YEAR 2002

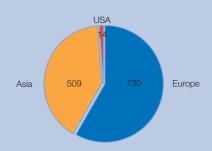

Evox Rifa in brief

Evox Rifa Group is an electronics partner with global operations. It supplies capacitors and related solutions to meet the needs of demanding customers.

Evox Rifa manufactures passive electronic components, specializing in plastic film and electrolytic capacitors. The major customer groups are in industrial, automotive and consumer electronics and the lighting industry. Evox Rifa's strength lies in the design and production of customized products that require specialist expertise.

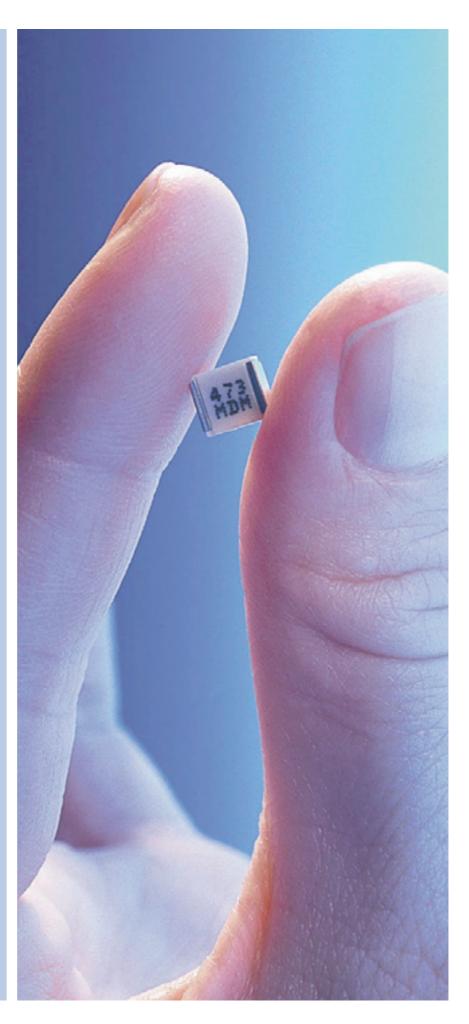

In 2002 Evox Rifa had net sales of about EUR 70 million and employed some 1250 people. The company has a worldwide sales and distribution network. Its production plants are located in Indonesia, Great Britain, China, Sweden and Finland.

Capacitor

Capacitors store energy, conduct alternating current and separate different levels of DC voltage from each other. Capacitors are essential, basic components in all electronic and electrical products, from mobile phones to industrial electrical drives and large electric locomotives. Capacitors are constantly becoming smaller in size but increasingly powerful.

President's review

President Tuula Ylhäinen

he global market for passive components in 2002 was weaker than forecast and the anticipated slight improvement failed to materialize. Competition on price intensified considerably. The situation was toughest in telecommunications, and the automotive and consumer electronics industries were unable to compensate for the decline in demand in that sector. The market for industrial electronics remained flat and prices in the lighting industry continued to fall.

The process of globalization continued. During 2002 Evox Rifa transferred some of its production from Europe to Asia to take advantage of lower raw material and labour costs. However, all R&D and design-in operations remain in Europe and the USA. Asia is becoming an increasingly important market for us. The start up of production in China and the purchase of the British company BHC Aerovox reinforced our standing in the global market.

We are satisfied that Evox Rifa succeeded in maintaining its share of a market that remained flat. The strategic policies decided on by the company, the investments made and action taken to boost cost-efficiency have proven to be on the right track, even though still not sufficient.

The switch at the end of the year to a new operational and organizational model based on business areas is one of the latest steps in our restructuring and remedial actions. Customer service, speed, logistics and supply chain management are becoming ever more important in our business. Evox Rifa has logistics centres in the USA, Europe and Asia, which give the resources for fast, high standard customer service throughout the world. Towards the end of the year we started a Customer Service project with the goal of providing our personnel with new tools in customer service.

The financial performance of Evox Rifa in 2002 was unsatisfactory and further action is being taken to streamline and achieve savings. The transfer of production and the related personnel reductions will gradually have an impact on profits during the first half of 2003. The organization based on business areas and global management of the distribution chain will boost not only the level of service but also the turnover of working capital.

Consolidation, and a gradual recovery, has started in our sector. However, the market is not expected to start to pick up until the autumn. Thanks to its chosen strategy and systematic R&D, Evox Rifa is well placed to maintain its strong position among the leading capacitor manufacturers in the future.

Tuula Ylhäinen President Evox Rifa Group

Electrolytic capacitor unit at forefront in growing market

Latest Unidrive SP range of variable speed motor drives from Control Techniques, showing also optional plug-in modules. Drives is a major application area for screw terminal and snap-in electrolytic capacitors.

vox Rifa's electrolytic capacitor unit operates in a traditionally growing market. The purchase of BHC Aerovox Ltd in England in the spring of 2002 made Evox Rifa the biggest manufacturer of screw terminal capacitors in Europe and one of the largest in the world.

The business area aims to further increase its market share with new products and effective customer-oriented design. It is putting much effort into improving customer service, technical know-how and productivity.

The company also began to manufacture electrolytic capacitors in China, at the Nantong factory that started operations in the spring. The factory is rapidly raising its production volumes and is a pioneer in the production of demanding electrolytic capacitors in Asia.

Automotive and industrial electronics form biggest application areas

More than half the sales of the electrolytic business area are from large screw terminal capacitors that are used e.g. in industrial drives for electric motors, welding equipment and in UPS devices.

The fastest growing market sector for electrolytic capacitors is the automotive industry, which is continuously introducing new technology and replacing old mechanical solutions with electronic ones. Evox Rifa is one of the leading suppliers of the axial electrolytic capacitors used in cars.

The unit also manufactures snap-in capacitors for the consumer and industrial electronic sectors and the motor starter capacitors used especially in domestic appliances and air conditioning equipment.

Electrolytic capacitors are made in

Sweden, England and at the new factory in China. R&D takes place in Sweden and England. The company works with customers to develop new products – close collaboration continued with Vacon, Control Techniques and Bosch for example.

Director of electrolytic capacitor unit, Lars-Göran Stenberg.

Film capacitor unit aims at profitable growth

ilm capacitors form Evox Rifa's other business area. Its main products are metallized paper capacitors and plastic film capacitors. The unit's goal is profitable growth, which it will achieve by reducing manufacturing costs, speeding up delivery times, expanding its product selection and improving the availability of customized products.

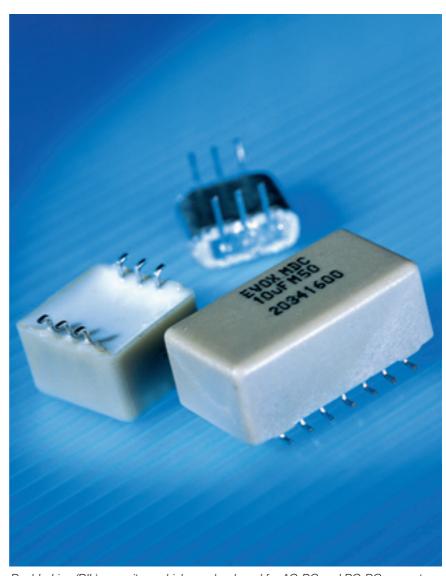

The unit aims at maximum flexibility and a high standard of customer service in its organization. It is reducing manufacturing costs by transferring production from Europe to Asia where labour and raw material costs are lower. All development and manufacturing of customized products takes place at the factories in Europe. Europe and the USA remain the main markets for the business area, although growth in production is mainly in Asia. The unit is raising production volumes through contract manufacturing. It has extended its product range with products made by its partners.

Strong market standing in both main product groups

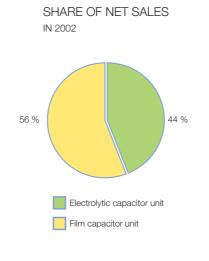

Plastic film capacitors account for by far the bigger part of the sales of the film business area. Evox Rifa is one of the world's leading manufacturers, especially in RFI interference repression and surface mounted capacitors. The unit supplies pulse capacitors used in televisions and power supplies and general purpose capacitors used in numerous electronic applications by various customers around the world.

Paper capacitors are high quality niche products. They are used as interference suppression capacitors in product applications with high safety requirements. Evox Rifa is the global market leader in manufacturing paper capacitors.

Both the main product groups are manufactured in Sweden, and plastic film capacitors are also made at the factories in Indonesia and Finland.

Dual-In-Line (DIL) capacitors which are developed for AC-DC and DC-DC converters.

Director of film capacitor unit, Cheng Hoon Wee.

New factory lays foundation for growth in Asia

vox Rifa has long experience of operating in Asia. The company has production, know-how and partners there. The manufacturing joint venture established with the Chinese company Jianghai supports Evox Rifa's growth strategy and reinforces its competitive standing. The new Nantong factory in China, which started operations in the spring of 2002, manufactures electrolytic capacitors for most of Evox Rifa's customer sectors.

The production plant in Indonesia, which has been operating for more than ten years, has concentrated on manufacturing film capacitors. Production

capacity is constantly being transferred there from the European factories.

Evox Rifa is also marketing actively in Asia and responding to the needs of the growing market in the region.

Global network opens up new doors

Evox Rifa's global sales network has proved to be an important factor in international competition, especially in the USA and Europe.

A good example of this is the partnership agreement with Matsushita, known for its Panasonic brand. Evox Rifa's existing, worldwide sales organization was a major factor in signing the agreement. This opens up considerable opportunities for Evox Rifa to win new customer groups and also extends the company's own range of plastic film surface mounted capacitors. In the long term, the agreement means an opportunity to work together in product development and even to manufacture Matsushita capacitors under licence.

As a result of its marketing agreements signed earlier with Darfon Electronics and Micro Analog Systems, Evox Rifa has obtained product approvals in the US market for new

products that are expected to generate significant net sales in 2003. Darfon's ceramic capacitors are sold under the Evox Rifa brand. During 2002 Evox Rifa signed an agreement with the Indian company Alcon Electronics to manufacture snubber capacitors under the Evox Rifa brand for industrial electronics applications. Deliveries of the products have already started in Europe.

Through the purchase of BHC Aerovox Ltd, Evox Rifa became one of the global leaders in the electrolytic sector. The company acquisition brought Evox Rifa new customers and new know-how and boosted its R&D. The company, which now operates under the name BHC Components Ltd, has been successfully integrated into Evox Rifa.

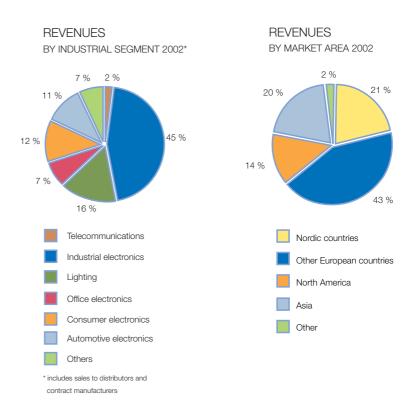

New products in collaboration with customers

Evox Rifa has for a long time invested systematically in developing new products – often in collaboration with customers. Expenditure on research and product development equalled 3,9 per cent of turn over in 2002.

Last year Evox Rifa expanded its product range with new products and improved the performance of existing products. The company developed six completely new electrolytic capacitor products for demanding applications. The design work on the new snap-in product family has been completed and production has started at the factory in China.

In film capacitors, Evox Rifa upgraded its key X2 series for interference suppression. The company developed X1 capacitor families for three-phase and industrial networks and a new pulse capacitor series that replaces earlier products and extends the product range. The launch of the new low-profile DIL capacitor series was one aspect of developing the surface mounted capacitor families.

Evox Rifa carried out several dozen customized R&D projects. More than half of these passed into commercial production. For example, the company

cooperated with the US company Delphi Electronics to develop a capacitor with spade lug terminals for controlling diesel motors. It developed a separate motor drive capacitor for the German company Geiger, which manufactures motors for automatically operated awnings. Many of the new products can be further developed for a wider market.

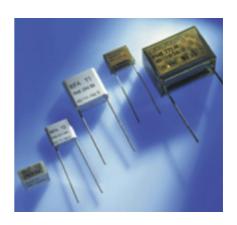

Evox Rifa is a key player in Procure, an EU-financed project running for several years that aims to develop passive components for use at extremely high temperatures in automotive, space and oil drilling technology.

Structural changes to give more competitive cost structure

Changing the structure to one based on business areas aims at improving the profitability of operations and making better use of synergies within the group. Increased internal efficiency will enhance sales activities and improve customer service.

The market remained weak through-

out the year, and Evox Rifa continued its action to reduce costs. The lay-offs of personnel continued in Finland. Evox Rifa transferred some of its film capacitor production from Europe to the Indonesian factory, which resulted in personnel reductions at the Kalmar production plant in Sweden. The sale of the metallizing plant in the summer of 2002 helps the company focus even more on its core business.

The Board of Directors' Report

General

Evox Rifa designs and manufactures passive electronic components – plastic film, paper and electrolytic capacitors. The company's goal is to become a leading supplier of challenging capacitor-based solutions by focusing on designing and supplying high-end capacitors to selected business sectors. Evox Rifa's customer sectors are especially in the fields of automotive, industrial, lighting and consumer electronics – in Europe, North America and Asia.

During 2002 Evox Rifa acquired the entire share capital of the British company BHC Aerovox Ltd. (now BHC Components Ltd.). The financial information for BHC is included in the group's financial report as from the beginning of May 2002.

The group's parent company is Evox Rifa Group Oyj in Finland; the other group companies are: Evox Rifa Oy, Finland; Evox Rifa AB, Sweden; Dectron AB, Sweden; Evox Rifa Pte.Ltd., Singapore; Seoryong Singapore Pte.Ltd., Singapore; P.T. Evox S.R., Indonesia; Evox Rifa Sdn.Bhd., Malaysia; Nantong Evox Rifa Electrolytics Co., People's Republic of China; BHC Components Ltd., United Kingdom; Evox Rifa GmbH, Germany; Evox Rifa (U.K.) Ltd., United Kingdom, and Evox Rifa Inc., USA.

Market Survey

During 2002 the global market for passive components was weaker than forecast and the anticipated slight improvement failed to materialise. Competition on price intensified considerably.

Evox Rifa signed a partnership agreement with Matsushita, known for its Panasonic brand. Evox Rifa's existing, worldwide sales organisation was a major factor in signing the agreement. This opens up considerable opportunities for Evox Rifa to win new customer groups and also extends the company's own range of plastic film surface mounted capacitors. In the long term, the agreement means an opportunity to work together in product development and even to manufacture Matsushita capacitors under licence. Demand for Evox Rifa's own surface mounted products increased during 2002.

As the result of its marketing agreements signed earlier with Darfon Electronics and Micro Analog Systems, Evox Rifa has obtained product approvals in the US market for new products that are expected to generate significant net sales in 2003.

During 2002 Evox Rifa signed an agreement with the Indian company Alcon Electronics to manufacture snubber capacitors under the Evox Rifa brand for industrial electronics applications. Deliveries of the products have already started in Europe.

Financial Performance

Evox Rifa Group's net sales in 2002 were EUR 69.8 million (EUR 69.0 million in 2001). BHC Components Ltd accounted for EUR 14.1 million of total net sales. The North American and European markets continued to decline. The purchase of BHC strengthened Evox Rifa's position in the European market; net sales decreased in the USA. Sales on the Asian market remained at the same level as in 2001, despite increased price competition.

The Electrolytic Capacitors Business Area increased its share of Evox Rifa's total net sales, contributing nearly 44% of total net sales. Among Evox Rifa Group's customer sectors, automotive and industrial electronics accounted for 56% of total sales in 2002 (43% in 2001).

Evox Rifa Group made an operating loss of EUR 8.9 million (loss of EUR 4.8 million in 2001). The loss before extraordinary items was EUR 9.7 million (EUR 6.4 million in 2001). The operating profit of BHC Components Ltd. was EUR 0.4 million.

The Group's earnings per share was EUR –0.068 (EUR –0.059) and the shareholders' equity per share EUR 0.125 (EUR 0.296)

Evox Rifa Group had an order backlog of EUR 13.6 million at the end of 2002 (EUR 10.5 million at the end of 2001).

The financial status of the group weakened and the operating loss was EUR 18.6 million (EUR 10.5 million in 2001). The group was, however, able to carry out its strategic investments, the acquisition of BHC Aerovox Ltd. and building the production capacity for the new factory in China. Gross investments in fixed assets were EUR 7.1 million during 2002.

At the end of the year, the Group's liquid assets were EUR 5.9 million. The Group's equity ratio was 36.5% (47.5% in 2001).

Shares and Shareholders

The nominal value of the shares of Evox Rifa Group Oyj is EUR 0.05. On December 31, 2002 the number of shares was 173,371,018 and the share capital was EUR 8,668,550.90.

The Annual General Meeting of Evox Rifa Group Oyj on March 27, 2002 approved the proposal of Board of Directors to authorise the Board to decide to issue new shares and / or convertible loans, disapplying the shareholders' pre-emptive rights, so that the share capital may rise by a maximum of EUR 866,855. Concurrently the General Meeting decided to revoke its authorisation of April 11, 2001. The Board of Directors did not use this authorisation. (The proposals of the Board have been published as a stock exchange release on March 7, 2002)

The Extraordinary General Meeting of Evox Rifa Group Oyj on May 31, 2002 decided to increase the share capital of the company by not less than EUR 0.05 and not more than EUR 4,334,275.45 by issuing a minimum of one and a maximum of 86,685,509 new shares with a nominal value of EUR 0.05 each. The General Meeting decided that the subscription price for the new shares is EUR 0.07 per share. The increase in the share capital of EUR 4,334,275.45 was registered with the trade register on July 10, 2002.

On November 14, 2000, the Shareholders' Meeting of Evox Rifa Group Oyj resolved to issue 7,500,000 stock options that entitle the holders to subscribe for 7,500,000 Evox Rifa Group Oyj shares. The stock options are offered for subscription to key personnel of the Evox Rifa Group to be named at a later date, to the management of Evox Rifa Group Oyj and to a Group subsidiary.

The stock options are allocated as follows: 2,000,000 are marked with the letter A, 2,500,000 with the letter B and 3,000,000 with the letter C. The subscription period for the A shares is 31 December 2001 – 31 December 2006 and the subscription price is EUR 0.29 per share after adjustment for the share issue. The subscription period for the B shares is 31 December 2003 – 31 December 2006 and the subscription price is EUR 0.11 per share after adjustment for the share issue. The subscription period for the C shares is 31 December 2004 – 31 December 2006 and the subscription price is the tradeweighted average trading price of the Company's shares during

30 days after 31 December 2002 +15%. The amount of dividends decided on and distributed before subscription will be deducted from the share subscription price. The subscription price may not, however, be less than the nominal value of the share. Pursuant to the share subscription, the share capital can be raised by a maximum of EUR 375,000. The shares must be paid for upon subscription.

Personnel

At the end of the fiscal year, Evox Rifa Group had 1253 employees (1186 in 2001), of whom 943 (941) were factory personnel and 310 (245) office staff. The group had an average of 1288 (1336) employees during the fiscal year, of whom 969 (1095) were factory personnel and 319 (241) office staff.

The cost saving programmes affecting personnel continued in 2002. The temporary lay-offs affecting all employees at the Suomussalmi factory continue. During the spring of 2002 about 100 people were made redundant at the Swedish subsidiary of Evox Rifa and agreement was reached in January 2003 to make a further 50 persons redundant.

Research and Development

Evox Rifa has for a long time invested systematically in developing new products – often in collaboration with customers. Expenditure on research and development equalled 3.9 per cent of net sales in 2002.

Last year Evox Rifa expanded its product range with new products and improved the performance of existing products. The company developed six completely new electrolytic capacitor products for demanding applications. The design work on the new snap-in product family has been completed and production has started at the factory in China.

In film capacitors, Evox Rifa upgraded its key X2 series for interference suppression. The company developed X1 capacitor families for three-phase and industrial networks and a new pulse capacitor series that replaces earlier products and extends the product range. The launch of the new low-profile DIL capacitor series was one aspect of developing the surface mounted capacitor families. Evox Rifa carried out several dozen customised R & D projects. More than half of these passed into commercial production. However, these will start to have a significant impact on net sales from 2003 onwards.

Evox Rifa is a key player in Procure, an EU-financed project running for several years (led by DaimlerChrysler) that aims to develop passive components for use at extremely high temperatures (175 $^{\circ}$ C – 225 $^{\circ}$ C) in automotive, space and oil drilling technology.

Environment

In environmental issues, Evox Rifa aims to conform to the requirements of the ISO 14001 standard. To date, the environmental management system has been certified at the factory in Kalmar. The other factories are building their systems and will apply for certification during 2004.

Evox Rifa conforms to the principles of sustainable development in its product development. The raw materials and procedures used for new products are assessed as part of the product development process. Process planning minimises energy requirements and takes into account the recycling of waste materials.

Management and Auditors

The Board of Evox Rifa Group Oyj comprised the following persons:

Chairman, Jerker Molander, and Board Members: Mikko J. Aro, Georg Ehrnrooth, Henrik, Ehrnrooth (as from 27 March, 2002), Pertti Laine (as from 27 March, 2002), Jarmo Niemi, Anders Oldenburg (until 27 March, 2002).

The above mentioned persons also formed the Board of Directors of Evox Rifa Oy during the fiscal period.

The President of Evox Rifa Group Oyj was Mr. Harri Launonen MSc. (Tech) until January 31, 2003. Mrs. Tuula Ylhäinen, MSc. (Econ) was President of Evox Rifa Group Oyj from January 31, 2003 onwards.

The Group's auditors are Pricewaterhouse Coopers Oy, Certified Accountants, and the principal auditor is Mr. Eero Suomela. Authorised Accountant.

Outlook for 2003

Although the order backlog of Evox Rifa has been increasing during January of 2003, pressures to lower prices are still strong. The outlook for 2003 is still uncertain. The market is not expected to start to pick up until the autumn.

The financial result for the first quarter of 2003 will remain negative in both business areas.

The cost savings resulting from the transfers of production from Europe to Asia and from the lay-offs in the Film Capacitors Business Area will only gradually have a visible impact, starting in the second quarter of 2003. The company will continue to adapt costs to the present market situation during 2003.

The profitability of the Electrolytic Capacitors Business Area will recover more quickly than Film Capacitors during 2003. Production volumes at the new Chinese factory are rising and BHC Components will continue its strong, positive performance.

Liquid funds 31.12.	5 945	6 409

Liquid funds include cash in hand and in banks and deposits in mutual interest funds.

Investments in subsidiary shares in the investments cashflow include the acquisition cost deducted with the liquid funds of the acquisition date.

The Accounting Principles of Group Consolidation

The scope of consolidation

The consolidation includes the parent company and those subsidiaries in which the parent has, directly or indirectly, more than 50 % holding at the end of the year. The new subsidiaries which were acquired during the fiscal year are included in the consolidation from the day of purchase.

Companies in which group has a holding of 20-50 % are consolidated as associated companies.

The consolidation principles

The group financial statements are prepared using the acquisition cost method.

The group intercompany transactions, internal margins, internal receivables and liabilities as well as group intenal profit distribution are eliminated from the group accounts.

Translation differences from the elimination of intercompany shareholding have been presented in the balance sheet as retained earnings.

The minority interest's profit/loss and the equity are shown separately in the income statement and the balance sheet.

The part of such companies' results in which the group has a holding of 20-50 % are consolidated in the group financial statements using equity method.

Non-current assets

Valuation of the fixed assets

Fixed assets are valued to acquisition cost and deducted with accumulated depreciation.

Depreciation principles

The depreciation according to plan of fixed assets is based on the original acquisition costs and estimated useful life applying straight lime basis. Other capitalized expenditure is depreciated in 3-10 years. Depreciation time for buildings is 25 years. Machinery and equipment are depreciated in 4-10 years. The goodwill and formation expenses are depreciated over 5 years.

Voluntary provisions and deferred tax liability

The depreciation in excess of plan and the voluntary provisions in single companies accounts are shown as a separate provision.

In group accounts this provision is divided into equity and deferred tax liability.

Current assets

Valuation of inventories

Inventories are valued according to the FIFO method, the repurchase price or the average price method or the sales price, which is lower than FIFO or average price.

Transactions in Foreign Currency

Accounts receivable and payable are converted into euros using the European Central Bank's average rate at the fiscal year end. Foreign currency balance sheet items covered with binding contracts are converted to euros with the contract rate. The result of the realised forward contracts has been included in the accounts according to their realisation. Open forward contracts are converted at the year end rates. Foreign exchange rate gains or losses are booked to the income statement. The group uses derivative instruments only to hedge foreign currency denominated items in the balance sheet.

The foreign subsidiary financial statements are converted into euros using the fiscal year average rate for the income statement and year end rate for the balance sheet.

Pension liability coverage

In the Finnish companies the legal pension liabilities are covered by using an insurance company. Voluntary pensions are covered with voluntary insurances.

Foreign subsidiaries cover their pension liabilities according to the local standards.

Research and development expenses

Research and development expenses are recorded as costs in the fiscal year during which they were born.

Taxes

The taxes of the group companies have been calculated according to the local regulations of each company. The taxes include taxes calculated according to the accrual basis and adjustment to taxes from the previous years. The group income statement includes also the change in deferred taxes.

Calculation Principles of Key Figures

RETURN ON EQUITY (ROE), %

100 x Profit before extraordinary items – direct taxes

Shareholders' equity + minority share (average)

RETURN ON INVESTMENT (ROI), %

100 x Profit before extraordinary items + interest and other financial costs

Balance sheet total – non-interest bearing liabilities (average)

EQUITY RATIO, %

100 x Shareholders' equity + minority interest

Balance sheet total – advances received

EARNINGS / SHARE (EPS)

Profit before extraordinary items – direct taxes – minority interest Adjusted average number of shares outstanding during the year

EQUITY / SHARE

Shareholders' equity

Adjusted average number of shares outstanding at the year end

PRICE / EARNINGS RATIO (P/E)

Year end share price

Earnings per share

EQUITY MARKET VALUE

Total number of shares outstanding x closing rate at the last day of fiscal year

SHARE TURNOVER, %

Total turnover of shares during the fiscal year

Average number of shares during the fiscal year

Shareholders and Shares

Major Shareholders 31.12.2002

Auditor's Report to the Shareholders of Evox Rifa Group Oyj

We have audited the accounting, the financial statements and the corporate governance of Evox Rifa Group Oyj for the period 1.1.-31.12.2002. The financial statements, which include the report of the Board of Directors, consolidated and parent company income statements, balance sheets and notes to the financial statements, have been prepared by the Board of Directors and the Managing Director. Based on our audit we express an opinion on these financial statements and on corporate governance.

We have conducted the audit in accordance with Finnish Standards on Auditing. Those standards require that we perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining on a test basis evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by the management as well as evaluating the overall financial statement presentation. The purpose of our audit of corporate governance is to examine that the members of the Board of Directors and the Managing Director have legally complied with the rules of the Companies Act.

In our opinion the financial statements have been prepared in accordance with the Accounting Act and other rules and regulations governing the preparation of financial statements. The financial statements give a true and fair view, as defined in the Accounting Act, of both the consolidated and parent company's result of operations as well as of the financial position. The financial statements with the consolidated financial statements can be adopted and the members of the Board of Directors and the Managing Director of the parent company can be discharged from liability for the period audited by us. The proposal by the Board of Directors regarding disposal of the loss is in compliance with the Companies Act.
