### Componenta's financial information on web in 2003

Componenta's financial information can be obtained also on the Internet. In addition to this printed Annual Report the company will publish a Web Annual Report in Finnish and in English at the address www.componenta.com.

Besides the financial information the Group's Internet pages include much information related to the company itself and its business, for example:

- Corporate Strategy
- Corporate Governance
- Personnel
- Environment
- Business

Information about Componenta Corporation shares is available on the Internet page of the Helsinki Exchanges <u>www.hex.fi</u>.

#### Annual Shareholders' Meeting

The Annual Shareholders' Meeting of Componenta Corporation will be held at 2.00 pm on 12 February, 2003.

#### Interim reports

In 2003 Componenta Corporation will publish interim reports in Finnish and English as follows:

| January - March     | 14 April 2003   |
|---------------------|-----------------|
| January - June      | 11 July 2003    |
| January - September | 15 October 2003 |

From the beginning of 2003 the annual and interim reports will not be mailed automatically. Reports and releases can be read immediately after publishing on the Group's Internet pages at the address <u>www.componenta.com</u>. On these pages you can also order them to your own e-mail address. The printed reports can be ordered by telephone +358 9 2250 2701 or by e-mail ir.componenta@componenta.com.

#### **Casting Future Solutions**

2002 was a year full of uncertainty. At the start of the year industrial investments were still depressed. The markets had been shaken by the events of the previous autumn, but during the spring they picked up momentarily, bringing an increase in our order books. But this improvement did not last long. Demand and order volumes in the business sectors of Componenta's customers fluctuated greatly during the year, and this was reflected in the operations of our foundries and machine shops. In the spring we took into use extra production shifts to raise capacity, and only a few months later many units needed to reduce the number of shifts and to cut personnel.

Componenta Group's net sales in 2002 were lower than in the previous year. This was due not just to the state of the market but also to the divestment of two units during the year 2002.

The decision to close down loss-making Componenta Osby had already been taken in the previous year and the machine shop ceased operations in May 2002. Componenta Traryd, which was not part of the Group's core operations, was sold in the autumn.

The decline in the order book and the variations in the amount of work resulted in low profitability and a poor result all through the year. To improve the result, towards the end of 2002 a programme of remedial action was started throughout the Group. This involved drawing up a savings programme to cut costs across the Group, and in addition each business unit set its own savings target. Personnel agreed to for example take leave instead of holiday pay, and some units had to lay people off. All but the most essential investments were put on hold, and many activities will in the future be carried out at lower cost than in the past. A major element of the restructuring programme involves examining the profitability of the product structure. We believe that the steps being taken will result in increased profitability and an improved result even in the spring of 2003.

During 2002 Componenta completed a strategy review. We examined and updated the Group's business strategy and the strategies for the Business Chains, and set strategic goals for the years 2003 – 2006. We also prepared a HR strategy, setting goals for HR management and development. The process differed this time from previous reviews since it involved a bigger number of Componenta personnel from all personnel groups and all business units in drawing up the strategy. Matters relating to the strategy were reviewed and discussed with the people who play a key role in implementing it. The result of the process was that we agreed on actions that will enable Componenta to become a company that is the preferred engineering co-operation partner by 2006.

The goals are ambitious but at the same time realistic. Part of Componenta's strength lies in the wide-ranging knowhow and strong professional skills of its personnel. Many of our business units have long traditions and they possess indepth knowledge and skills in casting and machining. Combining these with new technology and ongoing R&D, we can offer customers competitive components and solutions today and in the future.

At the end of 2003, it will be 85 years since the founding of Rauta- ja metallivalimo Suomi (Iron and Metal Foundry Finland), from which the modern Componenta has developed. Over the years the casting industry has made tremendous advances and much has changed. Componenta has become a strong expert in foundry and machine shop operations – casting future solutions. One thing has not changed, however. Understanding the needs of customers better than competitors was the business idea of the company's founder, the machine shop engineer Matti Lehtonen, and still holds good in our operations today.

### Report by the Board of Directors

The weak performance of the global economy in 2002 coupled with increased uncertainty about demand reduced Componenta Group's sales and weakened the Group's result. In consequence of the weaker performance and the uncertainty about demand, the Group initiated a programme to adjust cost and product structures. This is estimated to improve the Group's operating profit by more than EUR 6 million in 2003. The cost structure has been enhanced through programmes to raise productivity at individual units and by cutting fixed costs. These actions account for two thirds of the programme. The programme to adjust the product structure includes optimizing production processes and correcting unhealthy price structures.

The Group reinforced its financing structure through an issue of preferred capital note in February. The preferred capital note is effective at the latest until 2009.

Componenta Group had net sales in 2002 of EUR 180.8 million (net sales in the previous year were EUR 193.8 million, net sales declined 7%). The Group had an operating profit of EUR 7.0 (8.3) million and a loss after financial items of EUR 2.1 million (profit of EUR 2.3 million). Low sales in the first quarter and increased net financial costs reduced the Group's result from the previous year's level.

The Board of Directors proposes to the Annual Shareholders' Meeting that a dividend of EUR 0.10 per share will be paid.

#### Market

The year 2002 was characterized by uncertainty about developments in the global economy. Many industrial sectors had unused capacity, which reduced the need for manufacturers to invest. However, the differences in developments between individual sectors and between individual companies were considerable.

Demand for heavy trucks in Europe continued to fall throughout 2002, and total demand was more than 10 per cent down on the previous year. Heavy truck production declined by about 6% in Europe. Componenta's delivery volumes to the heavy truck industry were six per cent lower than in the previous year. Componenta's sales followed general trends closely, despite the steps taken during the year to eliminate nonprofitable products. Demand from the energy and power transmission sector was lower in the final quarter than in the same period in the previous year. Sales were affected by changes in the product structure of wind generator customers, which means that in future sales will focus on larger units. Sales increased, however, by 3% during 2002. The purchase of Componenta Nisamo in the summer of 2001 contributed to this improvement.

Output by Nordic machinery and equipment manufacturers declined in 2002, a consequence of low demand for investments in export and domestic markets. The sector has much unused capacity. Cast and Other Components' deliveries to machine building industry fell 8% in the final quarter of 2002 from the final quarter in 2001. Componenta's sales to machinery manufacturers were 17% lower in 2002 than in the previous year.

Demand from European off-road manufacturers in 2002 was lower than in the previous year. Componenta's deliveries to off-road manufacturers, however, grew slightly in the final quarter compared to the same period in the previous year. For the whole year sales were 5% down on the previous year, due to the weak sales performance at the start of the year.

#### Changes in Group structure

In September Componenta sold the operations of metal foundry Componenta Traryd, which was not part of the core business, in an MBO to the company's operative management consisting of Chairman of the Board Antti Lehtonen, Managing Director Bo Rosengren and Finance Manager Gunnar Blomberg. The selling price was EUR 4 million. Componenta continues to participate in Traryd's business as a financier.

Karkkilan Konepaja Oy, Componenta Rauma Oy and Karkkilan Vanha Valimo Oy merged with Componenta CPC Oy on 30 September 2002.

#### Net sales and order book

The Group had net sales in the January – December review period of EUR 180.8 (193.8) million. Net sales fell 7% from the previous year. The Group's order book at the end of the review period on 31 December 2002 stood at EUR 24.9 million (EUR 26.5 million on 31 December 2001). Net sales in the final quarter of the year totalled EUR 44.5 (46.2) million, a fall of 4% from

#### the previous year.

Exports and foreign operations accounted for 72% (72%) of the Group's net sales. Net sales by market area were as follows: Finland 28% (28%), other Nordic countries 53% (52%), Central Europe 17% (18%) and other countries 2% (2%).

Cast and Other Components had net sales of EUR 148.7 (158.4) million, or 82% (82%) of the Group's net sales.

Net sales by customer business sector were as follows: heavy truck industry 54% (54%), power and transmission industry 14% (13%), machine building industry 15% (16%), off-road industry 12% (12%) and other 5% (5%).

#### Result

Componenta Group had an operating profit of EUR 7.0 (8.3) million, and a loss after financial items of EUR 2.1 million (profit of EUR 2.3 million). The result includes EUR 1.8 (1.2) million in net profit from the sale of noncurrent assets and other non-recurring items. The remaining amount of the negative goodwill generated in 2001 in the restructuring of the Group was recognized in the final quarter of the year. A total of EUR 2.9 (12.3) million of negative goodwill was recognized as income during the year.

The Group's net financial costs totalled EUR 9.1 (6.0) million. Financial costs increased mainly because the 2001 financial costs do not include interest on preferred capital notes (EUR 1.6 million). Another factor in the increase was the EUR 0.4 million currency exchange losses. The Group's net profit was EUR 1.0 (7.4) million.

The income taxes for the review period were EUR 3.1 (5.0) million positive. This consists partly of the reduction in deferred tax liability through the reversal of accelerated depreciation and partly of the change recorded in deferred tax receivables for the losses for the financial year and for confirmed losses. The prudence principle was followed in recording the deferred tax assets.

The earnings per share were EUR 0.11 (0.77).

Closing the Osby machine shop and the transfer of products to other Componenta units took place largely according to plan. Some 60% of Osby's production was transferred to other units in the Group. The costs for closing the unit were, however, EUR 0.7 million higher than had been estimated in 2001. Production was terminated at the unit in March and operations ceased entirely in May.

#### Cast and Other Components

The Cast and Other Components business group, which forms the Group's core business, supplies ready to install cast and machined components to heavy truck industry, power and transmission industries, machine building industry and off-road industry.

Cast and Other Components had net sales in the period January - December of EUR 148.7 (158.4) million and an operating profit of EUR 5.8 (8.7) million. The order book on 31 December 2002 stood at EUR 19.6 (22.0) million. Net sales in the fourth quarter were EUR 36.4 (38.5) million and the operating profit was EUR 1.5 (1.1) million.

The fall of EUR 9.7 million in sales from the previous year and the restructuring actions taken had a major impact on the result for the whole year, resulting in lower capacity usage. The Alvesta unit was still loss-making, even though its result improved from the previous year.

#### Other Business

Componenta's Other Business consists of operations that are not part of the Company's core operations, such as the Wirsbo forges, associated companies, the Group's support functions and service units, as well as divested businesses. The way of grouping operations has been changed from the previous year because a detailed listing of other operations serves no purpose and is no longer essential. Following the sale of the Traryd operations, Other Business as previously defined would have consisted almost entirely of the Wirsbo unit.

Other Business had net sales in January - December of EUR 32.1 (35.4) million and an operating profit of EUR 1.2 million (loss of EUR 0.4 million). The order book at the end of the year stood at EUR 5.3 (4.5) million. Net sales in the fourth quarter were EUR 8.1 (7.7) million and the operating profit was EUR 1.0 (0.0) million.

Despite weak sales at the start of the year, Componenta Wirsbo almost achieved the same level in its sales as in the previous year. Wirsbo's operative result failed to match expectations, however, and the unit was heavily loss-making. A one-time write-down of inventory in the third quarter was an extra burden on the unit's result. A streamlining programme has been started at the unit to correct prices and to increase efficiency in the unit.

In January 2002 Componenta raised its holding in the associated company Thermia AB from 30 per cent to 36 per cent.

Componenta Group's share of the result of the associated companies was EUR 0.2 (-0.5) million. Improved operating profits by Thermia and Ulefos NV increased the Group's share. Exchange rate losses at Ulefos NV reduced the Group's share.

#### Financing

The Group's equity ratio was 18.2% (18.7%). The equity ratio including the preferred capital notes was 31.4% (32.0%).

The Group reinforced its financial structure in February with an issue of preferred capital note which is effective at the latest until 2009. The Group had unused committed credit facilities at the end of the year of EUR 27 million.

The Group has a EUR 40 million commercial paper programme and EUR 16.6 million of this was in use at the end of the year. The Group's net interest-bearing liabilities, excluding the EUR 28.6 million preferred capital note, totalled EUR 116.5 (112.4) million.

#### Investments

Investments in production facilities in 2002 totalled EUR 7.9 (15.6) million. The largest of these were the

expansion of Suomivalimo, new production lines at Albin and Nisamo, and the pressing line for forged components at Wirsbo, which was started in 2001 and commissioned in the summer of 2002. The Group also invested EUR 1.1 million in the shares of the associated company Thermia AB. Gross investments totalled EUR 9.8 (53.1) million. Because of its divestments, however, the Group's cash flow for investments was EUR –5.7 million.

The Group's research and development costs are recorded as expenses for the period in which they are incurred.

#### Personnel

During the financial year the Group had an average of 1,705 (1,810) employees. The Group had 1,616 (1,741) employees on 31 December 2002. 52.8% (50.8%) of the Group's personnel were in Finland, 46.6% (48.7%) in Sweden and 0.5% (0.5%) in other countries.

#### Board of Directors and Management

Componenta's Annual Shareholders' Meeting on 12 February 2002 elected Heikki Bergholm, Antti Lehtonen, Heikki Lehtonen, Juhani Mäkinen and Olli Reenpää as members of the Board of Directors. The Board chose Olli Reenpää as its chairman and Juhani Mäkinen as its vice chairman.

Antti Lehtonen resigned from the Board of Directors of Componenta Corporation at the end of September.

Senior Vice President Yrjö Julin left to work at another company at the beginning of May and Bengt Christensson, Director of Supply Chain 1, at the beginning of October. The corporate executive team of Componenta Group is formed by President and CEO Heikki Lehtonen, Lauri Huhtala, Director, Foundries, Olli Karhunen, Director, Power and Transmission, Jari Leino, Director, Sales and Marketing, CFO Sirpa Koskinen and Communications Manager Pirjo Aarniovuori.

#### Share capital and shares

Componenta Corporation's shares are quoted on the main list of the Helsinki Exchanges. At the end of the review period, the company's share capital stood at EUR 19.2 million. The share has a nominal value of 2 euros. At the end of the year the quoted price of Componenta Corporation shares stood at EUR 1.81. The lowest quoted price during the year was EUR 1.71 and the highest was EUR 2.70. The share capital had a market value at the end of 2002 of EUR 17.4 million. The volume of shares traded during the review year was the equivalent of 11.3% of the share stock.

## Authorization for share issues and purchasing own shares

The company's Board of Directors has no authorization to issue shares or to purchase the company's own shares.

#### Preferred capital note

Componenta Corporation offered holders of the preferred capital notes issued in 1997 by Componenta's

subsidiary Componenta Finance Corporation the opportunity to exchange their notes for new preferred capital note issued in February 2002 by Componenta Corporation. The preferred capital notes issued by Componenta Finance Corporation were in their entirety in the possession of Componenta Corporation by the end of March, and as a result stock exchange trading in Componenta Finance preferred capital notes also ceased in March.

The preferred capital note issued by Componenta Corporation had a principal of EUR 25.1 million and the loan period is 15 February 2002 – 19 March 2009. Annual interest is paid on the note at a rate 4% above the 12-month Euribor interest rate. The company repays 10% of the principal annually, and the first instalment was repaid on 19 March 2002. Componenta Corporation also has the right to pay off more than 10% of the note on the annual interest payment date.

On 31 December 2002 Componenta Corporation had preferred capital note with a value of EUR 28.6 million.

#### Announcements in conformance with Chapter 2, Article 9 of the Finnish Securities Markets Act in 2002

According to a statement made on 12 July 2002, the holding of Etra-Invest Oy in Componenta Corporation exceeded 10 per cent, rising to 10.42 per cent of the shares and voting rights.

#### Prospects for 2003

This perception of Componenta's prospects is based on publicly available, external business cycle indicators, order forecasts given by customers and on Componenta's order intake and order book.

Uncertainty about developments in the global economy continues to postpone decisions about investments in machinery and equipment by industry. Demand is expected to be slack in 2003.

Demand for heavy truck components stopped falling in 2002. The uncertainty about general economic developments may, however, also affect demand for heavy truck components in 2003.

Judging from the order books, the first quarter of 2003 is likely to be a weak period for wind turbine components due to a seasonal trend. Demand is expected to pick up in the second quarter.

Demand among Nordic machine building industry remained weak at the end of 2002 and any recovery in growth will probably be further postponed, even though demand is exptected to have stopped falling. The Group's deliveries to European off-road manufacturers increased in the final quarter of the year and this positive trend is expected to continue in the first part of 2003.

Thanks to the restructuring programme initiated in 2002, in the first quarter of 2003 the Group's cost structure will be EUR 1 million lighter than in 2002.

Componenta Group's net sales in the first quarter of 2003 should be similar to those in the corresponding period in the previous year and the operating profit is expected to improve.

### Accounting principles

The financial statements of Componenta Corporation and the consolidated financial statements are prepared in accordance with current laws and regulations in Finland. Finnish legislation is based on the 4th and 7th directives of the European Union.

The consolidated financial statements of Componenta Group have been prepared in euros. The accounting currency for the parent company and Finnish subsidiaries is the euro.

The financial statements for foreign subsidiaries have been arranged to correspond to the Finnish Accounting Act.

The financial year for the Group companies is the calendar year and it ended on 31 December 2002. The 2001 financial statements for comparison for Componenta Corporation are for the period 6 November 2000 – 31 December 2001. The 2001 consolidated financial statements include the parent company's financial statements for the period 6 November 2000 – 31 December 2001 and financial statements for other Group companies for the period 1 January – 31 December 2001.

#### Scope of consolidated financial statements

The consolidated financial statements include Componenta Corporation and those Finnish and foreign subsidiaries in which the Group holds directly or indirectly shares with over 50% of the voting rights. Subsidiaries acquired during the financial year are included in the consolidated financial statements from the date of acquisition and subsidiaries sold during the financial year are included up until the date of sale.

Associated companies are companies in which the Group holds shares with 20% to 50% of the voting rights. The consolidated financial statements do not include certain small associated companies since the amounts concerned are insignificant. The non-consolidated associated companies do not affect the Group's distributable equity.

#### Principles for consolidation

The consolidated financial statements are prepared according to the acquisition cost method.

The negative goodwill arising from the acquisition of the shares in Componenta Finance Corporation in 2001 was offset against group goodwill in the consolidated financial statements of Componenta Finance Corporation on 1 January 2001. In addition to this, the negative goodwill was offset in 2001 against write-downs of non-current and current assets made in some subsidiaries and against losses from the closing down of operations. The remainder of the negative goodwill was recognized as income in the income statement in 2002.

The excess of the acquisition cost of the shares of other subsidiaries over the shareholders' equity acquired is group goodwill, which is amortized over 5 years. Group goodwill is presented as a separate item in the balance sheet. In the 2001 financial statements it was offset against negative goodwill.

In the consolidated financial statements of Componenta Finance, a subsidiary of Componenta Corporation, the excess of the acquisition cost of the shares of the subsidiaries over the shareholders' equity acquired is partly allocated to the non-current assets of the subsidiaries. On 31 December 2002, goodwill allocated to machinery and equipment under non-current assets totalled EUR 6.4 million.

The financial statements of associated companies are consolidated according to the equity method. The Group's share of the result of associated companies is entered under other operating income in the income statement. The difference between the acquisition cost of shares and the Group's share of the shareholders' equity of associated companies and of the accumulated untaxed reserves less deferred tax liability (goodwill) is amortized over 5 - 10 years. Amortization of goodwill from associated companies is recorded in the Group's share of the result of associated companies. The value of shares is presented in the balance sheet as the acquisition cost of the shares adjusted by the Group's share of the accumulated results of associated companies, including the accumulated amortization of goodwill, and by the Group's share of the sales profit arising from business divestments between the Group and associated companies.

#### Foreign subsidiaries and conversion differences

The income statements of foreign subsidiaries are converted into euros using the average exchange rates for the accounting period. These are the average of the average exchange rates quoted by the European Central Bank at each month end. Balance sheet items are converted into euros at the European Central Bank average exchange rate on the closing day.

The conversion difference arising from using different exchange rates for converting the income statement and the balance sheet is entered under conversion differences in the shareholders' equity. Conversion differences caused by changes in exchange rates when consolidating the shareholders' equity of subsidiaries have been recorded under shareholders' equity.

Foreign currency loans are used to hedge the shareholders' equity of foreign subsidiaries using the equity hedging method. Exchange rate differences for these loans are recorded net in the consolidated balance sheet as conversion differences under shareholders' equity.

Conversion differences from the restricted shareholders' equity of subsidiaries are not distributable funds.

#### Intra-group transactions

Intra-group transactions have been eliminated in the consolidation, as has the internal margin included in the inventories of Group companies. Intra-group receivables and liabilities have also been eliminated.

The Group's share of the sales profits from business divestments between the Group and associated companies is eliminated. The eliminated sales profits are recorded as income at the same rate as amortization in the associated company.

#### Foreign currency transactions

Foreign currency transactions are recorded at the exchange rate on the transaction date.

The foreign currency receivables and liabilities of the parent company and of Finnish subsidiaries are converted into euros at the European Central Bank's average exchange rate on the last day of the year. The foreign currency receivables and liabilities of non-Finnish Group companies are converted at the exchange rate for the country concerned on the last day of the year. Any resulting exchange rate differences are recorded in the income statement as sales or purchasing adjustments or as financial items, as appropriate.

#### Foreign exchange and

interest rate derivative instruments

Currency-denominated open derivatives are valued at the exchange rate on the closing day of the period.

Derivative financial instruments concluded to hedge

against foreign currency and interest rate risks are recorded in the income statement at the same time as the commitment that is hedged. Changes in the value of foreign exchange derivatives are entered in the income statement so that the interest portion is deferred and entered as interest income and expenses, and the exchange rate difference is recorded in the result when the commitment hedged is recorded in the income statement.

#### Minority interest

Minority interest is calculated as the minority shareholders' share of the result for the financial period and of the shareholders' equity of subsidiaries.

#### Net sales

Indirect taxes, discounts given and exchange rate differences for sales have been deducted from sales income when calculating net sales.

Other operating costs include freight charges, other costs relating to sales and credit losses.

#### Other income from operations

Other income from operations includes income from the divesting of operations and the sale of subsidiaries. Correspondingly, losses from the divesting of operations and the sale of subsidiaries are recorded under other operating costs.

#### Extraordinary items

The parent and other Group companies' extraordinary items include group contributions received or given and corresponding taxes.

#### Direct taxes, deferred tax liabilities and assets

Consolidated direct taxes include direct taxes based on the taxable result of Group companies, calculated according to local tax regulations, and the changes in deferred tax liabilities and deferred tax assets.

Changes in deferred tax liabilities and assets have been calculated from the temporary differences between tax and financial periods, from eliminations made in consolidation, from the confirmed losses and losses for the financial year of Group companies, and from changes in accelerated depreciation and other untaxed reserves. Deferred tax assets for confirmed losses or for losses for the financial period have only been recognized to the extent that it is probable that they can be utilized. Taxes include taxes paid for the period and taxes for previous periods that have been due for payment or refund.

Deferred tax liabilities and assets are presented in the balance sheet as a net figure where they apply to the same tax subject.

Deferred taxes are calculated for Finnish companies using a tax rate of 29% and for Swedish companies using a rate of 28%.

Deferred tax liabilities calculated from the revaluation of non-current assets are stated in a note to the financial statements.

Taxes on group contributions recorded under extraordinary items by the parent company and individual companies are included in extraordinary items.

## Non-current assets and depreciation and amortization

Non-current assets are recorded in the balance sheet at their direct acquisition cost less planned depreciation, amortization and write-down. In addition, certain buildings include revaluations made in previous years, and depreciation is not made on these revaluations. No depreciation is made on land and water areas.

Planned depreciation and amortization is calculated on a

straight line basis on the original acquisition cost, based on the estimated useful economic life, as follows:

| capitalized development costs | 5 years       |
|-------------------------------|---------------|
| intangible rights             | 3 - 10 years  |
| group goodwill                | 5 years       |
| other capitalized expenditure | 3 - 20 years  |
| buildings and structures      | 25 - 40 years |
| computing equipment           | 3 - 5 years   |
| other machinery and equipment | 5 - 25 years  |
| other tangible assets         | 5 - 10 years  |

Depreciation of group goodwill allocated to non-current asset items takes place according to the schedule for planned depreciation for the item in question.

The profits and losses from the sale of non-current assets are included in the operating profit.

Negative goodwill is recognized as income and presented as a separate item under depreciation and amortization of non-current assets.

#### Leasing

Leasing payments are treated as rental expenses. Unpaid payments based on leasing agreements are presented under contingent liabilities.

#### Capitalized development costs

Development costs for new product series have been capitalized in the balance sheet during the previous financial periods. The planned amortization period for these costs is 5 years. Other minor research and development costs are recorded as expenses for the period.

#### Inventories

The acquisition cost of inventories includes indirect purchasing and manufacturing costs. Inventories are valued at the lowest of the acquisition cost, the replacement price or the probable sale price.

The use of inventories is entered according to the FIFO principle.

#### Pension obligations

Pension coverage for employees of Group companies in Finland is provided through insurance schemes in line with statutory arrangements. The schemes are funded through payments to an insurance company. According to an agreement made with the pension insurance company, the Group as a large employer is responsible in Finland for unemployment payments and work disability payments included in pension insurance payments in their entirety at the moment when the pension starts.

Foreign subsidiaries operate pension schemes in accordance with local practice and legislation.

#### Untaxed reserves

The changes in untaxed reserves include the changes in accelerated depreciation and in other untaxed reserves.

In the individual financial statements of Finnish and Swedish subsidiaries, the change in the difference between planned and recorded depreciation is presented as change in untaxed reserves in the income statement, and the accumulated difference between planned and recorded depreciation is presented in the balance sheet under untaxed reserves.

In the consolidated balance sheet, untaxed reserves are allocated to shareholders' equity and the deferred tax liability. The change in untaxed reserves for the period is allocated in the income statement to the result for the period and to the change in the deferred tax liability.

Untaxed reserves recorded under consolidated shareholders' equity are not distributable funds. Figures are in thousands of euros unless otherwise stated.

p.a. until 19 March 2003. The interest paid annually shall not exceed the distributable non-restricted equity of Componenta Corporation or the Group. Any unpaid interest shall remain a liability of the Company. The preferred capital notes rank junior to the Company's other debt commitments.

The loan is not secured. Accrued interest on the loan on 31 December 2002 has been recorded as an expense in the income statement and as a liability in the accrued expenses.

| 15. Untaxed reserves   | 2002   | 2001   |
|--|--------|--------|
| Untaxed reserves   | 7,753  | 12,483 |
| Equity elimination of<br>acquired Group companies<br>Deferred tax liabilities of the | -5,249 | -8,692 |
| untaxed reserves   | -2,226 | -3,577 |
| Equity in untaxed reserves   | 278    | 214    |

The deferred tax liabilities of the untaxed reserves of the Swedish subsidiaries are calculated with a tax rate of 28 per cent.

The deferred tax liabilities of the untaxed reserves of the Finnish Group companies are calculated using a tax rate of 29 per cent.

## 23. Financial risk management and derivative instruments

The financial risks relating to Componenta Group's business operations are managed in accordance with the financial policy approved by the Board of Directors. This aims to protect the Group against adverse changes in the financial markets and safeguard the performance of the Group and its financial position. Management of financial risks takes place in the corporate treasury function.

Availability of financing and re-financing risk The company aims to ensure the availability of financing by spreading the maturing dates, sources of funding and financial instruments in its loan portfolio. The proportion of one source of funding may not exceed a limit set by the Board of Directors. The maturing dates for loans are presented in the notes to the balance sheet, item 19.

#### Liquidity risk

The financial policy states that the Group's liquidity should cover its commitments for the near future and is at least the equivalent of the net sales for half a month. In addition to cash reserves, the Group ensures its liquidity with unused committed credit facilities that amounted to EUR 27.4 million at the end of the financial year. Cash reserves are invested with the institutions on a list of counterparties approved by the Board of Directors that are considered to have a low credit risk.

#### Foreign exchange risk

In accordance with the Group's financial policy, the foreign exchange risk is divided into transaction risk, which arises from income and expenses denominated in foreign currencies, and translation risk, which arises from equity investments and income denominated in foreign currencies. The transaction position is calculated from the operational cash flow position, which includes the Group's commercial foreign currency flows for a 6 month period. The translation position is calculated from the shareholders' equity and accumulated profit of foreign subsidiaries in the consolidated balance sheet. In accordance with the financial policy, the Group's transaction position shall always be hedged at least 80% and at most 120%. The translation position is hedged in its entirety. For hedging the Group uses foreign currency loans and deposits and standard hedging instruments such as forward exchange contracts and currency options, which are reliably priced on the market.

The Group's foreign exchange risk consists mainly of a surplus in Swedish and Norwegian crowns and a deficit in US dollars. The estimated transaction position for 6 months ahead in Swedish crowns was EUR 6 million at year end. The maturity of the derivatives is less than one year.

#### Interest rate risk

Because of the cyclical nature of the markets of the Group's customers, the financial policy states that the interest rates of Componenta's net loans position should be renewed on average after one and before two years. On 31 December 2002 the interest rates of loans fell due for renewal on average in 16 months. To manage interest rate risk, the loan portfolio is spread between variable and fixed rate interest loans and investments.

The interest rate risk is also spread among several interest rate renewal periods, so changes in interest rates affect the Group's result in stages. The average interest renewal period of the net interest position is affected by the choice of interest rate periods and by interest rate swaps. Interest rate swaps have been used to increase the number of fixed interest agreements.

The current value is the profit or loss from the derivative instrument according to the market price on 31 December.

The nominal values of the derivative instruments may not necessarily correspond to the payments made by the parties, and thus when examined on their own do not give a true picture of the Group's risk position.

The members of the Board of Directors own 39.3% of the shares. All shares have equal voting rights. The members of the Board of Directors hold 8.1% of the outstanding warrants. If all the warrants were converted to shares, the holding of shares by the members of the Board of Directors would decrease to 37.5%.

#### Breakdown of share ownership on December 31, 2002

## Calculation of key financial ratios

| Return on equity -% (ROE)                | = | Profit after financial items – income taxes x 100<br>Shareholders' equity without preferred capital notes + minority interest (quarterly average)  |
|--|---|--|
| Return on investments -% (ROI)           | = | $\frac{\text{Profit after financial items + interest and other financial expenses}}{\text{Balance sheet total - interest free liabilities (quarterly average)}} \ge 100$   |
| Equity ratio, %                          | = | Shareholders' equity, preferred capital notes excluded<br><u>+ minority interest</u> x 100<br>Balance sheet total - advances received  |
| Earnings per share, EUR (EPS)            | = | Profit after financial items – income taxes +/- minority interest<br>Average number of shares during the financial period  |
| Earnings per share<br>with dilution, EUR | = | As above, but earnings have been increased by calculating interest on<br>market terms and net of tax, on the capital increase corresponding to<br>the outstanding warrants. The number of shares has been increased with<br>the warrants outstanding. When calculating the dilution effect of<br>warrants, the number of shares has been adjusted with the number of<br>own shares which the company could have acquired, if it would have<br>used the funds generated from the warrants to buy back of own shares<br>at market price (= average trading price). |
| Average trading price, EUR               | = | Trading volume, EUR<br>Number of shares traded during the financial period   |
| Equity per share, EUR                    | = | <u>Shareholders' equity, preferred capital notes excluded</u><br>Number of shares at period end  |
| Dividend per share, EUR                  | = | Dividend<br>Number of shares at period end   |
| Payout ratio, %                          | = | Dividend<br>Earnings (as in Earnings per share) x 100  |
| Effective dividend yield, %              | = | Dividend per share<br>Market share price at period end x 100   |
| Market capitalization                    | = | Number of shares x market share price at period end  |
| P/E multiple                             | = | Market share price at period end<br>Earnings per share   |
| Net interest bearing debt                | = | Interest bearing liabilities + preferred capital notes - cash and bank accounts  |
| Net gearing, %                           | = | Net interest bearing debt<br>Shareholders' equity, preferred capital notes excluded<br>+ minority interest   |

### Proposal of the Board of Directors for the distribution of profits

The distributable equity according to the consolidated balance sheet is EUR 6,618,000. The distributable equity according to the parent company balance sheet is EUR 1,940,519.00, of which the net profit for the financial period is EUR 154,273.13.

The Board of Directors proposes to the Annual Shareholders' Meeting that from the distributable equity a dividend of EUR 0.10 per share is paid, total dividends being EUR 961,530.90, and EUR 978,988.10 remains in the distributable equity.

### Auditor's report

#### To the shareholders of Componenta Corporation

I have audited the accounting, the financial statements and the corporate governance of Componenta Corporation for the period 1.1.2002 - 31.12.2002. The financial statements, which include the report of the Board of Directors, consolidated and parent company income statements, balance sheets and notes to the financial statements, have been prepared by the Board of Directors and the Managing Director. Based on my audit I express an opinion on these financial statements and on corporate governance.

I have conducted the audit in accordance with Finnish Standards on Auditing. Those standards require that I perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining on a test basis evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by the management as well as evaluating the overall financial statement presentation. The purpose of my audit of corporate governance is to examine that the members of the Board of Directors and the Managing Director have legally complied with the rules of the Companies' Act.

In my opinion the financial statements have been prepared in accordance with the Accounting Act and other rules and regulations governing the preparation of financial statements. The financial statements give a true and fair view, as defined in the Accounting Act, of both the consolidated and parent company's result of operations as well as of the financial position. The financial statements with the consolidated financial statements can be adopted and the members of the Board of Directors and the Managing Director of the parent company can be discharged from liability for the period audited by me. The proposal by the Board of Directors regarding the distributable assets is in compliance with the Companies' Act.

Helsinki, January 24, 2003

Kari Miettinen APA
