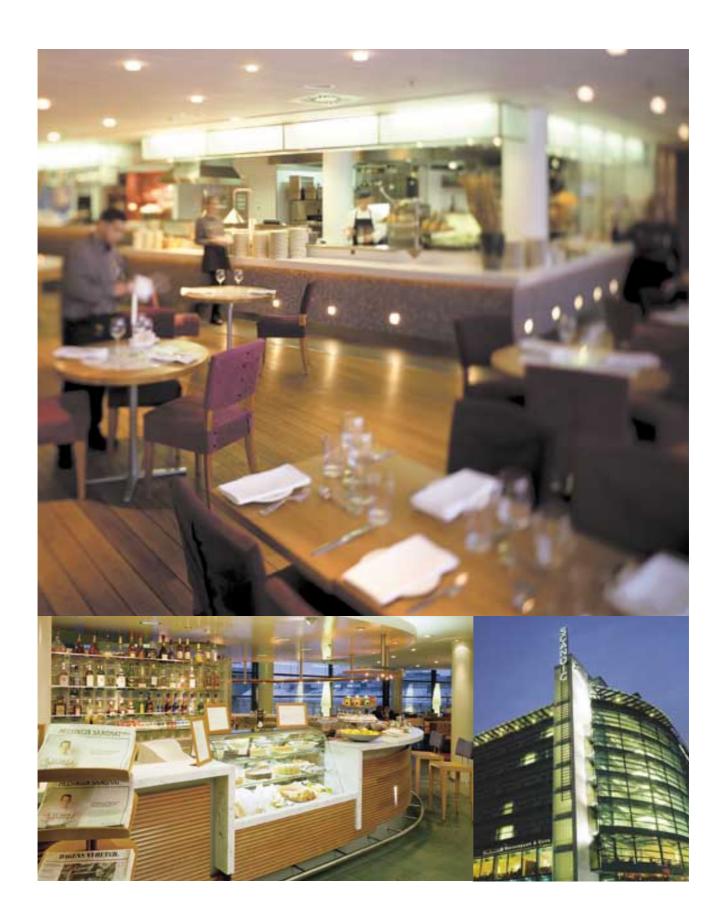

End-user operations, which rely on Metos's marketing and logistics concept, aim at the position of best local supplier of professional kitchens in selected markets. We offer comprehensive customer service covering everything from individual pieces of equipment to complete kitchen systems and after-sale

Metos develops and produces customer-oriented services, systems and individual products for superior food and beverage production, for the needs of professional kitchens.

MICHAEL RAMM-SCHMIDT
President, Metos
Managing Director, Hackman Metos Oy Ab

responsibility that spans the product's life cycle. The customer identifies our end-user operations with the Metos brand. End-user operations represent the most important distribution channel for Metos-brand products – thanks not only to the volume of the operations, but also to the valuable customer feedback they provide for the development of those products. Metos's own end-user operations are located in Finland, Sweden, Norway, Russia, Estonia, Latvia, Lithuania, France and since the acquisition of ICS N.V. in January 2001 also in Belgium.

New construction stimulated end-user operations in Finland and Sweden in particular. The home meal replacement (HMR) trend increased demand especially in Sweden, where the preparation of food in grocery stores, for taking home or eating on the spot, has already become common. Public-sector demand demonstrated its traditional firmness during the year under review. Demand in the Baltic countries and Russia is recovering.

## INVESTMENTS AND DEVELOPMENT

During the year under review, we particularly invested in the development of IT and marketing systems, in addition to corporate acquisitions. We launched Finnish- and Swedish-language versions of our dynamic web sites. Web services in English and Norwegian are coming on-line next.

In product development, the key development objectives are to increase multifunctional features and the modularization of parts, and to make use of electronics. In production we are concentrating on reducing turnaround times, and on simplifying product structures by decreasing the number of components.

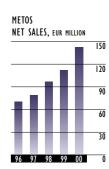

## 2000 BROUGHT CHALLENGES FOR PROFITABILITY

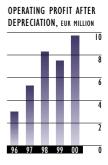

The year under review was, in many respects, challenging from the stand-point of results. The price of stainless steel increased 70 percent from 1999's level, placing substantial cost pressures on products. Taking increased personnel costs, the rising price of energy and a substantial increase in interest rates into account, too, compensating for all these inflationary factors proved a challenging task. The situation was not relieved by uneven demand, which faded noticeably after a vigorous first half of the year. Thanks however to increased volume, improvement in productivity, and the cost savings generated by structural changes in prior years, profit increased by 30 percent - somewhat more than the growth in net sales.

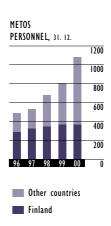

Forecasts call for demand to be steadier and more controlled in 2001 than in the year under review. The forecasts support our expectations of a continuation in our organic growth.

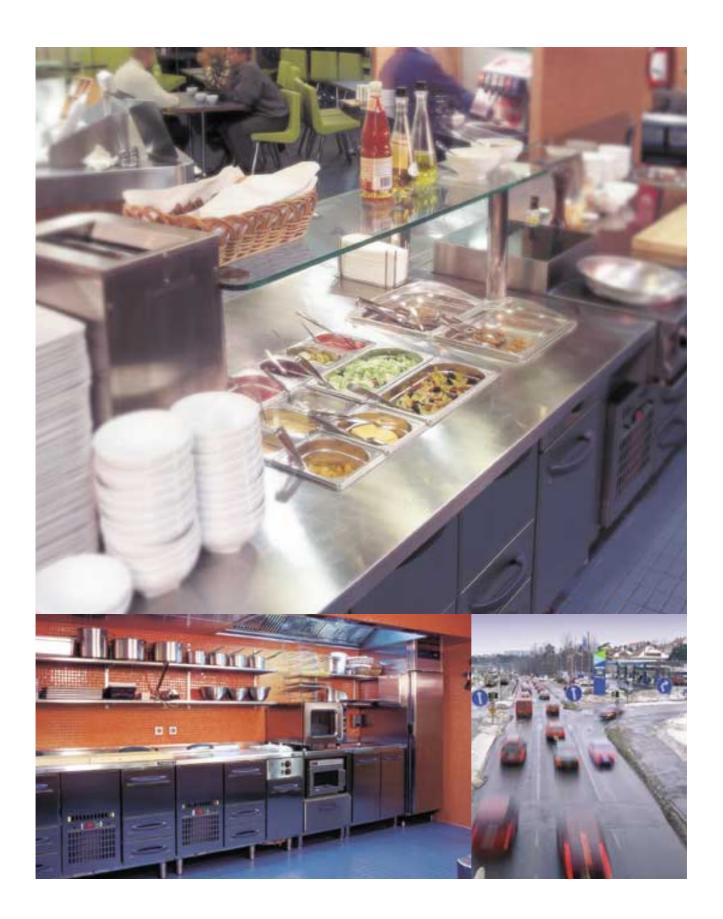

New products in 2000

- Metos Proveno combi kettle
- Metos WD granule pot and pan washer
- Metos Proff food distribution system
- Metos ICS+ energy and cost optimization system for tunnel dishwashing machines
- In Italy, updated line of dishwashing machines (Dihr)
- New combi oven (Olis)

## Other Functions

Our concentration on two main divisions and our withdrawal from other operations represent part of the strategy we have chosen. In accordance with that strategy, we sold the TTT Division at the end of 2000. In the Group's financial statements, the figures for TTT's 2000 operations are consolidated under other functions. TTT is known worldwide as a leading supplier of wood-cutting blades to sawmills, the pulp industry, and the wood-based panels industry.

The Eurotanks Division, which specialized in milk-refrigeration technology, is in the exit process. Wedholms AB in Sweden, another part of the Eurotanks division, was sold in April. The provisions made in the 1999 financial statements are covering the costs stemming from these arrangements, as well as operating costs. Eurotanks' operations are not any longer included in the HackmanGroup consolidation.

The Hadwaco Division's Process Equipment Business Area was sold in February 2000. Hadwaco's volume of orders in hand for water treatment systems was weak throughout the year under review. During the year we concentrated on the after-sale servicing of earlier deliveries, primarily to ensure the systems' technical performance capabilities. This caused us significant added expense. At the moment, Hadwaco has a total of 20 pieces of equipment installed in various parts of the world. The equipment's performance has been brought up to the customers' specifications, even although the operating conditions have had fluctuations exceeding the initial values.

As part of the preparations for broadening Hadwaco's ownership base, we have clarified the company's key expertise, the organizational division of labor, and future areas of development and investment. The purpose of the arrangements is to concentrate all the evaporation technology, which is based on applicable patents, in Hadwaco. We are attempting to secure external solution for the development of operations in the next few years.

## PROPERTY MANAGEMENT

The HackmanGroup's balance sheet includes real-property items that are not part of actual business operations. These items include such things as forests and other land, whose yield on capital is low. Naturally, these items also affect the achievement of the yield objectives established for the HackmanGroup as a whole. We wish to keep the yield on this capital separate from the HackmanGroup's administrative expenses, so as to clarify the monitoring of both yields and expenses.

In 2000 we sold timber from our forests only on a forest-management basis. We sold platted shorefront lots in accordance with demand. We will continue to actively develop long-term possibilities for increasing the value of our real-property items.

## Report by the Board of Directors

The core business, Designor and Metos, accounted for 87.1% (79.3%) of total net sales. Operating result improved by EUR 5.5 million to EUR 13.3 million and return on net assets was 8.0% (4.7%).

HackmanGroup's net sales increased by 3.0% to EUR 315.8 million (1999: EUR 306.6 million). The Group's operating result was EUR 13.3 million (EUR 7.8 million), and the result after financial items was EUR 8.3 million (EUR 2.8 million). The Board of Directors proposes that a dividend of EUR 0.50/share is to be paid for 2000 (EUR 0.42/share).

### CHANGES IN THE GROUP STRUCTURE

The concentration of the HackmanGroup structure into two operational divisions is completed. In March Hadwaco Ltd Oy sold its process business area to Finnish YIT Teollisuus Oy and Hackman Wedholms AB was sold to its management. Metos concluded its acquisition of the Italian Olis Group in April. The assets and business of the TTT Division were sold to investors and the management of the company in December. The Eurotanks Divisions remaining French operations are in the exit process. The division is not included any longer in the HackmanGroup consolidation.

## **NET SALES**

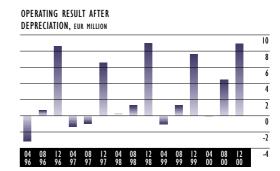

Net sales of the core business, Metos and Designor, increased by 13.1%. The HackmanGroup's net sales increased by 3.0%. Exports and international operations accounted for 64.3% of net sales (60.6%). The value of unshipped orders was EUR 28.7 million, which is EUR 1.7 million higher than at the end of 1999.

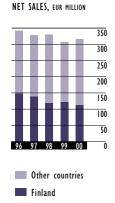

## **RESULT**

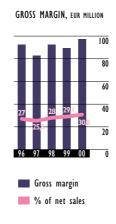

The Group's gross margin was 30.8% of net sales (29.1%). The operating result was EUR 13.3 million (EUR 7.8 million). The result before extraordinary items improved by EUR 5.5 million to EUR 8.3 million (EUR 2.8 million). The improvement is mainly due to better profitability in the core business and exits in low margin and loss making business.

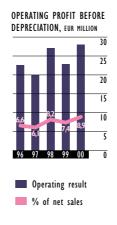

Other operating income totaling EUR 3.3 million (EUR 4.1 million), includes refunded pension premiums (SPP) in Sweden EUR 1.7 million and EUR 0.8 million (EUR 0.9 million) gains from sales of fixed assets.

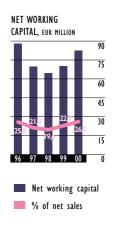

Other operating expenses totaling EUR 11.4 million

(EUR 12.3 million) include EUR 8.8 million (EUR 8.7 million) research and development expenses.

Income and expenses arising from major restructuring and divestitures are shown as extraordinary items. The extraordinary expenses totaled EUR -1.5 million (EUR -17.3 million). Amounts provided for, EUR 13.6 million in the 1999 financial statements for restructuring and reorganization expenses, have been released with EUR 11.6 million to correspond to the factual expenses. A new allocation of EUR 1.9 million for restructuring has been made.

The result before appropriations and taxes was EUR 6.8 million (EUR -14.5 million), or EUR 21.3 million better than in 1999.

Taxes for the period were a net income of EUR 0.7 million (EUR 2.5 million). The Group's deferred tax liability decreased by EUR 0.4 million (EUR 0.8 million). The deferred tax refund has been entered in its probable amount. The refund concerns mainly Finland and is increased by EUR 3.3 million (EUR 2.7 million). The result after financial items, taxes and minority interest was EUR 7.5 million (-12.2 million).

## **REVIEW OF DIVISIONS**

Designor's net sales totaled EUR 132.1 million (EUR 131.2 million). The operating result was EUR 10.0 million, an improvement of EUR 0.6 million compared to last year (EUR 9.4 million). The cookware production centralization project to Sorsakoski, Finland and Moss, Norway was delayed due to Norwegian authorities but has now been completed.

Metos' net sales increased by 27.5% to EUR 142.9 million

(EUR 112.0 million). The operating result EUR 9.7 million was EUR 2.2 million better than previous year (EUR 7.5 million). The investment in Olis Group has had a positive impact both to the sales volume and the operating result.

## **NON-CORE ACTIVITIES**

TTT's business was sold to investors and the management of the company in December.

Negotiations for Hadwaco's ownership structure are in progress.

The Eurotanks Division's remaining French operations are in the exit process. The division is not included any longer in the Group consolidation.

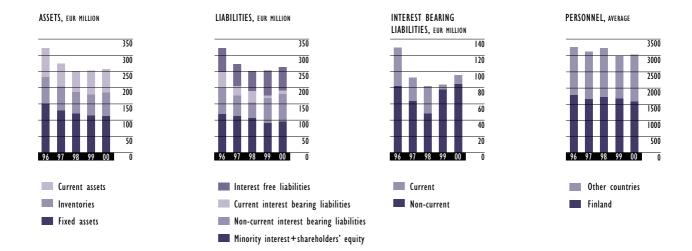

The Group's residual financial exposure related to noncore activities is limited.

## INVESTMENT AND FINANCING

The Group's gross investments totaled EUR 25.3 million (EUR 14.7 million), of which EUR 11.6 million (EUR 1.3 million) represented goodwill.

The Group's net working capital at year's end was EUR 82.3 million, or 26.1% of net sales (EUR 70.2 million, 22.9%). The Group's cash position was good throughout the year. Interest-bearing liabilities at the end of December totaled EUR 95.3 million (EUR 83.9 million).

At the turn of the year, the Group owned 16,876 hectares of forest, 112 hectares of waterfront property, 72 hectares of industrial property and 10 hectares of residential property. The total balance sheet value of this property was EUR 36.6 million (EUR 36.8 million).

## SOLVENCY

The Group's shareholders' equity at the end of 2000 totaled EUR 95.1 million (EUR 90.7 million), corresponding to EUR 21.62 per share (EUR 20.60 per share). Voluntary reserves have been allocated to shareholders' equity and deferred tax liability. In calculating the tax liability, each country's tax rate for next year (28-41%) has been applied. The Group's equity ratio was 36.1% (36.1%).

## SHARES AND SHAREHOLDERS

According to the book-entry system, Hackman Oyj Abp had 2,419 shareholders as of December 31, 2000. During 2000, 649 671 A shares of Hackman stock, with total value of EUR 7.7 million, changed hands (1 261 750; EUR 21.1 million). The share price reached a highest of EUR 18.80 in January and lowest of EUR 9.06 in October.

## OUTLOOK

The concentration of the HackmanGroup structure into two operations is completed. The long term market development is favorable for the products and services of Metos and Designor. Both Metos and Designor work on markets with good long term growth. We believe that Metos and Designor will grow faster than the market and that the Hackman-Group will have a steady improvement of the profitability.

## **Accounting Principles**

The statements have been prepared in euros.

### PRINCIPLES OF CONSOLIDATION

The consolidated financial statements cover the parent company and all those companies in which the Group, directly or indirectly, has a over half of the voting rights. The accounts of new Group companies are incorporated into the Group's reporting from the acquisition date. The accounts of divested companies are included in the Group's financial statements up to the day of divestiture.

Intra-Group transactions are eliminated from the reporting. Elimination of Group share ownership is carried out by the acquisition cost method. The value of the shares of subsidiaries has accordingly been balanced against subsidiary equity at the date of acquisition. In eliminating the shareholders' equity of subsidiaries, also the share of untaxed reserves at the date of acquisition excluding the deferred tax liability is considered as shareholders' equity. The difference between the acquisition price of the shares and the total value of the subsidiary is recorded under fixed assets or Group goodwill. Goodwill is depreciated straight-line over five or ten years. In the case of depreciation for goodwill that involves augmentation of a product line, the depreciation is taken over ten years, in view of their long-term strategic significance.

Associated companies are consolidated using the equity method. The percentage of the associated companies' financial result that conforms to the Group's holding are recorded in the Group's income statement as a financial item.

## **FOREIGN SUBSIDIARIES**

The income statements of subsidiaries outside Finland are translated into euro using the average exchange rates. The balance sheets are translated using the exchange rates quoted on the date of the financial statements. The resulting translation differences have been entered under shareholders' equity. The conversion discrepancy related to subsidiary equity and arising from the difference between the year-end exchange rate and the exchange rate at the date of acquisition, has been eliminated by carrying the difference directly under the Group's equity.

The Group protects the equity of subsidiaries outside Finland by the so-called equity-hedging method. The rate-of-exchange discrepancies applicable to the hedging in the Group's consolidated financial statements are entered under equity against the conversion discrepancy related to subsidiary equity.

### **FOREIGN-CURRENCY ITEMS**

Receivables and liabilities denominated in foreign currencies have been valued using the exchange rate quoted on the balance sheet date. Exchange rate differences arising from the valuation of receivables and liabilities are entered in the income statement under financial exchange rate differences. Unhedged transactions denominated in foreign currency are recorded at the rates prevailing on the transaction dates and hedged transactions are recorded at the hedged rate.

The Group hedges its exposure in foreign currencies with derivatives. The interest element applicable to the derivatives is accrued as interest income or expense over the period to maturity, and the exchange rate differences are recorded under financial exchange rate differences. Open hedging instruments are valued according to the exchange rate quoted on the balance sheet date and are recorded in the income statement, with the exception of foreign-exchange gains or losses on instruments that hedge the Group's future cash flow; these are entered in the income statement once the underlying income or expense occurs.

## **NET SALES**

Net sales is calculated as gross sales revenue minus, among other things, indirect sales taxes and discounts.

## RESEARCH AND DEVELOPMENT EXPENSES

All research and development expenses have been charged against the year they occurred.

## PENSION ARRANGEMENTS

In Finland, statutory pension insurance is handled through pension insurance companies. Non-current pension liabilities predating the current pension legislation were entered under extraordinary expenses in the income statement and under mandatory reserves in the balance sheet. In non-Finnish subsidiaries, insurance has been provided in accordance with the legislation and practices prevailing in each country. Pension liabilities which have not been accounted for as extraordinary expenses in the income statement or as mandatory reserves in the balance sheet have been presented as other liabilities external to the balance sheet. The Group does not have its own pension fund.

#### **WARRANTY EXPENSES**

The estimated future warranty expenses of delivered products have been entered as current liabilities. Actual warranty expenses, reckoned as the change in warranty liability, have been charged against the net result for the year.

### INVENTORY VALUATION

Inventories are valued according to their acquisition price, resale price or probable selling price, whichever is lowest, using the FIFO principle. The value of the inventories of the Group companies includes the indirect costs of acquisition and manufacturing, as well as the direct cost of acquisition.

## **VALUATION AND DEPRECIATION OF FIXED ASSETS**

Fixed assets are capitalized using their original acquisition price minus planned depreciation. The balance sheet values of land and buildings include revaluations. The Group companies have not capitalized interest expenses under fixed assets. Planned depreciation has been calculated straight-line on the basis of the original acquisition cost and the asset's economic lifetime, as follows:

| • | Buildings               | 20-30 years |
|---|-------------------------|-------------|
| • | Machinery and equipment | 5-10 years  |
| • | Other                   | 3- 5 years  |
| • | Roads                   | 40 years    |
|   |                         |             |

Land and water areas are not depreciated.

## LEASING

Leasing costs are carried as rental expenses. The lease agreement's remaining contractual term and possible remaining value are presented as a lease liability. Property under financial lease is reported as lease liabilities and the important financial-lease properties are presented in the notes to the financial statements.

## **REVALUATION**

Pre-1974 revaluations of land areas are included in the book value for those land areas, while revaluations made since 1974 are presented as a separate item in the balance sheets, under tangible assets. The counter item is the revaluation fund. At the date of sale the revaluations of the land areas are eliminated.

#### EXTRAORDINARY INCOME AND EXPENSES

Income and expenses originating in significant structural changes and divestitures external to actual operations as well as changes to accounting principles are presented as extraordinary income and expenses.

### **APPROPRIATIONS**

The appropriations consist of voluntary reserves and accumulated depreciation. In the Group income statement, the change in the Group companies' appropriations are allocated to the result for the period and to the change in deferred tax liability. In the Group balance sheet, the Group companies' appropriations are allocated to the shareholders' equity and the deferred tax liability. The portion of the appropriations entered under shareholders' equity is not included in the Group's distributable assets.

### MANDATORY RESERVES

Items which constitute contractual or otherwise binding obligations, but which have not yet been liquidated, are presented in the balance sheet as mandatory reserves. These may include such things as the Group's uncovered pension liability and expenses of restructuring. Changes in mandatory reserves are incorporated into the income statement.

## **INCOME TAXES**

In the income statement, taxes on Group companies income for the period on the basis of local tax regulations, adjustments in taxes for prior periods and deferred taxes, are entered as income taxes. Taxes falling under extraordinary items are described in the notes to the financial statements.

A deferred tax liability or refund is calculated for temporary discrepancies between the tax assessment and the financial statement, utilizing the tax rate approved for upcoming years as of the balance sheet date. The balance sheet includes the deferred tax liability in its entirety, while the deferred tax refund is calculated according to the estimated probable size of the refund.

Proposal of the Board for 2000
 General untaxed reserves have been divided into retained earnings (59-72%) and deferred tax liability (28-41%) according to the current tax rate of each country.
 Interest free liabilities also include provisions. The corresponding figures for previous years have been adjusted accordingly.

# Calculation of Key Ratios

Value added Operating result before depreciation + salaries and benefits + rental costs

Financial result Result before appropriations and taxes + planned depreciation -

decrease in Group reserves - direct taxes from operations

Net working capital Non-interest bearing current assets + inventories - current non-interest bearing liabilities

Return on net assets (RNA) Result after financial items + interest and other financial expenses x 100

Average(Balance sheet total - non-interest bearing liabilities)

Return on equity (ROE) Result before extraordinary items - taxes from operations x 100

Average (shareholders' equity + minority interest)

Equity ratio Shareholders' equity + minority interest x 100

Total assets - advances received

Gearing Interest bearing liabilities - cash and bank and other investments × 100

Shareholder's equity + minority interest

Quick ratio Current assets

Current liabilities - advances received

Current ratio Current assets + inventories

Current liabilities

Earnings per share (EPS) Result before extraordinary items - minority interest - taxes from operations

Average number of shares

Cash flow per share Result after financial items + depreciation - taxes from operations

# Financial risk management

At Hackman, financial risk management is based on a Boardapproved risk policy which establishes a framework for hedging operations and enables Hackman to take exchange rate and interest rate positions within specified risk limits.

#### INTEREST RATE RISK MANAGEMENT

Hackman's long-term objective for managing the Group's exposure to interest rate risks is to minimize financing expenses within specified risk limits. Hackman's interest rate exposure arises primarily from the Group's debt and investments, and from cash flows from business operations. The currencies that currently are the most significant in this respect are the euro and the Swedish krona.

In hedging its interest rate exposure, Hackman strives to keep the risk as close as possible to the position deemed neutral. A position is considered neutral when it can be expected that a change in the Group's interest expenses resulting from movements in the general level of interest rates will be compensated for by a simultaneous change, in the opposite direction, in the Group's business performance. Interest rate risk is managed using GAP analysis. The average term of the debts has to be at least 12 months.

#### **EXCHANGE RATE RISK MANAGEMENT**

The purpose of exchange rate risk management is to limit the impact of exchange rate movements on the Group's cash flow and shareholders' equity. Hackman's exchange rate exposure arises from the Group's cash flows, receivables, or debts denominated in, or otherwise affected by, foreign currencies. Finished products in Hackman's core business areas are for the most part priced and invoiced in the local currencies. Movements in the Swedish krona against the euro constitute the most material risk to Hackman's business. Other significant currencies are the Norwegian krone, Danish krone and U.S. dollar.

The shareholders' equity of foreign subsidiaries also poses a material exchange rate risk to the Group. The principal exposure in this respect is in the Swedish krona.

The Group's exposure to exchange rate risks is monitored respective to each Group company, against several base currencies, on the basis of the net foreign exchange exposure, which includes the aforementioned risk factors. The risk is hedged primarily by netting currency flows. The Group companies hedge their net exposures through the Group Treasury. The risk involved in any open position is

hedged with forward foreign exchange agreements and currency options. The maturities of the contracts used to hedge cash flows from business operations do not exceed 12 months.

Extensive hedging against movements in exchange rates is not possible or even practical in countries whose currencies lack the advanced money markets in which sophisticated hedging operations are available. Such countries include Russia, Hungary and Poland. This circumstance does not however expose the Group to material exchange rate risks.

#### **CREDIT RISK**

Credit risk in financing arises from cash investments and the credit risk involved in derivative contracts. The credit risk arises from the potential failure of the counterparty to meet its contractual obligations. The amount of risk thus depends on the counterparty's creditworthiness. Hackman seeks to minimize credit risk by entering into derivative contracts with financial institutions and brokers within the approved credit limits.

#### LIQUIDITY RISK

The Group strives to maintain adequate liquidity with credit facilities and a commercial paper program. Cash funds are invested according to the finance policy, in instruments with low credit risks.

#### REFINANCING RISK

Refinancing risks are minimized by ensuring that the loan portfolio's proportion of long-term loans is adequate and that the maturities of those loans are sufficiently long.

# Share Capital, Shares and Shareholders

Hackman Oyj Abp's stock is listed on the Helsinki Stock Exchange since June 1994. Public quotation of Hackman stock began in July 1988, on the Helsinki OTC Exchange.

The paid-in and registered share capital of Hackman Oyj Abp totals EUR 14 960 000.00. According to the company's articles of incorporation, Hackman's minimum capital is EUR 11 245 500.00, and its maximum capital is EUR 33 583 500.00. Within these limits, share capital may be adjusted without amending the articles of incorporation.

Hackman Oyj Abp's shares have a face value of EUR 3.40 and are divided into two types: A shares and K shares. There are 3 582 500 A shares, representing 81.4% of the total shares outstanding. Each A share entitles its holder to one vote at the annual meeting of shareholders. There are 817 500 K shares, representing 18.6% of all outstanding shares. Each K share entitles its holder to 20 votes at the annual meeting of shareholders. The articles of incorporation include a repurchasing clause, according to which the company and the other K share holders enjoy the right of first refusal if K shares would otherwise come into the possession of a party other than a descendant of Commercial Counsellor Wilhelm Hackman or Consul Carl Edvin Julius Ekström.

According to the articles of incorporation, no shareholder may exercise more than 10% of the voting rights represented at the annual meeting of shareholders.

The articles of incorporation also provide that, in the event of a stock issue, K shareholders may purchase new K or A shares, while A shareholders may only purchase new A shares.

K and A shares entitle their holders to the same dividend rights.

#### **BOARD'S AUTHORITY FOR STOCK AND CONVERTIBLES**

During 2000, the Board of Directors of Hackman Oyj Abp did not have authority to increase the capital stock, or to

issue any options or convertibles; nor did the company have any options or convertibles on the market during the year.

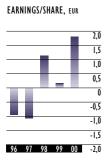

#### OPTION PROGRAM FOR KEY GROUP PERSONNEL

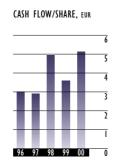

The regular annual meeting of shareholders decided in 1998, to issue options in an amount not to exceed EUR 0.5 million to key personnel. The Board of Directors was authorized to attend to the distribution of the option rights. A maximum of 150 000 options may be issued to specified persons, entitling the holders to subscribe to a total of 150 000 A shares of Hackman Oyj Abp. Of the 150 000 option rights 75 000 will be marked with the letter A and 75 000 with the letter B.

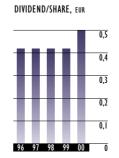

The Board of Directors decided in 1998 to grant 50 key persons the right to subscribe to options. The subscription period will begin in stages, on May 1, 2001, and May 1, 2003, assuming that HackmanGroup's result after financial items exceeds EUR 12.6 million in the last financial statements approved before the subscription period. The subscription period for all option certificates will end May 31, 2005. The subscription price will be EUR 42.21 per share. The amount of cash dividends distributed after May 1, 1998, but before the subscription, will be deducted from the subscription price per share. The subscription price per share will not be less than the share's face value, however.

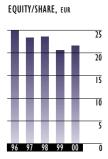

#### MANAGEMENT HOLDINGS

The members of the Board of Directors owned a total of 25 000 K shares and 87 110 A shares in the end of December 2000. This represented 2.9% of the company's total voting rights. Members of the Group Executive Board held 5 591 A shares, carrying less than 0.1% of the company's voting rights.

#### **DIVIDEND DISTRIBUTION POLICY**

The company has no approved dividend distribution policy. In making its recommendation to the annual meeting of shareholders, the Board of Directors considers both the long-term result trend and the company's financial situation. In conformity with the prevailing practice, the annual meeting of shareholders decides each year on the dividend to be distributed.

#### SHAREHOLDER AGREEMENTS AND OTHER COMMITMENTS

The company has not concluded, nor is it aware of, any shareholder agreements respecting shares, or any other commitments respecting the ownership of the company or the exercise of voting rights.

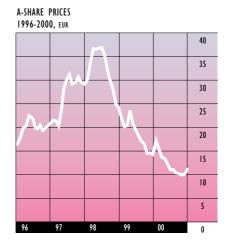

#### SHARE HOLDINGS, PRICE AND TURNOVER

According to the book-entry system, Hackman Oyj Abp had 2 419 shareholders as of December 31, 2000. Nomineeregistered and foreign-owned shares totaled 808 475, representing 18.4% of all shares and 9.2% of the voting rights.

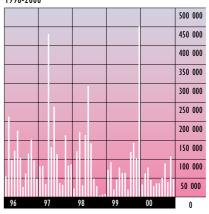

In 2000 a total of 649 671 A shares (1999: 1 261 750), representing 18,1% of all A shares outstanding, changed hands. The turnover had a total value of EUR 7.7 million (EUR 21.1 million).

The price of Hackman A shares reached its 2000 low of EUR 9.06 in October and its 2000 high of EUR 18.80 in January. At the end of 2000 the share price was EUR 11.30. The total market value of all shares was EUR 49.7 million. The average share price for the year was EUR 11.87.

HackmanGroup adapts in its activities to the Insider Guidelines of the Helsinki Exchanges.

# **Auditors' Report**

#### To the shareholders of Hackman Oyj Abp

We have audited the accounting, the financial statements and the corporate governance of Hackman Oyj Abp for the financial period 1.1. - 31.12.2000. The financial statements, which include the report of the Board of Directors and the consolidated and parent company income statements, balance sheets and notes to the financial statements have been prepared by the Board of Directors and the Managing Director. Based on our audit we express an opinion on these financial statements and on corporate governance.

We have conducted our audit in accordance with Finnish Standards on Auditing. Those standards require, that we perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining on a test basis evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management as well as evaluating the overall financial statement presentation. The purpose of our audit of corporate governance is to examine that the members of the Board of Directors and the Managing Director have legally complied with the rules of the Companies Act.

In our opinion the financial statements, which for the parent company show a profit of EUR 27 566, have been prepared in accordance with the Accounting Act and other rules and regulations governing the preparation of financial statements. The financial statements give a true and fair view, as defined in the Accounting Act, of the consolidated and parent company's results of operations and financial position. The financial statements and consolidated financial statements can be adopted and the members of the Board of Directors and the Managing Director of the parent company can be discharged from liability for the period audited by us. The proposal by the Board of Directors regarding the distribution of retained earnings is in compliance with the Companies Act.
