## Review by the Managing Director

The past year has as a whole been most satisfactory for the Kaso Group. Turnover grew by almost twenty percent, while operating profit more than doubled. The security product and subcontracting sectors did well, but the plastic product sector's result showed a significant loss. Large investments in production were also started last year in the security product sector and are continuing this year.

Turnover for the security product sector grew as a result of good domestic sales. Our investments in the KASO brand have produced results in domestic markets. In addition, an active and systematic implementation of a new customer management system has been the key to more productive business. Our customer base has been extended, while our market share has grown. On the other hand, export activities have stagnated over the past years, and therefore changes are inevitable in export operations. Investments in product development are finally starting to bear fruit. The first official burglary and fire tests on the new generation of safes have been successfully accomplished. The safes will be in production in the autumn and more models will be introduced on the market at the turn of the year. We believe that we will achieve success with these products in new markets as well. Another significant new product is the clothes cabinet model with particular attention in design being paid to the requirements for cleaning in company staff facilities. It's marketing was started up during late winter. Development of production continued last year by investing in new sheet processing machinery and a new surface treatment line, which will start up in the beginning of March. Long-term considerations continue to be the cornerstone of our activities. Our competitiveness is based on active marketing as well as on new, more competitive products. All in all, investments in the future still continue to be large.

Our operations in the USA started to make a significant profit during the previous year. This positive trend was especially affected by two large one-off projetcs, which were carried out during the spring and summer. In addition, improved demand in the major customer sector substantially raised production quantities. During the autumn, however, profits were impaired by modifications to the models made by the principals, which caused breakdowns in our production. The customer base has been extended, but it will take some time before a large increase in production quantities and profit can be expected. During the first months of the present year the surface treatment equipment was renewed, which will enable an extension of the customer base. Investments in production will also continue during the present year.

The problem with the plastic product sector continues to be that growth in turnover has not been achieved. Our investments in marketing personnel have not met targets and we have had to adjust fixed costs. The strategy-based division of the product range into the Palaset line (hangers, baskets, desktop) and the Piggies campaign products (money boxes, key rings) continues to be the operating principle. Extending the customer base, developing the product range and upscaling automation constitute the chief means of turning the result into profit. Systematic development and more active marketing are the keys to extend the customer base and improve profitability. Several new products are being introduced to the market this year. The Palaset and Piggies lines are being supplemented with clothes hangers and new customer-oriented money box models. During the past years production machinery has been renewed and automation increased, and this will continue in the future as well.

Management of the three separate divisions continues to be a tough challenge in our Group. The pressures of change affecting our business environment have increased continuously. This requires a greater willingness from us to anticipate the future and the courage to implement the measures that are expected of us by the customers and shareholders. Continuous improvement only occurs through change. Our aim is to be the best alternative for the customer for the products in each of our sectors. This requires us to have a firm, positive attitude as well as the desire to strive towards this objective. The prerequisites are good, as basically things are in a good state in each sector. Our most essential aim still remains to focus on core competences and to simplify operating processes. Long-term, systematic operations are the key to success now and in the future.

Helsinki, March 2001

Jari Bachmann Managing Director

### Report by the Board of Directors

For the accounting period 1.1.2000-31.12.2000

### GROUP STRUCTURE AND BUSINESS ACTIVITIES

The Kaso Group's operations are divided into three business sectors, which are:

Security Products (Kaso Oy, Kaipio Oy) Subcontracting and automated storage systems (Fab-Tech Ind.Inc.) Plastic Products (MK-Tresmer Oy) The Parent Company, Kasola Oyj, is responsible for the Group's financial management.

The subsidiary of MK-Tresmer operating in the UK was closed down.

Consolidated turnover amounted to FIM 109.2 m, which represents a growth of FIM 16.3 m on the previous year. Turnover was increased by the USA operations and the strong dollar. Turnover by company was divided as follows:

|                            | FIM, k         |
|----------------------------|----------------|
| Kasola Oyj                 | 4,101          |
| Kaso Oy                    | 38,488         |
| Kaipio Oy                  | 10,711         |
| Fab-Tech Ind.Inc.          | 39,076         |
| MK-Tresmer Oy              | 22,633         |
| MK-Tresmer Ltd.            | 1,010          |
| - internal turnover        | <u>- 6,810</u> |
| Consolidated turnover tota | l 109,209      |

Operations abroad accounted for 58 % of the turnover (52 %) and the orderbook at the close of the financial year amounted to FIM 11.6 m (FIM 11.5m).

#### THE SECURITY PRODUCT SECTOR

Domestic markets showed a positive trend last year. Building continued to burgeon, which substantially raised the demand for our products. Targets were again not met in export markets. Apart from some Eastern European markets results remained poor. Turnover amounted to FIM 47.5 m (FIM 43.4 m) and operating profit to FIM 6.3 m (FIM 5.2 m). Average staff numbered 67 employees (66). Our aim continues to be to increase our market share in Finland. Domestic marketing activity has grown due to the new operating models and operations have become more systematic due to a customer management system. The number of co-operation partners has grown, while new financing alternatives have increased interest in our products among customers.

In spring 2000 we started an investment programme in production, the first stage of which was to renew

Kaso's sheet processing equipment. The next stage, starting in January 2001, was to renew the coating line. This caused a brief halt in production, but the new line was started up in the beginning of March. The initial burglary and fire tests for a new generation security product were successfully passed and our aim is to start marketing in the beginning of the autumn. Marketing of the new tested clothes cabinet model was started during the spring. The most important product improvement is the sloping roof of the cabinet, which facilitates cleaning in staff facilities. In addition it is simple to connect the cabinet to the building's airconditioning system. The main focus of product development remains to be on the new generation security product and our aim is to upgrade the model into higher burglary security classes.

### SUBCONTRACTING AND AUTOMATED STORAGE SYSTEMS

Turnover grew by over 70% on the previous year. This was due to improved markets for our main principal and to two major projects, which comprised supplying Fuji Film with an industrial carousel storage system as well as a demanding subcontracting job for National Gypsum. Offers were tendered much more vigorously last year, and several orders were won from new manufacturing principals. Our principals' product lines were renewed to a great extent during the previous year. Modifications made by customers accumulated during the second half of the year, thus weakening the profits. This will further affect our profit for the first third of the present year. Turnover amounted to FIM 39.1 m (FIM 22.6 m) and operating profit to FIM 3.4 m (-FIM 2.1 m). Staff numbered on average 56 (53).

This year installation of new surface treatment equipment was carried out. This investment will provide us with new potential for winning new customers. In addition, in February we acquired a new bevelling machine to improve our throughput times and increase capacity. The most important aim is to further extend the customer base and improve profitability.

#### THE PLASTIC PRODUCT SECTOR

The past year was one of heavy loss for the plastic product sector. This was due to a drop in turnover, which was not possible to halt. Marketing efforts did not produce results, which meant that expenditure, despite reorganisations, is too large. The Palaset product line achieved a positive success in export markets. Domestic sales, however, did not meet targets. Sales for the Piggies product line continued to diminish. Turnover fell by 16% on the previous year to FIM 22.7 m (FIM 26.9 m).Profitability considerably weakened in relation to the previous year with operating loss amounting to -FIM 1.5 m (FIM 0.7 m). Staff was on average 56 (59). In marketing it was not possible to attain adequate results by increasing sales staff. Sales prospects for new products are, however, positive. Investments to improve production continued according to plan.

#### **PROFITABILITY AND FINANCING**

Profitability based on operating profit showed a clear improvement during the previous year. Both the security product and the subcontracting sectors performed well. On the other hand, operating profit for the plastic product sector collapsed, considerably reducing the Group's profit. Operating profit amounted to FIM 7.7 m, whereas it was just FIM 3.2 m for the previous year. Depreciations amounted to FIM 6.6 m, increasing slightly on the previous year due to investments on machinery and equipment. Financing expenditure remained at the level of the previous year. Liquidity was good for the entire year. Interest-bearing liabilities stood at FIM 50.4 m (FIM 51.3m) at the end of the year. The equity ratio was 48.4 % (46.4%).

#### **INVESTMENTS**

Investments grew considerably on the previous year, amounting to FIM 7.4 m (FIM 4.2 m). Investments in the security product sector were mainly directed at sheet processing machinery in production. There were no investments on machinery and equipment in the subcontracting sector last year. A new injectionmoulding machine with automation was aquired in the plastic product sector. Investments in production will remain at a high level during the present year as well, as investments on the coating line, started at the beginning of the year, will rise to FIM 5 m.

#### **PRODUCT DEVELOPMENT**

The first safes in the new generation of the security product family have been burglary and fire tested. The safes will be introduced on the market at the beginning of the autumn. An extension of the product family will take place at the beginning of next year. Although we have had to be flexible with the schedule, we believe the products will fulfil the targets placed on them. A significant improvement in the new model of clothes cabinets is its air-conditioning capability to comply with building regulations. The cabinets can be connected to the buildings' automatic air-conditioning system. The new sloping roof model also facilitates cleaning the cabinets and facilities. Expenditure on product development for the security product sector amounted to FIM 2.2 m. Actual expenditure on product development in the subcontracting sector came to only FIM 0.6 m. Product development in this sector was

mainly focused on improving the design and functionability of customer products. The plastic product sector introduced a new clothes hanger and a key ring on the market.

There are several new projects in progress and new products will be on the market during the year. Expenditure on product development for the plastic product sector amounted to FIM 0.8 m.

#### ADMINISTRATION

The Parent Company's Board of Directors comprise Heikki Bachmann (Chairman), Claes Charpentier, Jaakko Mattila, Juha Oikarinen and Jari Bachmann. Jari Bachmann is the corporate president. The auditors are Tilintarkastustoimisto Idman & Vilén Oy, Authorized public accountants with Markku Uotinen, Authorized public accountant, as the auditor in charge.

#### **BOARD AUTHORISATION**

The Board has no currently valid authorisation concerning increasing share capital, granting option rights, taking out convertible debentures or acquiring or transferring its own shares.

#### FUTURE PROSPECTS

The market outlook for the beginning of the year has somewhat weakened in all sectors. Ongoing investments on coating lines at Kaso Oy and Fab-Tech Ind.Inc. are reducing our turnover and impairing our profit for the first third of the year. As a result profit for the entire first part of the year will show a loss. We nevertheless believe that both turnover and profit will improve substantially during the next two thirds of the year. In addition new products placed on the market and investments in production will enhance our competitiveness. Investments in developing the business have, however, been exceptionally large during the first part of the year, which will result in profit for the entire year being down on the previous year.

### Notes to Financial Statements

#### ACCOUNTING PRINCIPLES

#### Companies included in consolidated accounts

The Group comprises the parent company, Kasola Oyj, and the subsidiaries Kaso Oy, Kaipio Oy, MK-Tresmer Oy, the USA-based Fab-Tech Industries Inc. and MK-Tresmer Ltd. based in the UK.

#### **Consolidation principles**

The consolidated accounts have been drawn up using the acquisition accounting method. The difference between the acquisition price of the shares in the subsidiaries and the shareholders' equity has been presented under Group goodwill. Minority interest has been recorded separately from Group shareholders' equity and profit and displayed as an item in itself.

Intragroup receivables and payables, internal margins included in inventories, sales and purchases and other incomes and expenditures between the companies have been eliminated.

#### Transactions denominated in foreign currency

Receivables and liabilities denominated in foreign currency have been translated into Finnish marks using the exchange rates at balance sheet date.

The exchange rate differences for receivables and payables have been entered in the profit for the accounting period.

The translation difference in shareholders' equity between the balance sheet date and the moment of acquisition of the shares in subsidiaries has been entered as a separate item in shareholders' equity. The income statements of overseas subsidiaries have been translated into Finnish marks using the exchange rates at balance sheet date.

#### Valuation of fixed assets

Fixed assets have been recorded in the balance sheet at acquisition cost less depreciation according to plan. Depreciation according to plan has been calculated on a straight-line basis according to the estimated useful life of the assets. The period for depreciation takes into account the first use of the asset. The book value of shares in subsidiaries based on acquisition cost have been reduced to comply when necessary with the going value.

| The periods for depreciation are as follo | ows:        |
|---|-------------|
| Buildings                                 | 30-40 years |
| Machinery and equipment                   | 5-10 years  |
| Other long-term expenditure               | 5-10 years  |
| Goodwill                                  | 5-15 years  |

#### Valuation of inventories

Items recorded under inventories have been valued according to FIFO principles at acquisition cost or at the lower of replacement cost or probable market price. The acquisition cost of own manufacture under inventories has been set according to acquisition or direct manufacturing costs.

The value of inventories for the subsidiary operating in the USA takes into account the share of indirect acquisition and manufacturing costs.

#### **Research and development expenses**

Research and development expenditure has been entered as an annual expense for the year the expenditure was incurred.

#### Accrued pension expenses

Pension cover for staff in Group companies has been managed by pension companies.

#### **Deferred** taxes

Deferred tax liability or receivable has been calculated according to the timing differences between taxation and the annual accounts using the confirmed tax rate at balance sheet date.

Subordinated loan:

The subsidiaries have been granted a product development capital loan of FIM 1,850,000, of which FIM 1,167,000 has been raised. The company has a capital loan of FIM 1,167,000. The principal terms are:

- the loan period is eight (8) years, of which the first three are exempt from repayments.

- the capital may only be otherwise returned if there is complete cover for restricted shareholders' equity in accordance with the company's confirmed balance sheet for the last completed accounting period.

- interest can only be paid if the amount payable can be used for distribution of profits in accordance with the company's confirmed balance sheet for the last completed accounting period.

The loan will be paid on an annuity basis within five years starting 2003 provided that the above mentioned terms are fulfilled. Interest rate for the loan is one percent below the base rate valid for the period, however at least 3.0 percent. Accumulated interest, not recorded as expenditure, amounts to FIM 27,961.30.

## Auditors' Report

To the shareholders of Kasola Oyj

We have audited the accounting, the financial statement and the corporate governance of Kasola Oyj for the period 1.1.2000 - 31.12.2000. The financial statements, which include the report of the Board of Directors, consolidated and parent company income statements, balance sheets and notes to the financial statements have been prepared by The Board of Directors and the Managing Director. Based on our audit we express an opinion on these financial statements and on corporate governance.

We have conducted the audit in accordance with Finnish Standards on Auditing. Those standards require that we perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining on a test basis evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by the management as well as evaluating the overall financial statement presentation. The purpose of our audit of corporate governance is to examine that the members of the Board of Directors and the Managing Director have legally complied with the rules of the Companies 'Act.

In our opinion the financial statements have been prepared in accordance with the Accounting Act and other rules and regulations governing the preparation of financial statements. The financial statements give a true and fair view, as defined in the Accounting Act, of both the consolidated and parent company's result of operations as well as of the financial position. The financial statements with the consolidated financial statements can be adobted and the members of the Board of Directors and the Managing Director of the parent company can be discharged from liability for the period audited by us.

The proposal by the Board of Directors regarding the distribution of retained earnings is in compliance with the Companies' Act.
