Review by the Board of Directors 2003

Nokia's net sales in 2003 decreased by 2% compared with 2002 and totaled EUR 29 455 million (EUR 30 016 million in 2002). Sales in Nokia Mobile Phones were up 2% at EUR 23 618 million (EUR 23 211 million) and decreased in Nokia Networks by 14% to EUR 5 620 million (EUR 6 539 million). Sales decreased in Nokia Ventures Organization by 20% to EUR 366 million (EUR 459 million).

Operating profit in 2003 increased by 5% and totaled EUR 5 011 million (EUR 4 780 million in 2002). Operating margin was 17.0% (15.9% in 2002). Operating profit in Nokia Mobile Phones increased by 5% to EUR 5 483 million (EUR 5 201 million in 2002). Operating loss in Nokia Networks increased to EUR 219 million (operating loss of EUR 49 million in 2002). Operating margin in Nokia Mobile Phones was 23.2% (22.4% in 2002), while the operating margin in Nokia Networks was -3.9% (-0.7% in 2002). Nokia Ventures Organization showed an operating loss of EUR 161 million (operating loss of EUR 141 million in 2002). Common Group Expenses totaled EUR 92 million (EUR 231 million in 2002).

In 2003, operating profit included a positive adjustment of EUR 226 million related to customer financing impairment charges (MobilCom) and of EUR 550 million charges related to restructuring costs and impairments and write-offs of capitalized R&D expenses, as well as a goodwill impairment of EUR 151 million. All these items impacted on Nokia Networks operating result. In 2002, operating profit included customer finance impairments of EUR 279 million and goodwill impairments of EUR 182 million.

Financial income totaled EUR 352 million in 2003 (EUR 156 million in 2002). Profit before tax and minority interests was EUR 5 345 million in 2003 (EUR 4 917 million in 2002). Net profit totaled EUR 3 592 million in 2003 (EUR 3 381 million in 2002). Earnings per share increased to EUR 0.75 (basic) and to EUR 0.75 (diluted) in 2003, compared with EUR 0.71 (basic) and EUR 0.71 (diluted) in 2002.

At December 31, 2003, net-debt-to-equity ratio (gearing) was -71% (-61% at the end of 2002). Total capital expenditures in 2003 amounted to EUR 432 million (EUR 432 million in 2002).

At the end of 2003, outstanding long-term loans to customers totaled EUR 354 million (compared with EUR 1 056 million in 2002), while guarantees given on behalf of customers totaled EUR 33 million (EUR 91 million). In addition, Nokia had financing commitments totaling EUR 490 million (EUR 857 million) at the end of 2003.

Global Reach

In 2003, Europe, Middle-East & Africa accounted for 57% of Nokia's net sales (54% in 2002), the Americas 21% (22%) and Asia-Pacific 22% (24%). The 10 largest markets were the US, UK, Germany, China, United Arab Emirates, India, Italy, France, Brazil and Spain, together representing 61% of total sales.

Research and Development

In 2003, Nokia continued to invest in its worldwide research and development network and cooperation. At year-end, Nokia had 19 849 R&D

employees, representing approximately 39% of Nokia's total personnel. Nokia has R&D centers in 11 countries. Research and development expenses increased by 23% (2% in 2002) and totaled EUR 3 760 million (EUR 3 052 million in 2002), representing 12.8% of net sales (10.2% of net sales in 2002). Excluding personnel-related restructuring costs as well as impairments and write-offs of capitalized R&D expenses in Nokia Networks totaling EUR 470 million, the increase in R&D expenses would have been 8%, representing 11.2% of net sales.

Joint Initiatives

Industry cooperation is a key driver of a balanced business ecosystem and healthy competition. As the industry creates and implements open specifications, it enables devices and systems to work seamlessly together independently of the vendor.

The **Open Mobile Alliance (OMA)** has gained overwhelming industry support. Since its inception in June 2002, OMA has grown to more than 350 companies representing mobile operators, device and network suppliers, information technology companies, and content providers. It has intensified cooperation among industry players, bringing about the faster adoption of mobile services as well as market growth for the entire mobile industry. Interoperability is requisite for the success of mobile services and it is broadly supported through OMA. To date, there are 17 Enabler Releases available within OMA, and Nokia has been very active in deploying these. Of the latest Nokia devices introduced, 14 phone models adhere to multiple OMA specifications.

The **Digital Home Working Group (DHWG)** was introduced in June 2003 by Nokia together with 16 other industry leaders from the PC, consumer electronics and mobile industries to simplify sharing of digital content among consumer electronics, PCs, and mobile devices. The goal is to establish a platform of interoperability based on open industry standards to enable the transparent home network so that consumers can easily consume, manage, and distribute digital content in new ways.

People

The average number of personnel for 2003 was 51 605 (52 714 for 2002). At the end of 2003, Nokia employed 51 359 people worldwide (51 748 at year-end 2002). In 2003, Nokia's personnel decreased by a total of 389 employees (decrease of 2 101 in 2002).

During 2003, our people management objectives focused on developing the leadership skills and competencies of our managers and leaders. A number of Nokia initiatives supported these objectives and helped to create a competitive advantage through our people.

Corporate Reorganization

Towards the end of 2003, Nokia decided, effective January 1, 2004, to reorganize in order to further align the company's overall structure with its strategy. Nokia's new structure includes four business groups which

form the main reporting structure: Mobile Phones, Multimedia, Networks, and Enterprise Solutions. This provides us with a strong organizational base from which to make progress in the mobility industry and which also builds on the changes that were first implemented in Nokia Mobile Phones in 2002.

The new structure also includes three horizontal groups that support the business groups: Customer and Market Operations, Technology Platforms and Research, Venturing and Business Infrastructure.

Corporate Governance

In 2003, the Board evaluated its practices in light of the various corporate governance initiatives introduced during the year. The emphasis was to maintain and adopt best practices to further increase transparency and accountability towards all stakeholders. Nokia aims to comply with applicable rules and regulations, and to proactively seek practices beyond those requirements to enhance good governance.

Corporate Responsibility

During 2003, Nokia expanded its global community involvement program, Make a Connection, to 16 countries, reaching over 1.25 million people, and participated in the Philippines pilot of BRIDGE*it*, which uses mobile technology to bring interactive learning materials to schools in poor and remote areas. The employee volunteering initiative, Nokia Helping Hands, also grew and is now in more than 25 countries. Nokia also signed a 3-year frame agreement for cooperation with WWF (World Wide Fund for Nature). Nokia participates in many international initiatives, such as the United Nations' Global Compact and ICT Task Force, International Youth Foundation,

World Business Council for Sustainable Development and WWF.

As a result of the company's performance in economic, environmental and social issues, and increased transparency in reporting, Nokia was again included in Socially Responsible Investment (SRI) benchmarks, such as the Dow Jones Sustainability Indexes and the FTSE4Good. In 2003, Nokia was ranked number one in the Global Communications Technology and European Technology market industry sectors within the Dow Jones Sustainability Index.

Nokia Mobile Phones in 2003

For the full year 2003, Nokia volumes reached a record 179 million units, leading to an estimated market share slightly above 38%.

Nokia Mobile Phones broadened and revitalized its product portfolio by launching 40 new products during 2003 with an emphasis on more advanced devices, CDMA technology, entry-level phones and market localization. In addition to focusing on innovation and design in the portfolio in 2003, Nokia also made good progress in improving the quality of its processes and products, leading to concrete results.

Of the new products launched, 31 models had color-screens, 14 models had cameras and 24 models were MMS-enabled. The focus on more advanced devices includes the broad camera phone portfolio, with 12 camera phone models on the market by year-end. Nokia also started sales of two products to drive the adoption of advanced devices: the Nokia 7600, Nokia's second 3G WCDMA phone to pave the way for mass market 3G services, and the Nokia 6600 smart phone. The commercial success of the Nokia 6600 has enabled the Symbian OS and Series 60 to become industry-leading smart phone platforms.

During the year, Nokia launched 11 CDMA handsets including Nokia's first color-screen CDMA product, the Nokia 3586, and Nokia's first CDMA camera phone, the Nokia 6225.

A refreshed line of entry-level phones includes the Nokia 3200, the company's first high-volume, affordable camera phone; and the Nokia 2200 Series CDMA phones, designed for first-time users and growth markets.

Highlighting Nokia's commitment to usability are two popular localized products. The high-end Nokia 6108 pen-based phone for the Chinese market was the first phone enabling text input, handwriting recognition and predictive text in English and Chinese. It was followed by an entry-level product, the Nokia 3108.

As examples of Nokia's expanding imaging product portfolio, the Nokia Imagewear product group was launched in the third quarter and the Nokia Image Frame started shipping during the fourth quarter. These products give consumers new ways to use digital images, and also strengthen Nokia's overall imaging-related product offering.

In 2003, Nokia Mobile Phones also introduced products in new functional categories, such as the Nokia 7700 media device and the Nokia N-Gage mobile game deck. The Multimedia business group is now responsible for the development and commercialization of devices such as these.

For enterprises, Nokia Mobile Phones introduced a range of business-oriented devices, such as the Nokia 6810 and Nokia 6820 messaging devices with full QWERTY keyboards, and the Nokia D211 and Nokia D311 multimode radio cards. The Enterprise Solutions business group is now responsible for the development and commercialization of messaging devices and data card products such as these, including the Communicator product line.

In line with the high levels of demand, Nokia made the decision to expand production capacity at its Komárom factory in Hungary, among others.

REVIEW BY THE BOARD OF DIRECTORS

Nokia Networks in 2003

During 2003, Nokia announced seven 3G network deals in Bahrain, Greece, Hong Kong, Singapore, Switzerland, the UK and France. Mobile operators began reconfirming their commitments to 3G WCDMA in the second half of the year by renewing and continuing network agreements and by accelerating network rollouts. By the end of 2003, Nokia was a supplier to six of the world's 12 commercially launched 3G networks and was rolling out 3G WCDMA networks to 26 customers around the world. Altogether, Nokia has 37 public 3G references.

Nokia announced 18 GSM, GPRS or GSM/GPRS/EDGE deals covering all markets, in addition to four EDGE deals in Latin America and Asia-Pacific. During the year, EDGE gained momentum and at year-end, Nokia was a supplier to nine of the eleven commercially launched EDGE networks. This included a nationwide EDGE deployment and network opening with AT&T Wireless in the United States.

There was also strong momentum in packet-based core networks and Nokia's GPRS references increased by ten to 76 networks. Nokia also concluded 13 deals for Nokia Intelligent Content Delivery, the core network solution for multimedia services traffic and charging, and made several deals for MMS and other service enablers. Nokia has now supplied MMS technology to approximately 60 operators around the world. In TETRA networks for public safety and security customers, Nokia signed four new deals in China and France.

As part of Nokia's aim to double the global subscriber base by 2008, the Nokia Connect GSM Solution for growth markets was launched in August. The Nokia Connect GSM Solution comprises infrastructure, network management and services, and aims to halve the total cost of ownership in network investment and operations.

In October, Nokia introduced its carrier grade network products for push-to-talk over cellular, a technology enabling new direct voice service for one-on-one and one-to-group communications over existing GPRS networks. Nokia has over 30 trials underway with operators globally.

During 2003, many mobile operators sought to lower their operating expenses and to improve the quality of their mobile services. In line with this, the importance of the Operations Solutions business to Nokia increased and Nokia successfully joined several leading operators to provide operations support, network performance services and service quality management solutions.

During the first half of the year, the group took measures to improve its profitability by lowering its research and development costs and reducing the number of employees. The actions already showed results in the fourth quarter as Nokia Networks profitability improved.

Nokia Ventures Organization in 2003

In the first half of 2003, revenue at Nokia Internet Communications continued to be affected by the slowdown in information technology spending. During the second half of 2003, the market began to show signs of improvement. Enterprises continued to rank spending on corporate network security as among their highest priorities with positive effects on the overall market growth in 2003. Full-year sales at Nokia Internet Communications were slightly lower year on year, reflecting the continued weakness of the US dollar.

The unit introduced new product categories and solutions in 2003 that expanded Nokia's network security appliance portfolio beyond perimeter security, into the secure content management and connectivity arenas. New products focused predominantly on extending mobility to enterprise workforces, protecting corporate e-mail content, and providing

firewall/virtual private network benefits to remote offices.

During 2003, Nokia Home Communications continued renewing and broadening its product portfolio of advanced digital satellite, terrestrial and cable television receivers with new models for consuming, sharing and storing diverse digital content. These new products increased the interoperability between digital TV receivers and mobile phones. Nevertheless, sales in 2003 for Nokia Home Communications clearly declined compared to 2002.

Changes in share capital

In 2003, Nokia's share capital increased by EUR 429 616.32 as a result of the issue of 7 160 272 new shares upon exercise of warrants issued to key personnel in 1997. Nokia's share capital was also increased in May by EUR 73 502.82 when 1 225 047 shares were issued to finance the acquisition of Eizel Technologies, Inc. The shares were issued for a subscription price of EUR 14.76 per share based on the market price of Nokia share. Due to the limited number of shares issued, the issuance did not have any significant effect on the relative holdings of the other shareholders of the company nor on their voting power.

Nokia repurchased through its share repurchase plan a total of 94 478 500 shares on the Helsinki Exchanges at an aggregate price of approximately EUR 1.351 billion during the period from April 22 to November 28. The price paid was based on the market price at the time of repurchase. The shares were repurchased to be used for the purposes specified in the authorization held by the Board. The aggregate par value of the shares purchased was EUR 5 668 710, representing approximately 2% of the share capital of the company and the total voting rights. These new holdings did not have any significant effect on the relative holdings of the other shareholders of the company nor on their voting power.

On December 31, 2003, Nokia and its subsidiary companies owned 96 024 549 Nokia shares. The shares had an aggregate par value of EUR 5 761 472.94, representing 2% of the share capital of the company and the total voting rights.

The total number of shares at December 31, 2003 was 4 796 292 460. As a result of the new share issues, Nokia received a total of EUR 23 105 302.71 in additional shareholders' equity in 2003. At December 31, 2003, Nokia's share capital was EUR 287 777 547.60.

Outlook

In 2003, Nokia continued to perform well in a challenging environment, translating its core strengths of leading brand, excellence in execution and continuous product renewal into strong profitability. Going into 2004, the company expects market conditions to remain challenging, but sees encouraging indications for recovery. Nokia continues to expect somewhat over 10% volume growth for the mobile device market in 2004. Moreover, the convergence of the mobile communications, information technology and media industries opens possibilities for Nokia to create new product and service categories, such as mobile games, multimedia and enterprise solutions. The network infrastructure market began to stabilize towards the end of 2003 and is expected to be flat to slightly up in 2004. Nokia will continue to build on its industry-leading position, seeking to achieve high profitability as well as to grow market share.

Dividend

Nokia's Board of Directors will propose a dividend of EUR 0.30 per share for 2003.

See Notes to Consolidated Financial Statements.

1. Accounting principles

Basis of presentation

The consolidated financial statements of Nokia Corporation ("Nokia" or "the Group"), a Finnish limited liability company with domicile in Helsinki, are prepared in accordance with International Accounting Standards (IAS). The consolidated financial statements are presented in millions of euros (EURm), except as noted, and are prepared under the historical cost convention except as disclosed in the accounting policies below. The notes to the consolidated financial statements also conform with Finnish Accounting legislation.

In 2001 the Group adopted IAS 39, Financial Instruments: Recognition and Measurement (IAS 39). The effects of adopting the standard are summarized in the consolidated statement of changes in shareholders' equity and cash flow statements.

Use of estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Principles of consolidation

The consolidated financial statements include the accounts of Nokia's parent company ("Parent Company"), and each of those companies in which it either owns, directly or indirectly through subsidiaries, over 50% of the voting rights, or over which it has control of their operating and financial policies. The Group's share of profits and losses of associated companies (generally 20% to 50% voting rights or over which the Group has significant influence) is included in the consolidated profit and loss account in accordance with the equity method of accounting.

All inter-company transactions are eliminated as part of the consolidation process. Minority interests are presented separately in arriving at the net profit. They are also shown separately from shareholders' equity and liabilities in the consolidated balance sheet.

Profits realized in connection with the sale of fixed assets between the Group and associated companies are eliminated in proportion to share ownership. Such profits are deducted from the Group's equity and fixed assets and released in the Group accounts over the same period as depreciation is charged.

The companies acquired during the financial periods presented have been consolidated from the date on which control of the net assets and operations was transferred to the Group. Similarly the result of a Group company divested during an accounting period is included in the Group accounts only to the date of disposal.

Goodwill

Acquisitions of companies are accounted for using the purchase method of accounting. Goodwill represents the excess of the purchase cost over the fair value of assets less liabilities of acquired companies. Goodwill is amortized on a straight-line basis over its expected useful life. Useful lives vary between two and five years depending upon the nature of the acquisition. Expected useful lives are reviewed at each balance sheet

date and, where these differ significantly from previous estimates, amortization periods are changed accordingly.

The Group assesses the carrying value of goodwill annually or, more frequently, if events or changes in circumstances indicate that such carrying value may not be recoverable. If such indication exists, the recoverable amount is determined for the cash-generating unit to which goodwill belongs. This amount is then compared to the carrying amount of the cash-generating unit and an impairment loss is recognized if the recoverable amount is less than the carrying amount. Impairment losses are recognized immediately in the profit and loss account.

Transactions in foreign currencies

Transactions in foreign currencies are recorded at the rates of exchange prevailing at the dates of the individual transactions. For practical reasons, a rate that approximates the actual rate at the date of the transaction is often used. At the end of the accounting period, the unsettled balances on foreign currency receivables and liabilities are valued at the rates of exchange prevailing at the year-end. Foreign exchange gains and losses related to normal business operations are treated as adjustments to sales or to cost of sales. Foreign exchange gains and losses associated with financing are included as a net amount under financial income and expenses.

Foreign Group companies

In the consolidated accounts all items in the profit and loss accounts of foreign subsidiaries are translated into euro at the average foreign exchange rates for the accounting period. The balance sheets of foreign Group companies are translated into euro at the year-end foreign exchange rates with the exception of goodwill arising on the acquisition of a foreign company, which is translated, to euro at historical rates. Differences resulting from the translation of profit and loss account items at the average rate and the balance sheet items at the closing rate are also treated as an adjustment affecting consolidated shareholders' equity. On the disposal of all or part of a foreign Group company by sale, liquidation, repayment of share capital or abandonment, the cumulative amount or proportionate share of the translation difference is recognized as income or as expense in the same period in which the gain or loss on disposal is recognized.

Fair valuing principles

Financial assets and liabilities

Under IAS 39, the Group classifies its investments in marketable debt and equity securities and investments in unlisted equity securities into the following categories: held-to-maturity, trading, or available-for-sale depending on the purpose for acquiring the investments. All investments of the Group are currently classified as available-for-sale. Available-for-sale investments are fair valued by using quoted market rates, discounted cash flow analyses and other appropriate valuation models at the balance sheet date. Certain unlisted equities for which fair values cannot be measured reliably are reported at cost less impairment. All purchases and sales of investments are recorded on the trade date, which is the date that the Group commits to purchase or sell the asset.

The fair value changes of available-for-sale investments are recognized in shareholders' equity. When the investment is disposed of, the related accumulated fair value changes are released from shareholders' equity and recognized in the profit and loss account. The accumulated

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

fair value changes are calculated using a weighted average purchase price method. An impairment is recorded when the carrying amount of an available for sale investment is greater than the estimated fair value and there is objective evidence that the asset is impaired. The cumulative net loss relating to that investment is removed from equity and recognized in the profit and loss account for the period. If, in a subsequent period, the fair value of the investment increases and the increase can be objectively related to an event occurring after the loss was recognized, the loss is reversed, with the amount of the reversal included in the profit and loss account.

The fair values of other financial assets and financial liabilities are assumed to approximate their carrying values, either because of their short maturities, or where their fair values cannot be measured reliably.

Derivatives

Fair values of forward rate agreements, interest rate options and futures contracts are calculated based on quoted market rates at the balance sheet date. Interest rate and currency swaps are valued by using discounted cash flow analyses. The changes in the fair values of these contracts are reported in the profit and loss account.

Fair values of cash settled equity derivatives are calculated by revaluing the contract at year-end quoted market rates. Changes in the fair value are reported in the profit and loss account.

Forward foreign exchange contracts are valued with the forward exchange rate. Changes in fair value are calculated by comparing this with the original amount calculated by using the contract forward rate prevailing at the beginning of the contract. Currency options are valued at the balance sheet date by using the Garman & Kohlhagen option valuation model. Changes in the fair value on these instruments are reported in the profit and loss account except to the extent they qualify for hedge accounting.

Embedded derivatives are identified and monitored in the Group and fair valued at the balance sheet date. In assessing the fair value of embedded derivatives the Group uses a variety of methods, such as option pricing models and discounted cash flow analysis, and makes assumptions that are based on market conditions existing at each balance sheet date. The fair value changes are reported in the profit and loss account.

Hedge accounting

Hedging of anticipated foreign currency denominated sales and purchases

The Group applies hedge accounting for 'Qualifying hedges'. Qualifying hedges are those properly documented cash flow hedges of the foreign exchange rate risk of future anticipated foreign currency denominated sales and purchases that meet the requirements set out in IAS 39. The cash flow being hedged must be 'highly probable' and must ultimately impact the profit and loss account. The hedge must be highly effective both prospectively and retrospectively.

The Group claims hedge accounting in respect of certain forward foreign exchange contracts and options, or option strategies, which have zero net premium or a net premium paid, and where the critical terms of the bought and sold options within a collar or zero premium structure are the same and where the nominal amount of the sold option component is no greater than that of the bought option.

For qualifying foreign exchange forwards the change in fair value is deferred in shareholders' equity to the extent that the hedge is effective. For qualifying foreign exchange options the change in intrinsic value is

deferred in shareholders' equity to the extent that the hedge is effective. Changes in the time value are at all times taken directly as adjustments to sales or to cost of sales in the profit and loss account.

Accumulated fair value changes from qualifying hedges are released from shareholders' equity into the profit and loss account as adjustments to sales and cost of sales, in the period when the hedged cash flow affects the profit and loss account. If the hedged cash flow is no longer expected to take place, all deferred gains or losses are released into the profit and loss account as adjustments to sales and cost of sales, immediately. If the hedged cash flow ceases to be highly probable, but is still expected to take place, accumulated gains and losses remain in equity until the hedged cash flow affects the profit and loss account.

Changes in the fair value of any derivative instruments that do not qualify for hedge accounting under IAS 39 are recognized immediately in the profit and loss account. The fair value changes of derivative instruments that directly relate to sales and purchases are recognized as adjustments to sales and cost of sales respectively. The fair value changes from all other derivative instruments are recognized in financial income and expenses.

Foreign currency hedging of net investments

The Group also applies hedge accounting for its foreign currency hedging on net investments. Qualifying hedges are those properly documented hedges of the foreign exchange rate risk of foreign currency-denominated net investments that meet the requirements set out in IAS 39. The hedge must be effective both prospectively and retrospectively.

The Group claims hedge accounting in respect of forward foreign exchange contracts, foreign currency-denominated loans, and options, or option strategies, which have zero net premium or a net premium paid, and where the terms of the bought and sold options within a collar or zero premium structure are the same.

For qualifying foreign exchange forwards the change in fair value that reflects the change in spot exchange rates is deferred in shareholders' equity. The change in fair value that reflects the change in forward exchange rates less the change in spot exchange rates is recognized in the profit and loss account. For qualifying foreign exchange options the change in intrinsic value is deferred in shareholders' equity. Changes in the time value are at all times taken directly to the profit and loss account. If a foreign currency-denominated loan is used as a hedge, all foreign exchange gains and losses arising from the transaction are recognized in shareholders' equity.

Accumulated fair value changes from qualifying hedges are released from shareholders' equity into the profit and loss account only if the legal entity in the given country is sold or liquidated.

Revenue recognition

Sales from the majority of the Group are recognized when persuasive evidence of an arrangement exists, delivery has occurred, the fee is fixed and determinable and collectibility is probable. The remainder of the sales is recorded under the percentage of completion method.

Sales and cost of sales from contracts involving solutions achieved through modification of telecommunications equipment are recognized on the percentage of completion method when the outcome of the contract can be estimated reliably. A contract's outcome can be estimated reliably when total contract revenue and the costs to complete the con-

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

tract can be estimated reliably, it is probable that the economic benefits associated with the contract will flow to the company and the stage of contract completion can be measured reliably. When the Group is not able to meet those conditions, the policy is to recognize revenues only equal to costs incurred to date, to the extent that such costs are expected to be recovered.

Completion is measured by reference to cost incurred to date as a percentage of estimated total project costs, the cost-to-cost method.

The percentage of completion method relies on estimates of total expected contract revenue and costs, as well as dependable measurement of the progress made towards project completion. Recognized revenues and profits are subject to revisions during the project in the event that the assumptions regarding the overall project outcome are revised. The cumulative impact of a revision in estimates is recorded in the period such revisions become known and estimable. Losses on projects in progress are recognized immediately when known and estimable.

All the Group's material revenue streams are recorded according to the above policies.

Shipping and handling costs

The costs of shipping and distributing products are included in cost of sales.

Research and development

Research and development costs are expensed as they are incurred, except for certain development costs, which are capitalized when it is probable that a development project will be a success, and certain criteria, including commercial and technological feasibility, have been met. Capitalized development costs, comprising direct labor and related overhead are amortized on a systematic basis over their expected useful lives between two and five years.

Other intangible assets

Expenditures on acquired patents, trademarks and licenses are capitalized and amortized using the straight-line method over their useful lives, but not exceeding 20 years. Where an indication of impairment exists, the carrying amount of any intangible asset is assessed and written down to its recoverable amount. Costs of software licenses associated with internal-use software are capitalized. These costs are included within other intangible assets and are amortized over a period not to exceed three years.

Pensions

The Group companies have various pension schemes in accordance with the local conditions and practices in the countries in which they operate. The schemes are generally funded through payments to insurance companies or to trustee-administered funds as determined by periodic actuarial calculations.

The Group's contributions to defined contribution plans and to multi-employer and insured plans are charged to the profit and loss account in the period to which the contributions relate.

For defined benefit plans, principally the reserved portion of the Finnish TEL system, pension costs are assessed using the projected unit credit method: the cost of providing pensions is charged to the profit and loss account so as to spread the service cost over the service lives of employees. The pension obligation is measured as the present value of the

estimated future cash outflows using interest rates on government securities that have terms to maturity approximating the terms of the related liabilities. Actuarial gains and losses outside the corridor are recognized over the average remaining service lives of employees.

Property, plant and equipment

Property, plant and equipment are stated at cost less accumulated depreciation. Depreciation is recorded on a straight-line basis over the expected useful lives of the assets as follows:

Buildings and constructions	20–33 years
Production machinery, measuring and test equipment	3 years
Other machinery and equipment	3–10 years

Land and water areas are not depreciated.

Maintenance, repairs and renewals are generally charged to expense during the financial period in which they are incurred. However, major renovations are capitalized and included in the carrying amount of the asset when it is probable that future economic benefits in excess of the originally assessed standard of performance of the existing asset will flow to the Group. Major renovations are depreciated over the remaining useful life of the related asset.

Gains and losses on the disposal of fixed assets are included in operating profit/loss.

Leases

The Group has entered into various operating leases, the payments under which are treated as rentals and charged to the profit and loss account on a straight-line basis over the lease terms.

Inventories

Inventories are stated at the lower of cost or net realizable value. Cost is determined using standard cost, which approximates actual cost, on a first in first out (FIFO) basis. Net realizable value is the amount that can be realized from the sale of the inventory in the normal course of business after allowing for the costs of realization.

In addition to the cost of materials and direct labor, an appropriate proportion of production overheads are included in the inventory values.

An allowance is recorded for excess inventory and obsolescence.

Cash and cash equivalents

The Group manages its short-term liquidity through holdings of cash and highly liquid interest-bearing securities (included as current available-for-sale investments in the balance sheet). For the purposes of the cash flow statement, these holdings are shown together as cash and cash equivalents.

Accounts receivable

Accounts receivable are carried at the original invoice amount to customers less an estimate made for doubtful receivables based on a periodic review of all outstanding amounts, which includes an analysis of historical bad debt, customer concentrations, customer creditworthiness, current economic trends and changes in our customer payment terms. Bad debts are written off when identified.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

Borrowings

Borrowings are classified as originated loans and are recognized initially at an amount equal to the proceeds received, net of transaction costs incurred. In subsequent periods, they are stated at amortized cost using the effective yield method; any difference between proceeds (net of transaction costs) and the redemption value is recognized in the profit and loss account over the period of the borrowings.

Loans to customers

Loans to customers are recorded at amortized cost. Loans are subject to regular and thorough review as to their collectibility and as to available collateral; in the event that any loan is deemed not fully recoverable, provision is made to reflect the shortfall between the carrying amount and the present value of the expected cash flows. Interest income on loans to customers is accrued monthly on the principal outstanding at the market rate on the date of financing and is included within other operating income within selling, general and administrative expenses.

Income taxes

Current taxes are based on the results of the Group companies and are calculated according to local tax rules.

Deferred tax assets and liabilities are determined, using the liability method, for all temporary differences arising between the tax basis of assets and liabilities and their carrying values for financial reporting purposes. Currently enacted tax rates are used in the determination of deferred income tax.

Under this method the Group is required, in relation to an acquisition, to make provision for deferred taxes on the difference between the fair values of the net assets acquired and their tax bases.

The principal temporary differences arise from intercompany profit in inventory, warranty and other provisions, untaxed reserves and tax losses carried forward. Deferred tax assets relating to the carry forward of unused tax losses are recognized to the extent that it is probable that future taxable profit will be available against which the unused tax losses can be utilized.

Stock options

Stock options are granted to employees. The options are granted with a fixed exercise price set on a date outlined in the plan. When the options are exercised, the proceeds received, net of any transaction costs, are credited to share capital (nominal value) and share premium. Treasury shares are acquired by the Group to meet its obligations under employee stock option plans in the United States. When treasury shares are issued on exercise of stock options any gain or loss is recognized in share issue premium. Tax benefits on options exercised in the United States are credited to share issue premium.

Provisions

Provisions are recognized when the Group has a present legal or constructive obligation as a result of past events, it is probable that an outflow of resources will be required to settle the obligation and a reliable estimate of the amount can be made. Where the Group expects a provision to be reimbursed, the reimbursement would be recognized as an asset but only when the reimbursement is virtually certain.

The Group recognizes the estimated liability to repair or replace products still under warranty at the balance sheet date. The provision is

calculated based on historical experience of the level of repairs and replacements.

The Group recognizes the estimated liability for non-cancellable purchase commitments for inventory in excess of forecasted requirements at each balance sheet date.

The Group recognizes a provision for the estimated future settlements related to asserted and unasserted Intellectual Property Rights (IPR) infringements, based on the probable outcome of each case as of each balance sheet date.

The Group recognizes a provision for social security costs on unexercised stock options granted to employees at the date options are granted. The provision is measured based on the fair value of the options, and the amount of the provision is adjusted to reflect the changes in the Nokia share price.

Dividends

Dividends proposed by the Board of Directors are not recorded in the financial statements until they have been approved by the shareholders at the Annual General Meeting.

Earnings per share

The Group calculates both basic and diluted earnings per share in accordance with IAS 33, Earnings per share, (IAS 33). Under IAS 33, basic earnings per share is computed using the weighted average number of shares outstanding during the period. Diluted earnings per share is computed using the weighted average number of shares outstanding during the period plus the dilutive effect of stock options outstanding during the period.

2. Segment information

Nokia is organized on a worldwide basis into three primary business segments: Nokia Mobile Phones, Nokia Networks, and Nokia Ventures Organization. Nokia's reportable segments are strategic business units that offer different products and services for which monthly financial information is provided to the Board.

Nokia Mobile Phones develops, manufactures and supplies mobile phones and wireless data products, including a complete range of mobile phones for all major digital and analog standards worldwide.

Nokia Networks is a leading provider of mobile and IP network infrastructure and related services. Nokia Networks aims to be a leader in IP mobility core, radio and broadband access for network providers and operators.

Nokia Ventures Organization exists to create new businesses outside the natural development path of the company's core activities. The unit comprises venture capital activities, incubation, and a portfolio of new ventures, including two more mature businesses: Nokia Internet Communications and Nokia Home Communications.

Common Group Functions consists of common research and general Group functions.

The accounting policies of the segments are the same as those described in Note 1. Nokia accounts for intersegment revenues and transfers as if the revenues or transfers were to third parties, that is, at current market prices. Nokia evaluates the performance of its segments and allocates resources to them based on operating profit.

No single customer represents 10% or more of Group revenues.

¹ Including goodwill and capitalized development costs, capital expenditures amount to EUR 670 million in 2003 (EUR 860 million in 2002). The goodwill and capitalized development costs consist of EUR 36 million in 2003 (EUR 41 million in 2002) for Nokia Mobile Phones, EUR 182 million in 2003 (EUR 377 million in 2002) for Nokia Networks, EUR 20 million in 2003 (EUR 1 million in 2002) for Nokia Ventures Organization and EUR 0 million in 2003 (EUR 9 million in 2002) for Common Group Functions.

² Comprises intangible assets, property, plant and equipment, investments, inventories and accounts receivable as well as prepaid expenses and accrued income except those related to interest and taxes.

³ Unallocated assets including prepaid expenses and accrued income related to taxes and deferred tax assets (EUR 834 million in 2003 and EUR 853 million in 2002).

⁴ Comprises accounts payable, deferred income, accrued expenses and provisions except those related to interest and taxes.

⁵ Unallocated liabilities including prepaid income and accrued expenses related to taxes and deferred tax liabilities (EUR 394 million in 2003 and EUR 248 million in 2002).

¹ Including goodwill and capitalized development costs, capital expenditures amount to EUR 670 million in 2003 (EUR 860 million in 2002 and EUR 2 064 million in 2001). The goodwill and capitalized development costs consist of EUR 20 million in USA in 2003 (1 EUR million in USA in 2002 and EUR 582 million in 2001) and EUR 218 million in other areas in 2003 (EUR 427 million in 2002 and EUR 441 million in 2001).

3. Percentage of completion

Contract sales recognized under the cost-to-cost method of percentage of completion accounting were approximately EUR 4.8 billion in 2003 (EUR 5.9 billion in 2002 and EUR 6.7 billion in 2001). Billings in advance of contract revenues, included in prepaid income, were EUR 195 million at December 31, 2003 (EUR 108 million in 2002 and EUR 146 million in 2001). Contract revenues recorded prior to billings were EUR 665 million at December 31, 2003 (EUR 573 million in 2002 and EUR 319 million in 2001).

Revenue recognition on initial 3G network contracts started in 2002 when Nokia Networks achieved 3G functionality for its single-mode and dual-mode WCDMA 3G systems. Upon achieving 3G functionality for WCDMA network projects, the Group began recognizing revenue under the cost-to-cost input method of percentage of completion accounting and have continued to apply the method in 2003. Until the time 3GPP specifications required by our customers were met, the application of the cost-to-cost input model was deferred.

4. Personnel expenses

Group Executive Board and Presidents *	22	19	16
* Incentives included in remuneration	5	4	2

Pension commitments for the management:

The retirement age of the management of the Group companies is between 60–65 years. For the Chief Executive Officer and the President of the Parent Company the retirement age is 60 years. There are also three other Group Executive Board Members whose retirement age is 60 years.

5. Pensions

The most significant pension plans are in Finland and are comprised of the Finnish state TEL system with benefits directly linked to employee earnings. These benefits are financed in two distinct portions. The majority of benefits are financed by contributions to a central pool with the majority of the contributions being used to pay current benefits. The other part comprises reserved benefits which are pre-funded through the trustee-administered Nokia Pension Foundation. The pooled portion of the TEL system is accounted for as a defined contribution plan and the reserved portion as a defined benefit plan. The foreign plans include both defined contribution and defined benefit plans.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

The amounts recognized in the balance sheet relating to single employer defined benefit schemes are as follows:

	2003		2002	
	Domestic Plans EURm	Foreign Plans EURm	Domestic Plans EURm	Foreign Plans EURm
Fair value of plan assets	683	204	636	126
Present value of funded obligations	-666	-343	-539	-261
Surplus/(Deficit)	17	-139	97	-135
Unrecognized net actuarial (gains)/losses	140	61	45	63
Prepaid/(Accrued) pension cost in balance sheet	157	-78	142	-72

The amounts recognized in the profit and loss account are as follows:

	2003 EURm	2002 EURm	2001 EURm
Current service cost	54	58	49
Interest cost	46	47	40
Expected return on plan assets	-55	-61	-75
Net actuarial losses (gains) recognized in year	3	2	-16
Past service cost	-	11	-
Curtailment	-10	-	-1
Total, included in personnel expenses	38	57	-3

Movements in prepaid pension costs recognized in the balance sheet are as follows:

	2003 EURm	2002 EURm
Prepaid pension costs at beginning of year	70	73
Net income (expense) recognized in the profit and loss account	-38	-57
Contributions paid	47	54
Prepaid pension costs at end of year	79*	70*

* included within prepaid expenses and accrued income

The principal actuarial weighted average assumptions used were as follows:

	2003		2002	
	Domestic %	Foreign %	Domestic %	Foreign %
Discount rate for determining present values	5.25	5.30	5.50	5.58
Expected long term rate of return on plan assets	6.00	6.87	7.25	6.56
Annual rate of increase in future compensation levels	3.50	3.49	3.50	3.09
Pension increases	2.30	2.27	2.30	2.29

The prepaid pension cost above is made up of a prepayment of EUR 164 million (EUR 150 million in 2002) and an accrual of EUR 85 million (EUR 80 million in 2002).

The domestic pension plans' assets include Nokia securities with fair values of EUR 19 million in 2003 (EUR 125 million in 2002).

The foreign pension plan assets include a self investment through a loan provided to Nokia by the Group's German pension fund of EUR 64 million (EUR 66 million in 2002). (Note 31)

The actual return on plan assets was EUR 41 million in 2003 (EUR -66 million in 2002).

6. Selling and marketing expenses, administration expenses and other operating income and expenses

	2003 EURm	2002 EURm	2001 EURm
Selling and marketing expenses	-2 649	-2 579	-2 363

Other operating expenses	-384	-292	-605
Other operating income	300	333	182
Total	-3 363	-3 239	-3 523

Other operating income for 2003 includes a gain of EUR 56 million on the sale of the remaining shares of Nokian Tyres Ltd. In 2003, Nokia Networks recorded a charge of EUR 80 million for personnel expenses and other costs in connection with the restructuring taken in light of general downturn in market conditions, of which EUR 15 million was paid during 2003. Other operating expenses in 2003 included restructuring charges of 166 million in 2001.

Other operating income for 2002 includes a gain of EUR 106 million relating to the sale of Nokia Venture Partner's investment in PayPal within Nokia Ventures Organization. Other operating expenses for 2002 are composed of various items which are individually insignificant.

The Group expenses advertising and promotion costs as incurred. Advertising and promotional expenses were EUR 1 414 million in 2003 (EUR 1 174 million in 2002 and EUR 849 million in 2001).

Total	-	925	313	74	1 312

Relating to restructuring at Nokia Networks, Nokia recorded in 2003 EUR 206 million impairment of capitalized development costs relating to the WCDMA 3G systems. In 2003 Nokia also recorded a EUR 26 million and EUR 43 million impairment of capitalized development costs relating to Flexi-Gateway and MetroSite systems, respectively. The impairment losses were determined as the difference between the carrying amount of the asset and its recoverable amount. In determining the recoverable amount the Group calculated the present value of estimated discounted future cash flows, using a 15% discount rate for WCDMA and FlexiGateway and 12% discount rate for MetroSite, expected to arise from the continuing use of the asset and from its disposal at the end of its useful life.

During 2002, Nokia recorded a net customer financing impairment charge of EUR 279 million. Of this amount, EUR 292 million was an impairment charge to write down the loans receivable to their estimated recoverable amount related to MobilCom and EUR 13 million was a partial recovery received relating to amounts written off in 2001 related to Dolphin. The impairment charge recorded in 2002 relating to MobilCom was substantially reversed in 2003 by EUR 226 million as a result of the company receiving repayment of the MobilCom loans receivables in the form of subordinated convertible perpetual bonds of France Telecom.

During 2001, Nokia recorded an impairment charge of EUR 714 million to cover Nokia Networks' customer loans by EUR 669 million related to a defaulted financing to Telsim, a GSM operator in Turkey, and EUR 45 million relating to the insolvency of Dolphin in the UK. These charges resulted in a write-down of the company's total exposure to Telsim and Dolphin.

In 2003 and 2002 Nokia has evaluated the carrying value of goodwill arising from certain acquisitions by determining if the carrying values of the net assets of the cash generating unit to which the goodwill belongs exceeds the recoverable amounts of that unit. In 2003 and 2002, in the

Nokia Networks business, Nokia recorded an impairment charge of EUR 151 million and EUR 104 million, respectively, on goodwill related to the acquisition of Amber Networks. The recoverable amount for Amber Networks was derived from the value in use discounted cash flow projections, which covers the estimated life of the Amber platform technology, using a discount rate of 15%. At December 31, 2003, there is EUR 0 million of Amber goodwill. The impairment is a result of significant declines in the market outlook for products under development. In the Nokia Networks business in 2001, Nokia recognized a goodwill impairment charge of EUR 170 million related to the acquisition of DiscoveryCom, as a result of a decision to discontinue the related product development.

In 2002 and 2001, Nokia recognized impairment losses of EUR 36 million and EUR 88 million, respectively, on goodwill related to the acquisition of Ramp Networks. In 2002 and 2001, Nokia recognized impairment losses of EUR 25 and EUR 181 million, respectively, on goodwill related to the acquisition of Network Alchemy. Both of these entities are part of the Nokia Internet Communications business unit of Nokia Ventures Organization. For the impairments in 2001 the recoverable amounts were calculated based on value in use discounted cash flow projections using a discount rate of 13%. The impairments in 2001 resulted from the restructuring of these businesses. In 2002, the remaining goodwill balances were written off as a result of decisions to discontinue the related product development.

Nokia recognized various minor goodwill impairment charges totaling EUR 0 million in 2003 (EUR 17 million in 2002).

During 2003 the company's investment in certain equity securities suffered a permanent decline in fair value resulting in an impairment charge of EUR 27 million relating to non-current available-for-sale investments (EUR 77 million in 2002 and EUR 80 million in 2001).

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

8. Acquisitions

In 2003, Nokia made three minor purchase acquisitions for a total consideration of EUR 38 million, of which EUR 20 million in cash and EUR 18 million in non-cash consideration.

In 2002, Nokia increased its voting percentage of 39.97% and holding percentage of 59.97% in Nextrom Holding S.A. to voting percentage of 86.21% and a holding percentage of 79.33%. These increases resulted from rights offering by Nextrom in June 2002 and by acquiring new registered and bearer shares in an offering by Nextrom in December 2002 both totalling EUR 13 million. The fair value of net assets acquired was EUR 4 million giving rise to goodwill of EUR 9 million.

In August 2001, Nokia acquired Amber Networks, a networking infrastructure company, for EUR 408 million, for its ability to develop fault-tolerant edge routers, to build on our strong market share established in the 3G mobile networks and as part of a broader strategy to shape future mobile network architectures. The acquisition was paid in 20 861 212 shares of Nokia stock and 2 624 434 Nokia stock options. The fair value of net assets acquired was EUR -13 million giving rise to goodwill of EUR 421 million which represented the future cash flow projections.

In January 2001, Nokia acquired in a cash tender offer Ramp Networks, a provider of purpose built Internet security appliances, for EUR 147 million. The fair value of net assets acquired was EUR -16 million giving rise to goodwill of EUR 163 million.

In 2003, Nokia increased its ownership in Symbian from 19.0 percent to 32.2 percent by acquiring part of the shares of Symbian owned by Motorola representing 13.2% of all the shares in Symbian, for EUR 57 million (GBP 39.6 million) in cash.

In 2001, Nextrom Holding S.A. was accounted for under the equity method. Due to the increase of Nokia's ownership in 2002 Nextrom Holding S.A. has been fully consolidated for accounting purposes from the date of increased ownership which is reflected in other movements. Shareholdings in associated companies are comprised of investments in unlisted companies in 2003 and 2002.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

15. Available-for-sale investments

	2003 EURm	2002 EURm
Fair value at Jan. 1	8 093	4 670
Additions, net	2 911	3 587

Fair value at Dec. 31	11 088	8 093
Non-current	121	238
Current	816	-
Current, cash equivalents	10 151	7 855

Available-for-sale investments, comprising marketable debt and equity securities and investments in unlisted equity shares, are fair valued, except in the case of certain unlisted equities, where the fair value cannot be measured reliably. Such unlisted equities are carried at cost, less impairment (EUR 45 million in 2003 and EUR 48 million in 2002). Fair value for equity investments traded in active markets and for unlisted equities, where the fair value can be measured reliably, is EUR 77 million in 2003 and EUR 190 million in 2002. Fair value for equity investments traded in active markets is determined by using exchange quoted bid prices. For other investments, fair value is estimated by using the current market value of similar instruments or by reference to the discounted cash flows of the underlying net assets. Gains and losses arising from the change in the fair value of available-for-sale investments are recognized directly in fair value and other reserves.

Available-for-sale investments are classified as non-current, except for 1) the subordinated convertible perpetual bonds of France Telecom (convertible at any time to ordinary shares of France Telecom at a price of EUR 40 and with a fixed coupon of 5.75% until the end of 2009, thereafter floating rate plus a spread of 300bp, both being subject to a maximum 50bp step down linked to France Telecom's long term credit ratings), which are regarded as current available-for-sale investments and 2) highly liquid,

interest-bearing investments held as part of the Group's on going cash management activities which are regarded as current available-for-sale investments, cash equivalents. See Note 34 for details of these investments.

16. Long-term loans receivable

Long-term loans receivable, consisting of loans made to customers principally to support their financing of network infrastructure and services or working capital, net of allowances and write-offs amounts (Note 7), are repayable as follows:

	2003 EURm	2002 EURm
Under 1 year	-	-
Between 1 and 2 years	354	494
Between 2 and 5 years	-	-
Over 5 years	-	562

Transfer to profit and loss account on disposal	-	-27	-27
Balance at Dec. 31, 2003^{1,2}	24	69	93

¹ The tax on the balance of the cash flow hedges was EUR -8 million in 2003 and EUR -9 million in 2002.

² The tax on the balance of the available-for-sale investments was EUR -14 million in 2003 and EUR -16 million in 2002.

In order to ensure that amounts deferred in the cash flow hedging reserve represent only the effective portion of gains and losses on properly designated hedges of future transactions that remain highly probable at the balance sheet date, Nokia has adopted a process under which all derivative gains and losses are initially recognized in the profit and loss account. The appropriate reserve balance is calculated at the end of each period and posted to equity.

Nokia continuously reviewed the underlying cash flows and the hedges allocated thereto, to ensure that the amounts transferred to the Hedging Reserve during the year ended December 31, 2003 and 2002 did not include gains/losses on forward exchange contracts designated to hedge forecasted sales or purchases that are no longer expected to occur. Because of the number of transactions undertaken during each period and the process used to calculate the reserve balance, separate disclosure of the transfers of gains and losses to and from the reserve would be impractical.

All of the net fair value gains or losses recorded in the Fair value and other reserve at December 31, 2003 on open forward foreign exchange contracts which hedge anticipated future foreign currency sales or purchases are transferred from the Hedging Reserve to the profit and loss account when the forecasted foreign currency cash flows occur, at various dates up to 1 year from the balance sheet date.

21. The shares of the Parent Company

See note 16 to Notes to the financial statements of the Parent company.

22. Distributable earnings

	2003 EURm
Retained earnings	13 953
Translation differences (distributable earnings)	-363
Treasury shares	-1 373
Other non-distributable items

Distributable earnings, Dec. 31	12 229

Retained earnings under IAS and Finnish Accounting Standards (FAS) are substantially the same. Distributable earnings are calculated based on Finnish legislation.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

23. Long-term liabilities

	Outstanding Dec. 31, 2003 EURm	Repayment date beyond 5 years EURm	Outstanding Dec. 31, 2002 EURm
Long-term loans are repayable as follows:			
Bonds	–	–	62
Loans from financial institutions	1	–	98
Loans from pension insurance companies	18	18	15
Other long-term finance loans	1	–	12
Other long-term liabilities	67	67	67
	87	85	254
Deferred tax liabilities	241		207
Total long-term liabilities	328		461

The long-term liabilities excluding deferred tax liabilities as of December 31, 2003 mature as follows:

	EURm	Percent of total
2004	–	–
2005	1	1.0%
2006	1	0.6%
2007	–	–
2008	–	–
Thereafter	85	98.4%
	87	100.0%

The currency mix of the Group long-term liabilities as at December 31, 2003 was as follows:

	EUR	USD	BRL	Others
	94.44%	3.93%	0.97%	0.66%

At December 31, 2003 and 2002 the weighted average interest rate on loans from financial institutions was 5.81% and 8.44%, respectively.

Bonds:	Million	Currency	Interest	2003 EURm	2002 EURm
1989–2004	40.0	GBP	11.375%	–	62

At December 31, 2003 the bonds are reported under short-term borrowings as the bonds mature in 2004.

24. Deferred taxes

	2003 EURm	2002 EURm
Deferred tax assets:		
Intercompany profit in inventory	40	48
Tax losses carried forward	36	109
Warranty provision	157	118
Other provisions	179	183
Other temporary differences	233	168
Untaxed reserves	98	105
Total deferred tax assets	743	731
Deferred tax liabilities:		
Untaxed reserves	–33	–33
Fair value gains/losses	–22	–25
Other	–186	–149
Total deferred tax liabilities	–241	–207
Net deferred tax asset	502	524

The tax (charged)/credited to shareholders' equity is as follows:

Fair value and other reserves, fair value gains/losses	22	–25
--	----	-----

Deferred income tax liabilities have not been established for withholding tax and other taxes that would be payable on the unremitted earnings of certain subsidiaries, as such earnings are permanently reinvested. At December 31, 2003 the Group had loss carry forwards of EUR 75 million (EUR 91 million in 2002) for which no deferred tax asset was recognized due to uncertainty of utilization of these loss carry forwards. These loss carry forwards will expire in years 2005 through 2010.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

25. Short-term borrowings

Short-term borrowings consist primarily of borrowings from banks denominated in different foreign currencies. The weighted average interest rate at December 31, 2003 and 2002 was 6.73% and 6.01%, respectively.

26. Accrued expenses

	2003 EURm	2002 EURm
Social security, VAT and other taxes	501	385
Wages and salaries	170	212
Prepaid income	276	196
Other	1 521	1 818
Total	2 468	2 611

Other includes various amounts which are individually insignificant.

27. Provisions

	Warranty EURm	IPR infringements EURm	Other EURm	Total EURm
At Jan. 1, 2003	1 603	273	594	2 470
Exchange differences	-36	-	-	-36
Additional provisions	683	119	300	1 102
Change in fair value	-	-	-22	-22
Unused amounts reversed	-286	-	-28	-314
Charged to profit and loss account	397	119	250	766
Utilized during year	-661	-21	-96	-778
At Dec. 31, 2003	1 303	371	748	2 422

	2003 EURm	2002 EURm
Analysis of total provisions at December 31:		
Non-current	593	460
Current	1 829	2 010

The IPR provision is based on estimated future settlements for asserted and unasserted past IPR infringements. Final resolution of IPR claims generally occurs over several periods. This results in varying usage of the provision year to year.

Other provisions mainly include provisions for non-cancellable purchase commitments, tax provisions and a provision for social security costs on stock options.

28. Earnings per share

	2003	2002	2001
Numerator/EURm			
Basic/Diluted:			
Net profit	3 592	3 381	2 200
Denominator/1 000 shares			
Basic:			
Weighted average shares	4 761 121	4 751 110	4 702 852
Effect of dilutive securities:			
stock options	40	36 932	84 367
Diluted:			
Adjusted weighted average shares and assumed conversions	4 761 161	4 788 042	4 787 219

Under IAS 33, basic earnings per share is computed using the weighted average number of shares outstanding during the period. Diluted earnings per share is computed using the weighted average number of shares outstanding during the period plus the dilutive effect of stock options outstanding during the period.

29. Commitments and contingencies

	2003 EURm	2002 EURm
Collateral for our own commitments		
Property under mortgages	18	18
Assets pledged	13	13
Contingent liabilities on behalf of Group companies		
Other guarantees	184	339
Collateral given on behalf of other companies		
Securities pledged ¹	28	34
Contingent liabilities on behalf of other companies		
Guarantees for loans ¹	5	57
Financing commitments		
Customer finance commitments ¹	490	857

¹ See also note 34 b

The amounts above represent the maximum principal amount of commitments and contingencies.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

Property under mortgages given as collateral for our own commitments include mortgages given to the Finnish National Board of Customs as a general indemnity of EUR 18 million in 2003 (EUR 18 million in 2002).

Assets pledged for the Group's own commitments include inventories and available-for-sale investments of EUR 3 million and EUR 10 million, respectively, in 2003 (EUR 3 million of inventories and EUR 10 million available-for-sale investments in 2002).

Other guarantees include guarantees of Nokia's performance of EUR 171 million in 2003 (EUR 332 million in 2002). However, EUR 139 million of these guarantees are provided to certain Nokia Networks' customers in the form of bank guarantees, standby letters of credit and other similar instruments. These instruments entitle the customer to claim payment as compensation for non-performance by Nokia of its obligations under network infrastructure supply agreements. Depending on the nature of the instrument, compensation is payable either immediately upon request, or subject to independent verification of nonperformance by Nokia.

Securities pledged and guarantees for loans on behalf of other companies of EUR 33 million in 2003 (EUR 91 million in 2002) represent guarantees relating to payment by certain Nokia Networks' customers under specified loan facilities between such customers and their creditors. Nokia's obligations under such guarantees are released upon the earlier of expiration of the guarantee or early payment by the customer. The majority of the financial guarantees is expected to expire by 2004.

Financing commitments of EUR 490 million in 2003 (EUR 857 million in 2002) are available under loan facilities negotiated with customers of Nokia Networks. Availability of the amounts is dependent upon the borrower's continuing compliance with stated financial and operational covenants and compliance with other administrative terms of the facility. The loans are primarily available to fund capital expenditure relating to purchases of network infrastructure equipment and services and to fund working capital. Certain loans are partially secured through either guarantees by the borrower's direct or indirect parent or other group companies, or shares and/or other assets of the borrower, its parent or other entities under common ownership.

The Group is party to routine litigation incidental to the normal conduct of business. In the opinion of management the outcome of and liabilities in excess of what has been provided for related to these proceedings, in the aggregate, are not likely to be material to the financial condition or results of operations.

As of December 31, 2003, the Group had purchase commitments of EUR 1 051 million (EUR 949 million in 2002) relating to inventory purchase obligations, primarily for purchases in 2004.

30. Leasing contracts

The Group leases office, manufacturing and warehouse space under various non-cancellable operating leases. Certain contracts contain renewal options for various periods of time.

The future costs for non-cancellable leasing contracts are as follows:

2003		Operating leases
Leasing payments, EURm	2004	176
	2005	147
	2006	117
	2007	102
	2008	87
	Thereafter	124
	Total	753

Rental expense amounted to EUR 285 million in 2003 (EUR 384 million in 2002 and EUR 393 million in 2001).

31. Related party transactions

Nokia Pension Foundation is a separate legal entity that manages and holds in trust the assets for the Group's Finnish employee benefit plans; these assets include 0.03% of Nokia's shares. In 2002 Nokia Pension Foundation was the counterparty to equity swap agreements with the Group. The equity swaps were entered into to hedge part of the company's liability relating to future social security cost on stock options. During 2003, all outstanding transactions were terminated and no new ones were entered into. During 2002, new transactions were entered into and old ones terminated based on the hedging need. The transactions and terminations were executed on standard commercial terms and conditions. The notional amount of the equity swaps outstanding at December 31, 2002 was EUR 12 million and the fair value EUR 0 million.

At December 31, 2003 the Group had no contribution payment liability to Nokia Pension Foundation (EUR 14 million in 2002 included in accrued expenses).

At December 31, 2003 the Group had borrowings amounting to EUR 64 million (EUR 66 million in 2002) from Nokia Unterstützungskasse GmbH, the Group's German pension fund, which is a separate legal entity.

The Group recorded net rental expense of EUR 2 million in 2003 (EUR 2 million in 2002 and EUR 4 million in 2001) pertaining to a sale-leaseback transaction with the Nokia Pension Foundation involving certain buildings and a lease of the underlying land.

There were no loans granted to top management at December 31, 2003 or 2002. See Note 4, Personnel expenses, for officers and directors remunerations.

34. Risk management

General risk management principles

Nokia's overall risk management concept is based on visibility of the key risks preventing Nokia from reaching its business objectives. This covers all risk areas; strategic, operational, financial and hazard risks. Risk management at Nokia is a systematic and pro-active way to analyze, review and manage all opportunities, threats and risks related to Nokia's objectives rather than to solely eliminate risks.

The principles documented in Nokia's Risk Policy and accepted by the Audit Committee of the Board of Directors require risk management and its elements to be integrated into business processes. One of the main principles is that the business or function owner is also the risk owner, however, it is everyone's responsibility at Nokia to identify risks preventing us from reaching our objectives.

Key risks are reported to the business and Group level management to create assurance on business risks and to enable prioritization of risk management implementation at Nokia. In addition to general principles there are specific risk management policies covering, for example, treasury and customer finance risks.

Financial risks

The key financial targets for Nokia are growth, profitability, operational efficiency and a strong balance sheet. The objective for the Treasury function is twofold: to guarantee cost-efficient funding for the Group at all times, and to identify, evaluate and hedge financial risks in close cooperation with the business groups. There is a strong focus in Nokia on creating shareholder value. The Treasury function supports this aim by minimizing the adverse effects caused by fluctuations in the financial markets on the profitability of the underlying businesses and by managing the balance sheet structure of the Group.

Nokia has Treasury Centers in Geneva, Singapore/Beijing and Dallas/Sao Paulo, and a Corporate Treasury unit in Espoo. This international organization enables Nokia to provide the Group companies with financial services according to local needs and requirements.

The Treasury function is governed by policies approved by top management. Treasury Policy provides principles for overall financial risk management and determines the allocation of responsibilities for financial risk management in Nokia. Operating Policies cover specific areas such as foreign exchange risk, interest rate risk, use of derivative financial instruments, as well as liquidity and credit risk. Nokia is risk averse in its Treasury activities. Business Groups have detailed Standard Operating Procedures supplementing the Treasury Policy in financial risk management related issues.

Market risk

Foreign exchange risk

Nokia operates globally and is thus exposed to foreign exchange risk arising from various currency combinations. Foreign currency denominated assets and liabilities together with expected cash flows from highly probable purchases and sales give rise to foreign exchange exposures. These transaction exposures are managed against various local currencies because of Nokia's substantial production and sales outside the Euro zone.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

Due to the changes in the business environment, currency combinations may also change within the financial year. The most significant non-euro sales currencies during the year were US dollar (USD), UK pound sterling (GBP) and Australian dollar (AUD). In general, depreciation of another currency relative to the euro has an adverse effect on Nokia's sales and operating profit, while appreciation of another currency has a positive effect, with the exception of Japanese yen, being the only significant foreign currency in which Nokia has more purchase than sales.

The chart above shows the breakdown by currency of the underlying net foreign exchange transaction exposure as of December 31, 2003 (in some of the currencies, especially the US dollar, Nokia has both substantial sales as well as cost, which have been netted in the chart).

According to the foreign exchange policy guidelines of the Group, material transaction foreign exchange exposures are hedged. Exposures are mainly hedged with derivative financial instruments such as forward foreign exchange contracts and foreign exchange options. The majority of financial instruments hedging foreign exchange risk have a duration of less than a year. The Group does not hedge forecasted foreign currency cash flows beyond two years.

Nokia uses the Value-at-Risk ("VaR") methodology to assess the foreign exchange risk related to the Treasury management of the Group exposures. The VaR figure represents the potential fair value losses for a portfolio resulting from adverse changes in market factors using a specified time period and confidence level based on historical data. To correctly take into account the non-linear price function of certain derivative instruments, Nokia uses Monte Carlo simulation. Volatilities and correlations are calculated from a one-year set of daily data. The VaR figures assume that the forecasted cash flows materialize as expected. The VaR figures for the Group transaction foreign exchange exposure, including hedging transactions and Treasury exposures for netting and risk management purposes, with a one-week horizon and 95% confidence level, are shown in the table below.

Transaction foreign exchange position Value-at-Risk (EURm)

VaR	2003	2002
At December 31	16.7	5.9
Average for the year	9.3	14.3
Range for the year	5.8–16.7	4.9–27.6

Since Nokia has subsidiaries outside the Euro zone, the euro-denominated value of the shareholders' equity of Nokia is also exposed to fluctu-

ations in exchange rates. Equity changes caused by movements in foreign exchange rates are shown as a translation difference in the Group consolidation. Nokia uses, from time to time, foreign exchange contracts and foreign currency denominated loans to hedge its equity exposure arising from foreign net investments.

Interest rate risk

The Group is exposed to interest rate risk either through market value fluctuations of balance sheet items (i.e. price risk) and through changes in interest income or expenses (i.e. re-investment risk). Interest rate risk mainly arises through interest-bearing liabilities and assets. Estimated future changes in cash flows and balance sheet structure also expose the Group to interest rate risk.

Treasury is responsible for monitoring and managing the interest rate exposure of the Group. Due to the current balance sheet structure of Nokia, emphasis is placed on managing the interest rate risk of investments.

Nokia uses the VaR methodology to assess and measure the interest rate risk in the investment portfolio, which is benchmarked against a one-year investment horizon. The VaR figure represents the potential fair value losses for a portfolio resulting from adverse changes in market factors using a specified time period and confidence level based on historical data. For interest rate risk VaR, Nokia uses variance-covariance methodology. Volatilities and correlations are calculated from a one-year set of daily data. The VaR-based interest rate risk figures for an investment portfolio with a one-week horizon and 95% confidence level are shown in the table below.

Treasury investment portfolio Value-at-Risk (EURm)

VaR	2003	2002
At December 31	9.8	5.4
Average for the year	6.7	5.1
Range for the year	4.7–11.9	3.1–8.7

Equity price risk

Nokia has certain strategic minority investments in publicly traded companies. These investments are classified as available-for-sale. The fair value of the equity investments at December 31, 2003 was EUR 8 million (EUR 137 million in 2002).

There are currently no outstanding derivative financial instruments designated as hedges of these equity investments. The VaR figures for equity investments, shown in the table below, have been calculated using the same principles as for interest rate risk.

Equity investments Value-at-Risk (EURm)

VaR	2003	2002
At December 31	0.2	6.5
Average for the year	3.5	8.8
Range for the year	0.2–9.4	5.5–19.0

In addition to the listed equity holdings, Nokia invests in private equity through Nokia Venture Funds. The fair value of these available-for-sale

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

equity investments at December 31, 2003 was USD 85 million (USD 54 million in 2002). Nokia is exposed to equity price risk on social security costs relating to stock compensation plans. Nokia hedges this risk by entering into cash settled equity swap and option contracts.

Credit risk

Customer Finance Credit Risk

Network operators in some markets sometimes require their suppliers to arrange or provide term financing in relation to infrastructure projects. Nokia has maintained a financing policy aimed at close cooperation with banks, financial institutions and Export Credit Agencies to support selected customers in their financing of infrastructure investments. Nokia actively mitigates, market conditions permitting, this exposure by arrangements with these institutions and investors.

Credit risks related to customer financing are systematically analyzed, monitored and managed by Nokia's Customer Finance organization, reporting to the Chief Financial Officer. Credit risks are approved and monitored by Nokia's Credit Committee along principles defined in the Company's credit policy and according to the credit approval process. The Credit Committee consists of the CFO, Group Controller, Head of Group Treasury and Head of Nokia Customer Finance.

At the end of December 31, 2003 our long-term loans to customers, net of allowances and write-offs, totaled EUR 354 million (EUR 1 056 million in 2002), while financial guarantees given on behalf of third parties totaled EUR 33 million (EUR 91 million in 2002). In addition, we had financing commitments totaling EUR 490 million (EUR 857 million in 2002). Total customer financing (outstanding and committed) stood at EUR 877 million (EUR 2 004 million in 2002).

The term customer financing portfolio at December 31, 2003 was:

	Outstanding	Financing Commitments	Totals
Total Portfolio EURm	387	490	877

The term customer financing portfolio at December 31, 2003 mainly consists of outstanding and committed customer financing to wireless operators Hutchison 3G UK Ltd in the United Kingdom and to TNL PCS S.A. (Telemar) in Brazil. Total committed customer financing to Hutchison 3G UK Ltd amounted to EUR 653 million, of which outstanding financing was EUR 354 million, while total committed customer financing to Telemar amounted to EUR 191 million, of which none was outstanding.

Financial credit risk

Financial instruments contain an element of risk of the counterparties being unable to meet their obligations. This risk is measured and monitored by the Treasury function. The Group minimizes financial credit risk by limiting its counterparties to a sufficient number of major banks and financial institutions, as well as through entering into netting arrangements, which gives the Company the right to offset in the case that the counterparty would not be able to fulfill the obligations.

Direct credit risk represents the risk of loss resulting from counterparty default in relation to on-balance sheet products. The fixed income and money market investment decisions are based on strict creditworthiness criteria. The outstanding investments are also constantly moni-

tored by the Treasury. Nokia does not expect the counterparties to default given their high credit quality.

Current Available-for-sale investments^{1,2,3}

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

- ¹ Available-for-sale investments are carried at fair value in 2003 and 2002.
² Weighted average interest rate for current available-for-sale investments was 3.08% in 2003 and 3.54% in 2002.
³ Included within current Available-for-sale investments is EUR 31 million and EUR 44 million of restricted cash at December 31, 2003 and 2002, respectively.

Liquidity risk

Nokia guarantees a sufficient liquidity at all times by efficient cash management and by investing in liquid interest bearing securities. Due to the dynamic nature of the underlying business Treasury also aims at maintaining flexibility in funding by keeping committed and uncommitted credit lines available. During the year Nokia refinanced all its Revolving Credit Facilities. At the end of December 31, 2003 the new committed facility totaled USD 2.0 billion. The committed credit facility is intended to be used for U.S. and Euro Commercial Paper Programs back up purposes. The commitment fee on the facility is 0.10% per annum.

The most significant existing funding programs include:
 Revolving Credit Facility of USD 2 000 million, maturing in 2008
 Local commercial paper program in Finland, totaling EUR 750 million
 Euro Commercial Paper (ECP) program, totaling USD 500 million
 US Commercial Paper (USCP) program, totaling USD 500 million
 None of the above programs have been used to a significant degree in 2003.

Nokia's international creditworthiness facilitates the efficient use of international capital and loan markets. The ratings of Nokia from credit rating agencies have not changed during the year. The ratings as at December 31, 2003 were:

Term	Agency	Rating
Short-term	Standard & Poor's	A-1
	Moody's	P-1
Long-term	Standard & Poor's	A
	Moody's	A1

Hazard risk

Nokia strives to ensure that all financial, reputation and other losses to the Group and our customers are minimized through preventive risk management measures or purchase of insurance. Insurance is purchased for risks, which cannot be internally managed. Nokia's Insurance & Risk Finance function's objective is to ensure that Group's hazard risks, whether related to physical assets (e.g. buildings) or intellectual assets (e.g. Nokia brand) or potential liabilities (e.g. product liability) are optimally insured.

Nokia purchases both annual insurance policies for specific risks and multi-line multi-year insurance policies, where available. Nokia has concluded a Multi-Line Multi-Year Insurance covering a variety of the above mentioned risks in order to decrease the likelihood of non-anticipated sudden losses.

Notional amounts of derivative financial instruments ¹

	2003 EURm	2002 EURm
Foreign exchange forward contracts ²	10 271	11 118
Currency options bought ²	2 924	1 408
Currency options sold ²	2 478	1 206
Interest rate swaps	1 500	-
Cash settled equity options ³	228	209
Cash settled equity swaps ³	-	12

- ¹ Includes the gross amount of all notional values for contracts that have not yet been settled or cancelled. The amount of notional value outstanding is not necessarily a measure or indication of market risk, as the exposure of certain contracts may be offset by that of other contracts.
² As at December 31, 2003 notional amounts include contracts amounting to EUR 3 billion used to hedge the shareholders' equity of foreign subsidiaries (December 31, 2002 EUR 2 billion).
³ Cash settled equity swaps and options can be used to hedge risk relating to incentive programs and investment activities.

Fair values of derivatives

The net fair values of derivative financial instruments at the balance sheet date were:

	2003 EURm	2002 EURm
Derivatives with positive fair value ¹ :		
Forward foreign exchange contracts ²	358	235
Currency options bought	59	21
Cash settled equity options	13	28

Derivatives with negative fair value ¹ :		
Forward foreign exchange contracts ²	-108	-98
Currency options written	-35	-7
Embedded derivatives ³	-8	-

- ¹ Out of the forward foreign exchange contracts and currency options, fair value EUR 90 million was designated for hedges of net investment in foreign subsidiaries as at December 31, 2003 (EUR 36 million at December 31, 2002) and reported in translation differences.
² Out of the foreign exchange forward contracts, fair value EUR 33 million was designated for cash flow hedges as at December 31, 2003 (EUR 31 million at December 31, 2002) and reported in fair value and other reserves.
³ Embedded derivatives are components of contracts having the characteristics of derivatives, and thus requiring fair valuing of such components. The change in the fair value is reported in other financial income and expenses.

NOKIA SHARES AND SHAREHOLDERS

Shares and share capital

Nokia has one class of shares. Each Nokia share entitles the holder to one (1) vote at General Meetings of Nokia. With effect from April 10, 2000, the par value of the share is EUR 0.06.

The minimum share capital stipulated in the Articles of Association is EUR 170 million and the maximum share capital EUR 680 million. The share capital may be increased or reduced within these limits without

amending the Articles of Association. On December 31, 2003 the share capital of Nokia Corporation was EUR 287 777 547.60 and the total number of shares and votes was 4 796 292 460.

On December 31, 2003 the total number of shares included 96 024 549 shares owned by the Group companies with an aggregate par value of EUR 5 761 472.94 representing approximately 2 per cent of the total number of shares and votes.

⁴ At the same time with a bonus issue of EUR 0.03 per each share of a par value of EUR 0.24.

Authorizations

Authorization to increase the share capital

The Board of Directors had been authorized by Nokia shareholders at the Annual General Meeting held on March 21, 2002 to decide on an increase of the share capital by a maximum of EUR 55 800 000 offering a maximum of 930 000 000 new shares. In 2003, the Board of Directors did not increase the share capital on the basis of this authorization. The authorization expired on March 21, 2003.

At the Annual General Meeting held on March 27, 2003 Nokia shareholders authorized the Board of Directors to decide on an increase of the share capital by a maximum of EUR 57 000 000, of which a maximum of EUR 3 000 000 may result from incentive plans. The increase of the share capital may consist of one or more issues offering a maximum of 950 000 000 new shares with a par value of EUR 0.06 within one year as of the resolution of the Annual General Meeting. The share capital may be increased in deviation from the shareholders' pre-emptive rights for share subscription provided that from the company's perspective important financial grounds exist such as financing or carrying out of an acquisition or another arrangement and granting incentives to key persons. In 2003, the Board of Directors has increased the share capital on the basis of this authorization by an aggregate of EUR 73 502.82 consisting of 1 225 047 new shares, as a result of which the unused authorization amounted to EUR 56 926 497.18, corresponding to 948 774 953 shares on December 31, 2003. The authorization is effective until March 27, 2004.

At the end of 2003, the Board of Directors had no other authorizations to issue shares, convertible bonds, warrants or stock options.

Other authorizations

At the Annual General Meeting held on March 27, 2003 Nokia shareholders authorized the Board of Directors to repurchase a maximum of 225 million Nokia shares, representing less than 5 per cent of total shares outstanding, and to resolve on the disposal of a maximum of 225 million Nokia shares. In 2003, a total of 94 478 500 shares were repurchased under the buy-back authorization, as a result of which the unused authorization amounted to 130 521 500 shares on December 31, 2003. No shares were disposed of in 2003 under the respective authorization. The shares may be repurchased under the buy-back authorization in order to develop the capital structure of the company, to finance or carry out acquisitions or other arrangements, to grant incentives to key persons, to be transferred in other ways, or to be cancelled. The authorization to dispose of the shares may be carried out pursuant to terms determined by the Board in connection with acquisitions or other arrangements or for incentive purposes to key persons. The Board may resolve to dispose the shares in another proportion than that of the shareholders' pre-emptive rights to the company's shares, provided that from the company's perspective important financial grounds exist for such disposal. These authorizations are effective until March 27, 2004.

Convertible bonds and stock options

The table on page 40 depicts the main features of our outstanding stock option plans, which may result in the increase of our share capital. The increase in share capital resulted by these stock options is the number of shares to be issued times the par value of each share. The plans have been approved by the Annual General Meetings in the year of the launch of the plan.

General information about our stock option plans

Shares subscribed for pursuant to the stock options described on page 40 will entitle to dividend for the financial year in which the subscription occurs. Other shareholder rights will commence on the date on which the share subscription is entered in the Finnish Trade Register.

Pursuant to the stock options issued, an aggregate maximum number of 321 755 816 new shares may be subscribed for representing EUR 19 305 348.96 of the share capital and approximately 6.71 percent of the total number of votes on December 31, 2003. During 2003 the exercise of 447 517 options resulted in the issuance of 7 160 272 new shares and the increase of the share capital of Nokia Corporation with EUR 429 616.32.

There were no other stock options and no convertible bonds outstanding as of December 31, 2003, the exercise of which would result in an increase of the share capital of the Parent Company.

The Nokia Holding Inc. 1999 Stock Option Plan

In 1999 Nokia introduced a complementary stock option plan available for Nokia employees in the U.S. and Canada (The Nokia Holding Inc. 1999 Stock Option Plan). Each stock option granted by December 31, 2000 entitles the holder to purchase one Nokia ADS during certain periods of time after April 1, 2001 until five years from the date of grant, for a price within the range of USD 20.50 – 54.50 per ADS. On December 31, 2003 a total of 769 335 stock options were outstanding and 722 503 were exercisable under the Nokia Holding Inc. 1999 Stock Option Plan. An exercise of the stock options under the Nokia Holding Inc. 1999 Stock Option Plan does not result in increase of the share capital of Nokia Corporation. The maximum number of ADSs with a par value of EUR 0.06 that may be issued under the Nokia Holding Inc. 1999 Stock Option Plan is 2 000 000. The shares are carried at purchase cost in the balance sheet until disposed.

AUDITORS' REPORT

To the shareholders of Nokia Corporation

We have audited the accounting records, the financial statements and the administration of Nokia Corporation for the year ended December 31, 2003. The financial statements prepared by the Board of Directors and the President include the report of the Board of Directors, consolidated financial statements prepared in accordance with International Accounting Standards (IAS), and parent company financial statements prepared in accordance with prevailing regulations in Finland (FAS). Based on our audit we express an opinion on the consolidated financial statements and on the parent company's financial statements and administration.

We conducted our audit in accordance with Finnish Generally Accepted Auditing Standards. Those standards require that we plan and perform the audit in order to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by the management, as well as evaluating the overall financial statement presentation. The purpose of our audit of the administration has been to examine that the Chairman and the other members of the Board of Directors and the President have complied with the rules of the Finnish Companies' Act.

Consolidated financial statements

In our opinion, the consolidated financial statements prepared in accordance with International Accounting Standards (IAS) give a true and fair view of the consolidated results of operations as well as of the financial position. The financial statements are in accordance with prevailing regulations in Finland and can be adopted.

Parent company's financial statements and administration

The financial statements have been prepared in accordance with the Finnish Accounting Act and other rules and regulations governing the preparation of financial statements in Finland. The financial statements give a true and fair view, as defined in the Finnish Accounting Act, of the parent company's result of operations, as well as the financial position. The financial statements can be adopted and the Chairman and the other members of the Board of Directors and the President of the parent company can be discharged from liability for the period audited by us. The proposal by the Board of Directors concerning the disposition of the profit for the year is in compliance with the Finnish Companies' Act.

Espoo, January 22, 2004.

U.S. GAAP

The Group's consolidated financial statements are prepared in accordance with International Accounting Standards, which differ in certain respects from accounting principles generally accepted in the United States (U.S. GAAP). The principal differences between IAS and U.S. GAAP are presented below together with explanations of certain adjustments that affect consolidated net income and total shareholders' equity as of and for the years ended December 31:

	2003 EURm	2002 EURm	2001 EURm
Reconciliation of net income			
Net income reported under IAS	3 592	3 381	2 200
U.S. GAAP adjustments:			
Pension expense	-12	-5	-22
Development costs	322	-66	-104
Provision for social security cost on stock options	-21	-90	-132
Stock compensation expense	-9	-35	-85
Cash flow hedges	9	6	-22
Net investment in foreign companies	-	48	-
Amortization of identifiable intangible assets acquired	-22	-22	-7
Amortization of goodwill	162	206	28
Impairment of goodwill	151	104	-
Deferred tax effect of U.S. GAAP adjustments	-75	76	47
Net income under U.S. GAAP	4 097	3 603	1 903
Reconciliation of shareholders' equity			
Total shareholders' equity reported under IAS	15 148	14 281	
U.S. GAAP adjustments:			
Pension expense	-49	-37	
Additional minimum liability	-	-5	
Development costs	-99	-421	
Marketable securities and unlisted investments	49	77	
Provision for social security cost on stock options	14	35	
Deferred compensation	-10	-13	
Share issue premium	186	179	
Stock compensation	-176	-166	
Acquisition purchase price	3	4	
Amortization of identifiable intangible assets acquired	-51	-29	
Amortization of goodwill	396	234	
Impairment of goodwill	255	104	
Translation of goodwill	-293	-240	
Deferred tax effect of U.S. GAAP adjustments	64	147	
Total shareholders' equity under U.S. GAAP	15 437	14 150	

Pension expense and additional minimum liability

Under IAS, pension assets, defined benefit pension liabilities and expense are actuarially determined in a similar manner to U.S. GAAP. However, under IAS the prior service cost, transition adjustments and expense resulting from plan amendments are generally recognized immediately. Under U.S. GAAP, these expenses are generally recognized over a longer period. Also, under U.S. GAAP the employer should recognize an additional minimum pension liability charged to other comprehensive income when the accumulated benefit obligation (ABO) exceeds the fair value of the plan assets and this amount is not covered by the liability recognized in the balance sheet. The calculation of the ABO is based on approach two as described in EITF 88-1, Determination of Vested Benefit Obligation for a Defined Benefit Pension Plan, under which the actuarial present value is based on the date of separation from service. The U.S. GAAP pension adjustment reflects the difference between the prepaid pension asset and related pension expense as determined by applying IAS 19, Employee Benefits, and the pension asset and pension expense determined by applying FAS 87, Employers' Accounting for Pensions.

Development costs

Development costs have been capitalized under IAS after the product involved has reached a certain degree of technical feasibility. Capitalization ceases and depreciation begins when the product becomes available to customers. The depreciation period of these capitalized assets is between two and five years.

Under U.S. GAAP, software development costs would similarly be capitalized after the product has reached a certain degree of technical feasibility. However, certain non-software related development costs capitalized under IAS would not be capitalizable under U.S. GAAP and therefore would have been expensed under U.S. GAAP.

Under IAS, whenever there is an indication that capitalized development costs may be impaired the recoverable amount of the asset is estimated. An asset is impaired when the carrying amount of the asset exceeds its recoverable amount. Recoverable amount is defined as the higher of an asset's net selling price and value in use. Value in use is the present value of estimated discounted future cash flows expected to arise from the continuing use of an asset and from its disposal at the end of its useful life.

Under US GAAP, the unamortized capitalized costs of a computer software product is compared at each balance sheet date to the net realizable value of that product with any excess written off. Net realizable value is defined as the estimated future gross revenues from that product reduced by the estimated future costs of completing and disposing of that product, including the costs of performing maintenance and customer support required to satisfy the enterprise's responsibility set forth at the time of sale.

The amount of unamortized capitalized computer software costs, under U.S. GAAP, is EUR 438 million in 2003 (EUR 651 million in 2002).

Marketable securities and unlisted investments

Under IAS, prior to the adoption of IAS 39 on January 1, 2001, investments in marketable securities were carried at cost. Upon adoption of IAS 39, all available-for-sale investments, which includes all publicly listed and non-listed marketable securities, are measured at fair value and gains and losses are recognized within shareholders' equity until realized in the profit and loss account upon sale or disposal.

Under U.S. GAAP, the Group's listed marketable securities would be classified as available-for-sale and carried at aggregate fair value with

U.S. GAAP

gross unrealized holding gains and losses reported as a separate component of shareholders' equity. Investments in equity securities that are not traded on a public market are carried at historical cost, giving rise to an adjustment between IAS and U.S. GAAP.

Provision for social security cost on stock options

Under IAS, the Group provides for social security costs on stock options on the date of grant, based on the fair value of the option. The provision is adjusted for movements in the fair value of the options.

Under U.S. GAAP, no expense is recorded until the options are exercised.

Stock compensation

Under IAS, no compensation expense is recorded on stock options granted. Under U.S. GAAP, the Group follows the methodology in APB Opinion 25, Accounting for Stock Issued to Employees (APB 25), to measure employee stock compensation.

Certain employees have been granted stock options with an exercise price less than the quoted market value of the underlying stock on the date of grant. Also, certain employees have been granted restricted shares. This intrinsic value of the stock options and the restricted shares is recorded as deferred compensation within shareholders' equity and recognized in the profit and loss account over the vesting period of the stock options. The stock options issued are recorded as share issue premium.

Cash flow hedges

As a result of a specific difference in the rules under IAS 39 and FAS 133, Accounting for Derivative Instruments and Hedging Activities, relating to hedge accounting, certain foreign exchange gains and losses classified within equity under IAS would be included in the income statement under U.S. GAAP.

Net investment in foreign companies

Under IAS, on the disposal of a foreign entity, the cumulative amount of the exchange differences which have been deferred and which relate to that foreign entity should be recognized as income or as expenses in the same period in which the disposal is recognized. An enterprise may dispose of its interest in a foreign entity through sale, liquidation, repayment of share capital and permanent loans, or abandonment of all, or part of, that entity.

Under U.S. GAAP, the cumulative translation differences are reported in the profit and loss account only upon the sale or upon complete or substantially complete liquidation of the investment in a foreign entity.

Acquisition purchase price

Under IAS, when the consideration paid in a business combination includes shares of the acquirer, the purchase price of the acquired business is determined at the date on which the shares are exchanged.

Under U.S. GAAP, the measurement date for shares of the acquirer is the first day on which both the number of acquirer shares and the amount of other considerations become fixed. The average share price for a few days before and a few days after the measurement date is then used to value the shares.

Amortization of identifiable intangible assets acquired

Under IAS, acquired unpatented technology is not separately recognized on acquisition but is included within goodwill.

Under U.S. GAAP, any unpatented technology acquired in a business

combination is recorded as an identifiable intangible asset with a related deferred tax liability. The intangible asset is amortized over its estimated useful life. The adjustment to U.S. GAAP net income and shareholders' equity relates to the amortization and accumulated amortization, respectively, of Amber Networks' intangible asset.

The gross carrying amount of unpatented technology recorded as identifiable intangible assets, under U.S. GAAP, is EUR 109 million as of December 31, 2003 (EUR 109 million as of December 31, 2002), which is being amortized over an estimated useful life of five years. Accumulated amortization as of December 31, 2003 was EUR 51 million (EUR 29 million at December 31, 2002). The amortization expense for the year ended December 31, 2003 is EUR 22 million (EUR 22 million and EUR 7 million in 2002 and 2001, respectively).

Amortization expense on intangible assets is expected to be EUR 22 million in 2004 and 2005 and EUR 14 million in 2006.

The net carrying amount of other intangible assets under U.S. GAAP is EUR 623 million in 2003 and consists of capitalized development costs of EUR 438 million and acquired patents, trademarks and licenses of EUR 185 million. The Group does not have indefinite lived intangible assets. The amortization expense under U.S. GAAP of other intangible assets subject to amortization as of December 31, 2003, is expected to be approximately EUR 167 million for each of the next five years.

Amortization of goodwill

Under IAS, goodwill is amortized over its estimated useful life. Under U.S. GAAP, prior to July 1, 2001, goodwill was amortized over its estimated useful life consistent with IAS. The Group adopted the transition provisions of FAS 141, Business Combinations (FAS 141), with effect from July 1, 2001. The Group also adopted the provisions of FAS 142, Goodwill and Other Intangible Assets (FAS 142), on January 1, 2002. As a result, goodwill relating to purchase acquisitions and acquisitions of associated companies is no longer subject to amortization subsequent to the date of adoption. As the non-amortization of goodwill provisions of FAS 142 were effective immediately for all acquisitions after June 30, 2001, goodwill arising from the Amber Networks acquisition and other minor acquisitions is not amortized.

The U.S. GAAP adjustment reverses the amortization expense recorded under IAS and also reverses the movement in accumulated amortization under IAS during the period subsequent to the adoption of FAS 141 and FAS 142.

U.S. GAAP

The following table shows the results of operations as if FAS 142 were applied to prior periods:

EURm (except per share amounts)	2001
Net income as reported under U.S. GAAP	1 903
Add back: Goodwill amortization	274
Adjusted net income	2 177
Income per share/Basic	
Net income as reported under U.S. GAAP	0.40
Goodwill amortization	0.06
Adjusted net income	0.46
Income per share/Diluted	
Net income as reported under U.S. GAAP	0.40
Goodwill amortization	0.06
Adjusted net income	0.45

Impairment of goodwill

The Group has evaluated its existing goodwill relating to prior business combinations and has determined that an adjustment or reclassification to intangible assets as of January 1, 2002 was not required in order to conform to the new criteria in FAS 141. The Group has also reassessed the

useful lives and carrying values of other intangible assets, and will continue to amortize these assets over their remaining useful lives.

As of January 1, 2002, the Group performed the transitional impairment test under FAS 142 and compared the carrying value for each reporting unit to its fair value, which was determined based on discounted cash flows. Upon completion of the transitional impairment test, the Group determined that there was no impairment as of January 1, 2002, as the carrying value of each reporting unit did not exceed its fair value. The Group has also completed the annual impairment test required by FAS 142 during the fourth quarter of 2003 and 2002, which was also performed by comparing the carrying value of each reporting unit to its fair value based on discounted cash flows.

Under IAS, goodwill is allocated to "cash generating units", which are the smallest group of identifiable assets which includes the goodwill under review for impairment, and that generates cash inflows from continuing use that are largely independent of the cash inflows from other assets. Under IAS, the Group recorded in 2003 and 2002 an impairment of goodwill of EUR 151 million and EUR 104 million, respectively, related to Amber Networks as the carrying amount of the cash generating unit exceeded the recoverable amount of the unit. Upon completion of the annual impairment test, the Group determined that the impairment recorded for Amber Networks should be reversed for U.S. GAAP purposes because, at the Core Networks reporting unit level in 2003 and IP Mobility Network reporting unit level in 2002, where Amber Networks resides, the fair value of the reporting unit exceeded the book value of the reporting unit.

Below is a roll forward of U.S. GAAP goodwill during 2003 and 2002:

EURm	Nokia Mobile Phones	Nokia Networks	Nokia Ventures Organization	Common Group Functions	Group
Balance as of Jan. 1, 2002	351	382	80	-	813
Goodwill acquired	-	-	-	9	9
Impairment losses	-	-17	-61	-	-78
Translation adjustment	-202	-42	4	-	-240
Balance as of Dec. 31, 2002	149	323	23	9	504
Goodwill acquired	-	-	20	-	20
Translation adjustment	5	-52	-6	-	-53
Balance as of Dec. 31, 2003	154	271	37	9	471

Of the amount of goodwill under U.S. GAAP, EUR 259 million at December 31, 2003 relates to the acquisition of Amber Networks in 2001. Goodwill is not deductible for tax purposes.

Translation of goodwill

Under IAS, the Group translates goodwill arising on the acquisition of foreign subsidiaries at historical rates.

Under U.S. GAAP, goodwill is translated at the closing rate on the balance sheet date with gains and losses recorded as a component of shareholders' equity.

CRITICAL ACCOUNTING POLICIES

Our accounting policies affecting our financial condition and results of operations are more fully described in Note 1 to our consolidated financial statements. Certain of Nokia's accounting policies require the application of judgment by management in selecting appropriate assumptions for calculating financial estimates, which inherently contain some degree of uncertainty. Management bases its estimates on historical experience and various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the reported carrying values of assets and liabilities and the reported amounts of revenues and expenses that may not be readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions.

Nokia believes the following are the critical accounting policies and related judgments and estimates used in the preparation of its consolidated financial statements.

Revenue recognition

Revenue from the majority of the Group is recognized when persuasive evidence of an arrangement exists, delivery has occurred, the fee is fixed and determinable and collectibility is probable. The remainder of revenue is recorded under the percentage of completion method.

Nokia Mobile Phones' and Nokia Ventures Organization's, as well as certain of Nokia Networks', revenue is recognized when persuasive evidence of an arrangement exists, delivery has occurred, the fee is fixed and determinable and collectibility is probable. This requires us to assess at the point of delivery whether these criteria have been met. Upon making such assessment, revenue is recognized. In particular, Nokia records estimated reductions to revenue for customer programs and incentive offerings, including special pricing agreements, price protection and other volume based discounts, mainly in the mobile phone business. Sales adjustments for volume based discount programs are estimated based largely on historical activity under similar programs. Price protection adjustments are based on estimates of future price reductions and certain agreed customer inventories at the date of the price adjustment.

Nokia Networks' revenue from contracts involving solutions achieved through modification of telecommunications equipment is recognized on the percentage of completion basis when the outcome of the contract can be estimated reliably. A contract's outcome can be estimated reliably when total contract revenue can be estimated reliably, it is probable that economic benefits associated with the contract will flow to the company, and the stage of contract completion can be measured reliably. When we are not able to meet those conditions, the policy is to recognize revenues only equal to costs incurred to date, to the extent that such costs are expected to be recovered. Completion is measured by reference to costs incurred to date as a percentage of estimated total project costs.

The percentage of completion method relies on estimates of total expected contract revenue and costs, as well as the dependable measurement of the progress made towards completing the particular project. Recognized revenues and profit are subject to revisions during the project in the event that the assumptions regarding the overall project outcome are revised. The cumulative impact of a revision in estimates is recorded in the period such revisions become known and estimable. Losses on projects in progress are recognized immediately when known and estimable.

Revenue recognition on initial 3G network contracts started in 2002 when Nokia Networks achieved 3G functionality for its single-mode and dual-mode WCDMA 3G systems. Upon achieving 3G functionality for WCDMA network projects, we began recognizing revenue under the cost-to-cost input method of percentage of completion accounting and have consistently applied this method since that point. Until the time the 3GPP specifications required by our customers were met, we deferred the application of the cost-to-cost input model.

Nokia Networks' current sales and profit estimates for projects may change due to the early stage of a long-term project, new technology, changes in the project scope, changes in costs, changes in timing, changes in customers' plans, realization of penalties, and other corresponding factors.

Customer financing

We have provided customer financing and agreed extended payment terms with selected customers in our Nokia Networks business. In establishing credit arrangements, management must assess the creditworthiness of the customer and the timing of cash flows expected to be received under the arrangement. However, should the actual financial position of our customers or general economic conditions differ from our assumptions, we may be required to re-assess the ultimate collectibility of such financings and trade credits, which could result in a write-off of these balances in future periods and thus negatively impact our profits in future periods. Our assessment of the net recoverable value considers the collateral and security arrangements of the receivable as well as the likelihood and timing of estimated collections. For information about MobilCom/France Telecom, see Notes 7 and 15 to our consolidated financial statements. See also note 34(b) to our consolidated financial statements for a further discussion of long-term customer loans.

Allowances for doubtful accounts

We maintain allowances for doubtful accounts for estimated losses resulting from the subsequent inability of our customers to make required payments. If the financial conditions of our customers were to deteriorate, resulting in an impairment of their ability to make payments, additional allowances may be required in future periods. Management specifically analyzes accounts receivables and analyzes historical bad debt, customer concentrations, customer creditworthiness, current economic trends and changes in our customer payment terms when evaluating the adequacy of the allowance for doubtful accounts.

Inventory-related allowances

We periodically review our inventory for excess inventory, obsolescence and declines in market value below cost and record an allowance against the inventory balance for any such declines. These reviews require management to estimate future demand for our products. Possible changes in these estimates could result in revisions to the valuation of inventory.

Warranty provisions

We provide for the estimated cost of product warranties at the time revenue is recognized. Nokia's products are covered by product warranty plans of varying periods, depending on local practices and regulations. While we engage in extensive product quality programs and processes,

CRITICAL ACCOUNTING POLICIES

including actively monitoring and evaluating the quality of our component suppliers, our warranty obligations are affected by actual product failure rates (field failure rates) and by material usage and service delivery costs incurred in correcting a product failure. Our warranty provision is established based upon our best estimates of the amounts necessary to settle future and existing claims on products sold as of the balance sheet date. As our new products incorporate complex technologies, as we continuously introduce new products, and as local laws, regulations and practices may change, it will be increasingly difficult to anticipate our failure rates, the length of warranty periods and repair costs. While we believe that our warranty provisions are adequate and that the judgments applied are appropriate, the ultimate cost of product warranty could differ materially from our estimates. When the actual cost of quality of our products is lower than we originally anticipated, we release an appropriate proportion of the provision, and if the cost of quality is higher than anticipated, we increase the provision.

Provision for intellectual property rights, or IPR, infringements

We provide for the estimated future settlements related to asserted and unasserted IPR infringements based on the probable outcome of each infringement. The ultimate outcome or actual cost of settling an individual infringement may vary from our estimates.

Our products and solutions include increasingly complex technologies involving numerous patented and other proprietary technologies. Although we proactively try to ensure that we are aware of any patents related to our products and solutions under development and thereby avoid inadvertent infringement of proprietary technologies, the nature of our business is such that patent infringements may and do occur. Through contact with parties claiming infringement of their patented technology, or through our own monitoring of developments in patent cases involving our competitors, we identify potential IPR infringements.

We estimate the outcome of all potential IPR infringements made known to us through assertion by third parties, or through our own monitoring of patent-related cases in the relevant legal systems. To the extent that we determine that an identified potential infringement will more likely than not result in an outflow of resources, we record a liability based on our best estimate of the expenditure required to settle infringement proceedings.

Our experience with claims of IPR infringement is that there is typically a discussion period with the accusing party, which can last from several months to years. In cases where a settlement is not reached, the discovery and ensuing legal process typically lasts a minimum of one year. For this reason, the ultimate outflow relating to IPR infringement claims can last for varying periods of time, resulting in irregular movements in the IPR infringement provision.

Capitalized development costs

We capitalize certain development costs when it is probable that a development project will be a success and certain criteria, including commercial and technological feasibility, have been met. These costs are then amortized on a systematic basis over their expected useful lives, which due to the constant development of new technologies is between two to five years. During the development stage, management must estimate the commercial and technological feasibility of these projects as well as their expected useful lives. Should a product fail to substantiate its esti-

ated feasibility or life cycle, we may be required to write off excess development costs in future periods.

Whenever there is an indicator that development costs capitalized for a specific project may be impaired, the recoverable amount of the asset is estimated. An asset is impaired when the carrying amount of the asset exceeds its recoverable amount. The recoverable amount is defined as the higher of an asset's net selling price and value in use. Value in use is the present value of discounted estimated future cash flows expected to arise from the continuing use of an asset and from its disposal at the end of its useful life. For projects still in development, these estimates include the future cash out flows that are expected to occur before the asset is ready for use. See note 7 to our consolidated financial statements.

Impairment reviews are based upon our projections of anticipated future cash flows. The most significant variables in determining cash flows are discount rates, terminal values, the number of years on which to base the cash flow projections, as well as the assumptions and estimates used to determine the cash inflows and outflows. Management determines discount rates to be used based on the risk inherent in the related activity's current business model and industry comparisons. Terminal values are based on the expected life of products and forecasted life cycle and forecasted cash flows over that period. While we believe that our assumptions are appropriate, such amounts estimated could differ materially from what will actually occur in the future. For IAS, discounted estimated cash flows are used to identify the existence of an impairment while for US GAAP undiscounted future cash flows are used. Consequently, an impairment could be required under IAS but not under US GAAP.

Valuation of long-lived and intangible assets and goodwill

We assess the carrying value of identifiable intangible assets, long-lived assets and goodwill annually, or more frequently if events or changes in circumstances indicate that such carrying value may not be recoverable. Factors we consider important, which could trigger an impairment review, include the following:

- significant underperformance relative to historical or projected future results;
- significant changes in the manner of our use of the acquired assets or the strategy for our overall business; and
- significant negative industry or economic trends.

When we determine that the carrying value of intangible assets, long-lived assets or goodwill may not be recoverable based upon the existence of one or more of the above indicators of impairment, we measure any impairment based on discounted projected cash flows.

This review is based upon our projections of anticipated future cash flows. The most significant variables in determining cash flows are discount rates, terminal values, the number of years on which to base the cash flow projections, as well as the assumptions and estimates used to determine the cash inflows and outflows. Management determines discount rates to be used based on the risk inherent in the related activity's current business model and industry comparisons. Terminal values are based on the expected life of products and forecasted life cycle and forecasted cash flows over that period. While we believe that our assumptions

CRITICAL ACCOUNTING POLICIES

are appropriate, such amounts estimated could differ materially from what will actually occur in the future. For IAS these discounted cash flows are prepared at a cash generating unit level, and for U.S. GAAP these cash flows are prepared at a reporting unit level. Consequently, an impairment could be required under IAS and not U.S. GAAP or vice versa.

Deferred taxes

Management judgment is required in determining our provision for income taxes, deferred tax assets and liabilities and the extent to which deferred tax assets can be recognized. We recognize deferred tax assets if it is probable that sufficient taxable income will be available in the future against which the temporary differences and unused tax losses can be utilized. We have considered future taxable income and tax planning strategies in assessing whether deferred tax assets should be recognized.

Pensions

The determination of our pension benefit obligation and expense for defined benefit pension plans is dependent on our selection of certain assumptions used by actuaries in calculating such amounts. Those assumptions are described in Note 5 to our consolidated financial statements and include, among others, the discount rate, expected long-term rate of return on plan assets and annual rate of increase in future compensation levels. A portion of our plan assets is invested in equity securities. The equity markets have experienced volatility, which has affected the value of our pension plan assets. This volatility may make it difficult to estimate the long-term rate of return on plan assets. Actual results that differ from our assumptions are accumulated and amortized over future periods and therefore generally affect our recognized expense and recorded obligation in such future periods. Our assumptions are based on actual historical experience and external data regarding compensation and discount rate trends. While we believe that our assumptions are appropriate, significant differences in our actual experience or significant changes in our assumptions may materially affect our pension obligation and our future expense.

GROUP EXECUTIVE BOARD

January 22, 2004

Our articles of association provide for a Group Executive Board, which is responsible for managing the operations of Nokia. The Chairman and the members of the Group Executive Board are elected by the Board of Directors. Only the Chairman of the Group Executive Board can be a member of both the Board of Directors and the Group Executive Board. The current members of our Group Executive Board are set forth below.

Chairman Jorma Ollila, b. 1950

**Chairman and CEO of Nokia Corporation.
Group Executive Board member since 1986.
Chairman since 1992.
Joined Nokia 1985.**

Master of Political Science (University of Helsinki), Master of Science (Econ.) (London School of Economics), Master of Science (Eng.) (Helsinki University of Technology).
President and CEO, and Chairman of the Group Executive Board of Nokia Corporation 1992–1999, President of Nokia Mobile Phones 1990–1992, Senior Vice President, Finance of Nokia 1986–1989. Holder of various managerial positions at Citibank within corporate banking 1978–1985. Member of the Board of Directors of Ford Motor Company and UPM-Kymmene Corporation and Vice Chairman of Otava Books and Magazines Group Ltd. Member of The European Round Table of Industrialists.

Pekka Ala-Pietilä, b. 1957

**President of Nokia Corporation and Head of Customer and Market Operations.
Group Executive Board member since 1992.
Joined Nokia 1984.**

Master of Science (Econ.) (Helsinki School of Economics and Business Administration).
President of Nokia Corporation and Head of Nokia Ventures Organization 1999–2003. Executive Vice President and Deputy to the CEO of Nokia Corporation and President of Nokia Communications Products 1998–1999, President of Nokia Mobile Phones 1992–1998, Vice President, Product Marketing of Nokia Mobile Phones 1991–1992, Vice President, Strategic Planning of Nokia Mobile Phones 1990–1991.
Member of the Supervisory Board of SAP AG. Member of the Science and Technology Policy Council of Finland, member of the Board of the Finnish-American Chamber of Commerce, member of the Board of the Economic Information Bureau.

Dr. Matti Alahuhta, b. 1952

**Executive Vice President, Chief Strategy Officer.
Group Executive Board member since 1993.
With Nokia 1975–1982, rejoined 1984.**

Doctor of Science (Technology) (Helsinki University of Technology).
President of Nokia Mobile Phones 1998–2003, President of Nokia Telecommunications 1993–1998, Executive Vice President of Nokia Telecommunications 1992, Senior Vice President, Public Networks of Nokia Telecommunications 1990–1992.
Member of the Board of Directors of Kone Oyj. Chairman of the Board of Technology Industries of Finland, Vice Chairman of the Board of the Confederation of Finnish Industry and Employers, Vice Chairman of the Executive Committee of The International Institute for Management Development (IMD).

Sari Baldauf, b. 1955

Executive Vice President and General Manager of Networks.

**Group Executive Board member since 1994.
Joined Nokia 1983.**

Master of Science (Business Administration) (Helsinki School of Economics and Business Administration).
President of Nokia Networks 1999–2003, Executive Vice President of Nokia APAC 1997–1998, President, Cellular Systems of Nokia Telecommunications 1988–1996, Vice President, Business Development of Telenokia 1987–1988.
Member of the Board of Directors of SanomaWSOY Oyj. Member of the Board of International Youth Foundation (Baltimore, USA) and member of the Board of Foundation for Economic Education.

Dr. J. T. Bergqvist, b. 1957

**Senior Vice President and General Manager, Business Units, Networks.
Group Executive Board member since 2002.
Joined Nokia 1983.**

Doctor of Science (Technology) (Helsinki University of Technology).

Board member since 1993.

LL.M. (University of Helsinki).

Chairman 1998–1999 and 2000–2002 and Vice Chairman 1999–2000 of the Board of Directors of Nordea AB (publ). Chairman of the Executive Board and CEO of Merita Bank Ltd and CEO of Merita Ltd 1992–1997. President of Kymmene Corporation 1991–1992. Holder of various other executive positions in Finnish industry 1972–1991.

Chairman of the Board of Directors of UPM-Kymmene Corporation.

Arne Wessberg, b. 1943

**Chairman of the Board of Directors and Chief Executive Officer
of Yleisradio Oy (Finnish Broadcasting Company).**

Board member since 2001.

Studies in economics in the University of Tampere 1963–1966.

Chairman of the Board of Eurosport Consortium 1998–2000, member 1989–1997.

Member of the Board of Trustees of IIC 1996–1998 and 1993–1995. Holder of various positions at Yleisradio Oy (Finnish Broadcasting Company) in different executive roles 1979–1994 and as a reporter and editor 1971–1976.

President of the European Broadcasting Union (EBU), member of the Board of Directors of the International Council of NATAS and member of the Trilateral Commission (Europe).

On January 22, 2004, with an amendment on February 6, 2004, the Corporate Governance and Nomination Committee announced its proposal to the Annual General Meeting convening on March 25, 2004 regarding the election of the members of the Board of Directors. As Mr. Robert F. W. van Oordt has reached the Nokia Board's retirement age of 68 years, as provided by the Corporate Governance guidelines of Nokia, he will not stand for re-election to the Board. The Corporate Governance and Nomination Committee will propose that the number of board members be decreased from the current nine to eight and that the following persons be re-elected for a term of one year: Mr. Paul J. Collins, Mr. Georg Ehrnrooth, Dr. Bengt Holmström, Mr. Per Karlsson, Mr. Jorma Ollila, Dame Marjorie Scardino, Mr. Vesa Vainio and Mr. Arne Wessberg.

RISK FACTORS

January 22, 2004

Set forth below is a description of factors that may affect our business, results of operations and share price from time to time.

- Changes in the mobile communications industry require us to develop complex, evolving technologies to use in our various businesses, some of which are new to us. If we fail to develop these technologies or successfully commercialize them as new advanced products and solutions that meet the demands of the market, or fail to do so on a timely basis, or if the evolution of our operating environment is slower than anticipated leading to delays in the deployment and acceptance of new services, it may have a material adverse impact on our business, our ability to meet our targets, and our results of operations.
- The development of the mobility industry is significantly altering the competitive landscape and increasing competition. We are entering businesses where the competitive landscape is new to us or still in the early stages of development. Our failure to respond successfully to this development may have a material adverse impact on our business, our ability to meet our targets, and our results of operations.
- Reaching our targets depends on numerous factors, such as our ability to offer products and solutions that meet the demands of the market and to manage the prices and costs of our products and solutions, our operational efficiency, the pace of development and acceptance of new technologies, our entry into new business areas, and general economic conditions. Depending on those factors, some of which we may influence and others of which are beyond our control, we may fail to reach our targets and we may fail to provide accurate forecasts of our sales and results of operations.
- Our sales and results of operations could be adversely affected if we fail to efficiently manage our manufacturing and logistics, or fail to ensure that our products and solutions meet our and our customers' quality, safety and other corresponding requirements and are delivered in time.
- We are developing a number of our new products and solutions in collaboration with other companies. If any of these companies were to fail to perform, we may not be able to bring our products and solutions to market successfully or on a timely basis.
- We depend on our suppliers for the timely delivery of components and for their compliance with our supplier requirements, such as, most notably, our and our customers' product quality, safety and other corresponding standards. Their failure to do so could adversely affect our ability to deliver our products and solutions successfully and on time.
- Our operations rely on complex and highly centralized information technology systems and networks. If any system or network disruption occurs, this reliance could have a material adverse impact on our operations, sales and operating results.
- Our products and solutions include increasingly complex technology involving numerous patented and other proprietary technologies. As a consequence, evaluating the protection of the technologies we intend to use is more difficult than before, and we may face claims that we have infringed third parties' intellectual property rights. The use of increasingly complex technology may result in increased licensing costs for us, restrictions on our ability to use such technology and offer our products and solutions, the invalidation of intellectual property rights on which we depend and/or costly and time-consuming litigation.
- The global networks business relies on a limited number of customers and large multi-year contracts. Unfavorable developments under a major contract or in relation to a major customer may affect our sales, our results of operations and cash flow adversely.
- Customer financing to network operators can be a competitive requirement and could affect our sales, results of operations, balance sheet and cash flow adversely.
- Our sales, costs and results are affected by exchange rate fluctuations, particularly between the euro, which is our reporting currency, and the US dollar, the UK pound sterling and the Japanese yen as well as certain other currencies.
- If we are unable to recruit, retain and develop appropriately skilled employees, we may not be able to implement our strategies and, consequently, our results of operations may suffer.
- If we are unable to effectively and smoothly implement the new organizational structure effective January 1, 2004, we may experience a material adverse impact on our operations, sales and results of operations.
- Our sales derived from, and assets located in, emerging market countries may be adversely affected by economic, regulatory and political developments in those countries.
- Allegations of health risks from the electromagnetic fields generated by base stations and mobile handsets, and the lawsuits and publicity relating to them, regardless of merit, could affect our operations negatively by leading consumers to reduce their use of mobile devices or by causing us to allocate monetary and personnel resources to these issues.
- Changes in various types of regulation in countries around the world could affect our business adversely.
- Our share price has been and may continue to be volatile in response to conditions in the global securities markets generally and in the communications and technology sectors in particular.

We file an annual report on Form 20-F with the US Securities and Exchange Commission, which report also includes a description of risk factors that may affect us. Nokia filed its Form 20-F annual report for the year ended December 31, 2003 on February 6, 2004. For further information please refer to our Form 20-F annual report.

Pursuant to the provisions of the Finnish Companies Act and our articles of association, the control and management of Nokia is divided among the shareholders in a general meeting, the Board of Directors and the Group Executive Board. Our articles of association provide for a Group Executive Board, which is responsible for managing the operations of Nokia. The Chairman and the members of the Group Executive Board are elected by the Board of Directors. Only the Chairman of the Group Executive Board can be a member of both the Board of Directors and the Group Executive Board.

The Board of Directors

The operations of the company are managed under the direction of the Board of Directors, within the framework set by the Finnish Companies Act and our articles of association and the complementary Corporate Governance Guidelines and related charters as adopted by the Board.

The responsibilities of the Board of Directors

The Board represents and is accountable to the shareholders of the company. The Board's responsibilities are active and not passive and include the responsibility to regularly evaluate the strategic direction of the company, management policies and the effectiveness with which management implements its policies. The Board's responsibilities further include overseeing the structure and composition of the company's top management and monitoring legal compliance and the management of risks related to the company's operations. In doing so the Board may set out annual ranges and/or individual limits for capital expenditures, investments and divestitures and financial commitments not to be exceeded without Board approval.

The Board has the responsibility for appointing and discharging the Chief Executive Officer and the President and the other members of the Group Executive Board. Subject to the requirements of Finnish law, the independent directors of the Board will confirm the compensation and the employment conditions of the Chief Executive Officer and the President upon the recommendation of the Personnel Committee. The compensation and employment conditions of the other members of the Group Executive Board are approved by the Personnel Committee.

Election, composition and meetings of the Board of Directors

Pursuant to the articles of association, Nokia Corporation has a Board of Directors composed of a minimum of seven and a maximum of ten members. The members of the Board are elected for a term of one year at each Annual General Meeting, which convenes each March or April. Since the Annual General Meeting held on March 27, 2003, the Board has consisted of nine members. Nokia's CEO, Mr. Jorma Ollila, also serves as the Chairman of the Board. The other members of the Board are all non-executive and independent as defined in the Finnish rules and regulations. The Board convened nine times during 2003, three of the meetings were held in the form of a conference call, and the average ratio of attendance at the meetings was 99%. The non-executive directors meet without executive directors at least twice a year, or more often as they deem appropriate. The Board and each committee also has the power to hire independent legal, financial or other advisors as it deems necessary.

The Board elects a Chairman and a Vice Chairman from among its members for one term at a time. On March 27, 2003 the Board resolved that Mr. Jorma Ollila should continue to act as Chairman and that Mr. Paul

J. Collins should continue to act as Vice Chairman. The Board also appoints the members and the chairmen for its committees from among its non-executive, independent members for one term at a time.

The Board and each of its committees conducts annual performance self-evaluations. The Corporate Governance Guidelines concerning the directors' responsibilities, the composition and selection of the Board, Board committees and certain other matters relating to corporate governance are available on our website, www.nokia.com.

The Committees of the Board of Directors

The Audit Committee consists of a minimum of three members of the Board, who meet all applicable independence, financial literacy and other requirements of Finnish law and applicable stock exchange rules. Since March 27, 2003, the Committee has consisted of the following four members of the Board: Mr. Robert F.W. van Oordt (Chairman), Mr. Georg Ehrnrooth, Mr. Per Karlsson and Mr. Arne Wessberg.

The Audit Committee is established by the Board primarily for the purpose of overseeing the accounting and financial reporting processes of the company and audits of the financial statements of the company. The Committee is responsible for assisting the Board's oversight of (1) the quality and integrity of the company's financial statements and related disclosure, (2) the performance of the company's internal controls and risk management and risk audit function, (3) the company's compliance with legal and regulatory requirements, (4) the external auditor's qualifications and independence, and (5) the performance of the external auditor subject to the requirements of Finnish law. The Committee also maintains procedures for the receipt, retention and treatment of complaints received by the company regarding accounting, internal controls, or auditing matters. Under Finnish law, our external auditor is elected by our shareholders at the Annual General Meeting. The Audit Committee makes a recommendation to the shareholders in respect of the appointment of the external auditor based upon its evaluation of the qualifications and independence of the auditor to be proposed for election or reelection. The Audit Committee meets at least four times per year based upon a schedule established at the first meeting following the appointment of the Committee. The Committee meets separately with the representatives of the management and the external auditor at least twice a year. The Audit Committee held four meetings in 2003.

The Personnel Committee consists of a minimum of three members of the Board. Since March 27, 2003, the Personnel Committee has consisted of the following four members of the Board: Mr. Paul J. Collins (Chairman), Dr. Bengt Holmström, Dame Marjorie Scardino and Mr. Vesa Vainio.

The primary purpose of the Personnel Committee is to oversee the personnel policies and practices of the company. It assists the Board in discharging its responsibilities relating to all compensation of the company's executives and the terms of employment of the same. The Committee has overall responsibility for evaluating, resolving and making recommendations to the Board regarding (1) compensation of the company's top executives and their employment conditions, (2) all equity-based plans, (3) incentive compensation plans, policies and programs of the company affecting executives, and (4) other significant incentive plans. The Committee is responsible for ensuring the above compensation programs are performance-based, properly motivate management, support overall corporate strategies and align with shareholders' interests. The Committee is responsible for the review of senior management

CORPORATE GOVERNANCE

development and succession plans. The Personnel Committee convened three times in 2003.

The **Corporate Governance and Nomination Committee** consists of three to five members of the Board. Since March 27, 2003, the Corporate Governance and Nomination Committee has consisted of the following three members of the Board: Mr. Paul J. Collins (Chairman), Dr. Bengt Holmström and Mr. Vesa Vainio.

The Corporate Governance and Nomination Committee's purpose is (1) to prepare the proposals for the general meetings in respect of the composition of the Board along with the director remuneration to be approved by the shareholders, and (2) to monitor issues and practices related to corporate governance and to propose necessary actions in respect thereof.

The Committee fulfills its responsibilities by (I) actively identifying individuals qualified to become members of the Board, (II) recommending to the shareholders the director nominees for election at the Annual General Meetings, (III) monitoring significant developments in the law and practice of corporate governance and of the duties and responsibilities of directors of public companies, (IV) assisting the Board and each committee of the Board in its annual performance self-evaluation, including establishing criteria to be used in connection with such evaluation, and (V) developing and recommending to the Board and administering the Corporate Governance Guidelines of the company. The Corporate Governance and Nomination Committee held four meetings in 2003.

The charters of each of the committees are available on our website, www.nokia.com.

Under Finnish law, if the roles of the Chairman and the Chief Executive Officer are combined, the company must have a President. The responsibilities of the President are defined in the Finnish Companies Act and other relevant legislation along with any additional guidance and instructions given from time to time by the Board and the Chief Executive Officer. The responsibilities of the Chief Executive Officer are determined by the Board.

We also have a company Code of Conduct which is equally applicable to all of our employees, directors and management and is accessible at our website, www.nokia.com. As well, we have a Code of Ethics for the Principal Executive Officers and the Senior Financial Officers. For more information about our Code of Ethics, please see www.nokia.com.

Nokia's corporate governance practices comply with the Corporate Governance Recommendation for Listed Companies approved by Hex Plc, the Central Chamber of Commerce of Finland and the Confederation of Finnish Industry and Employers in December 2003.*

Proposal of the Corporate Governance and Nomination Committee of the Board

On January 22, 2004, with an amendment on February 6, 2004, the Corporate Governance and Nomination Committee announced its proposal to the Annual General Meeting convening on March 25, 2004 regarding the election of the members of the Board of Directors. As Mr. Robert F. W. van Oordt has reached the Nokia Board's retirement age of 68 years, as provided by the Corporate Governance guidelines of Nokia, he will not stand for re-election to the Board. The Corporate Governance and Nomination Committee will propose that the number of board members be decreased from the current nine to eight and that the following persons be re-elected for a term of one year: Mr. Paul J. Collins, Mr. Georg Ehrnrooth, Dr. Bengt Holmström, Mr. Per Karlsson, Mr. Jorma Ollila, Dame Marjorie Scardino, Mr. Vesa Vainio and Mr. Arne Wessberg.

Compensation of the Members of the Board of Directors and the Group Executive Board

Compensation of the Board of Directors 2001–2003

Year	Chairman		Vice Chairman		Other Members	
	Gross annual retainer (EUR 1 000)	Shares received ¹	Gross annual retainer (EUR 1 000)	Shares received ¹	Gross annual retainer (EUR 1 000)	Shares received ¹
2001	130	1 530	100	1 178	75	882
2002	130	2 650	100	2 038	75	1 529
2003	150	4 032	150 ²	4 032 ²	100 ³	2 688 ³

¹ As part of the Gross Annual Retainer for that year.

² Includes a retainer of EUR 125 000 for services as Vice Chairman of the Board and EUR 25 000 for services as Chairman of the Personnel Committee. Of the shares received in 2003, 3 360 shares were for services as Vice Chairman of the Board and 672 shares for services as Chairman of the Personnel Committee.

³ The 2003 retainer of Mr. Robert F. W. van Oordt amounted to a total of EUR 125 000, consisting of a retainer of EUR 100 000 for services as Member of the Board and EUR 25 000 for services as Chairman of the Audit Committee. The shares received by Mr. Robert F. W. van Oordt amounted to a total of 3 360 shares, consisting of 2 688 shares for services as a Member of the Board and 672 shares for services as Chairman of the Audit Committee.

* The Corporate Governance Recommendation for listed Companies recommends a company to describe the manner in which the internal audit function of the company is organized. As Nokia has comprehensive risk management and internal control processes in place, there is no separate internal audit function at Nokia.

Board of Directors

For the year ended December 31, 2003, the aggregate compensation of the eight non-executive members of the Board of Directors was approximately EUR 0.875 million. Non-executive members of the Board of Directors do not receive bonuses or stock options. The remuneration for members of our Board of Directors for each term expiring at the close of the next Annual General Meeting is resolved annually by our Annual General Meeting, after being proposed by the Corporate Governance and Nomination Committee of our Board.

The table on page 64 depicts the total annual remuneration paid to the members of our Board of Directors, as resolved by the Annual General Meetings in the respective years. Since the fiscal period 1999, approximately 60% of each Board member's annual retainer has been paid in cash, with the balance in Nokia Corporation shares acquired from the market.

Group Executive Board

For the year ended December 31, 2003, Nokia had a Group Executive Board consisting of 10 members. Three new members have been appointed to serve on the Group Executive Board as from January 1, 2004. The aggregate compensation, excluding gains realized upon the exercise of stock options, of the 10 members of the Group Executive Board for 2003, including Mr. Jorma Ollila, was approximately EUR 10.9 million. Of this amount, approximately EUR 5.4 million was paid pursuant to bonus arrangements for the 2003 calendar year. The bonuses of the members of the Group Executive Board are paid as a percentage of annual base salary based on Nokia's Short-Term Incentive Plan. Short-term cash incentives are paid twice each year based on performance for each of Nokia's short-term plans that end on June 30 and December 31 of each year.

Short-term incentive payments are primarily determined based on a formula that considers the company's performance to pre-established targets for Net Sales, Operating Profit and Net Working Capital efficiency measures. Certain executives may have objectives related to quality, technology innovation, new product revenue, or other objectives of key strategic importance, which may require a discretionary assessment of performance by the Personnel Committee.

Subject to the requirements of Finnish law, the independent directors of the Board will confirm the compensation and the employment conditions of Mr. Jorma Ollila and Mr. Pekka Ala-Pietilä upon the recommendation of the Personnel Committee. The compensation and employment conditions of the other members of the Group Executive Board are approved by the Personnel Committee.

Our executives forming the Group Executive Board in 2003 participate in the Finnish TEL pension system, which provides for a retirement benefit based on years of service and earnings according to the prescribed statutory system. Under the Finnish TEL pension system, base pay, incentives and other taxable fringe benefits are included in the definition of earnings, although gains realized from stock options are not. The Finnish TEL pension scheme provides for early retirement benefits at age 60 and full retirement benefits at age 65. The current TEL provisions cap the total pension benefit at 60% of the pensionable earnings amount.

For Mr. Jorma Ollila, Mr. Pekka Ala-Pietilä, Dr. Matti Alahuhta, Mr. Olli-Pekka Kallasvuo and Ms. Sari Baldauf, Nokia offers a full retirement benefit at age 60. The full retirement benefit is based on the executive's pensionable earnings at age 60, assuming that the executive continues service with

Nokia through age 65. Nokia does not offer any such benefit to any other members of the 2003 Group Executive Board.

Service contracts of the Chairman and CEO and of the President

We have a service contract with each of Mr. Jorma Ollila and Mr. Pekka Ala-Pietilä, each of an indefinite duration. The Board has also agreed with Mr. Jorma Ollila on the continuation of his services as CEO of Nokia through 2006.

Mr. Jorma Ollila's contract has provisions for severance payments for up to 24 months of compensation (both base compensation and bonus) in the event of his termination of employment for reasons other than cause, including a change of control. As previously mentioned, Mr. Jorma Ollila is further entitled to a full statutory pension from the date he turns 60 years of age, instead of the statutory age of 65.

Mr. Pekka Ala-Pietilä's contract has provisions for severance payments for up to 18 months of compensation (both base compensation and bonus) in the event of his termination of employment for reasons other than cause, including a change of control. As previously mentioned, Mr. Pekka Ala-Pietilä is entitled to a full statutory pension from the date he turns 60 years of age, instead of the statutory age of 65.

Management share ownership

The following tables set forth the number of shares and ADSs beneficially held by members of the Board of Directors and the Group Executive Board as of December 31, 2003 (not including the new Group Executive Board Members whose service began on January 1, 2004).

Board of Directors, Dec. 31, 2003

	Shares ¹	ADSs
Jorma Ollila ²	189 388	-
Paul J. Collins	-	109 376
Georg Ehrnrooth ³	305 559	-
Bengt Holmström	7 687	-
Per Karlsson ³	8 517	-
Robert F.W. van Oordt	7 719	-
Marjorie Scardino	-	5 099
Vesa Vainio	18 347	-
Arne Wessberg	5 099	-
Total	542 316	114 475

¹ The number of shares includes not only shares acquired as compensation for services as member of the Board of Directors, but also shares acquired by any other means.

² For Mr. Jorma Ollila's holdings of stock options, see the table under "Management Stock Option Ownership" below.

³ Mr. Georg Ehrnrooth's and Mr. Per Karlsson's holdings include both shares held personally and shares held through a company.

¹ Each 1999 A, B and C option originally granted entitles the holder to subscribe for four shares of Nokia stock. The exercise price per share and the number of shares for the 1999 A, B and C options have been adjusted for the share split that took place in April 2000.

² Each 2001 A and B option originally granted entitles the holder to subscribe for one share of Nokia stock. The 2001 A and B options were 25% exercisable on July 1, 2002. An additional 6.25% of the original grant amount becomes exercisable each calendar quarter thereafter, so that the options will be fully exercisable on July 1, 2005. As of December 31, 2003, of the original grant of 2001 A and B options, 56.25% was vested and exercisable.

³ Each 2001 C option originally granted entitles the holder to subscribe for one share of Nokia stock. The 2001 C options were 25% exercisable on January 1, 2003 and an additional 6.25% will be exercisable each calendar quarter thereafter, so that the options will be fully exercisable on January 2, 2006. As of December 31, 2003, of the original grant of 2001 C options, 43.75% was vested and exercisable.

⁴ Each 2002 A and B option originally granted entitles the holder to subscribe for one share of Nokia stock. The 2002 A and B options were 25% exercisable on July 1, 2003 and an additional 6.25% will be exercisable each calendar quarter thereafter, so that the options will be fully exercisable on July 3, 2006. As of December 31, 2003, of the original grant of 2002 A and B options, 31.25% was vested and exercisable.

⁵ Each 2003 option originally granted entitles the holder to subscribe for one share of Nokia stock. The 2003 options will be 25% exercisable on July 1, 2004 and an additional 6.25% will be exercisable each calendar quarter thereafter, so that the options will be fully exercisable on July 2, 2007. As of December 31, 2003, of the original grant of 2003 options none was vested and exercisable.

Insiders' trading in Securities

The Board of Directors has established a policy in respect of insiders' trading in Nokia securities. Under the policy, the holdings of Nokia securities by the primary insiders (as defined) are public information, which is available in the Finnish Central Securities Depository and on the company's website. As well, both primary insiders and secondary insiders (as defined) are subject to a number of trading restrictions and rules, including among other things, prohibitions on trading in Nokia securities during the three-week "closed-window" period immediately preceding

the disclosure of our quarterly results and the four-week "closed-window" period immediately preceding the disclosure of our annual results. In addition, the company may set trading restrictions based on project participation. We update our insider trading policy from time to time and monitor our insiders' compliance with the policy on a regular basis. Nokia's Insider Policy complies with the Helsinki Exchanges Guidelines for Insiders and also sets out requirements beyond those guidelines.

Stock ownership guidelines for executive management

The goal of our long-term, equity-based incentive awards is to recognize progress towards the achievement of our strategic objectives, and to focus executives on building value for shareholders. In addition to stock option grants, we encourage stock ownership by our top executives. In January 2001, we introduced a stock ownership commitment guideline with minimum recommendations tied to annual fixed salaries. For the members of the Group Executive Board, the recommended minimum investment in our shares corresponds to two times the member's annual base salary, to be fulfilled by January 2006. This timeline is adjusted for persons, including also the new Group Executive Board members whose service began on January 1, 2004, to whom we have started to apply the guidelines after their initial introduction.

Nokia Stock Option Plans

For a summary of the existing Nokia stock option plans please see www.nokia.com. The plans have been approved by the Annual General Meetings in the year of the launch of the plan.

Restricted Shares

In 2003, we granted a total of 452 250 Restricted Shares to 28 of our key management personnel who are critical to the future success of Nokia. These Restricted Shares will vest in October 2006, at which time the shares will be transferred and delivered to the recipients. Until the shares are transferred and delivered, the recipients will not have any voting or dividend rights associated with these shares. Mr. Pertti Korhonen, a member of the 2003 Group Executive Board, was granted 35 000 Restricted Shares in 2003.

Nokia's Equity Based Compensation Program 2004

On January 22, 2004, the Board of Directors approved a new equity based compensation program 2004 for Nokia, as proposed by the Personnel Committee. Under this program, Nokia will introduce Performance Shares as the main element of its broad based equity compensation program to further emphasize the performance element in the employees' long-term incentives. As part of this change, Nokia will grant significantly fewer stock options in 2004 compared to 2003.

The new, more diversified program aligns the potential value received by participants directly with the performance of the company. The target group for this new share-based incentive program continues to be broad and to include a wide number of employees on many levels of the organization. However, the number of actual participants will be smaller as the program increases the focus on rewarding achievement and on retaining high potential and critical employees.

Performance Shares

Performance Shares represent a commitment by the company to deliver Nokia shares to employees at a future point in time, subject to the company's fulfillment of pre-defined performance criteria. Performance Shares will vest subject to the company's performance reaching at least one of the threshold levels measured by two independent, pre-defined performance criteria: the company's Average Net Sales Growth and EPS Growth (basic, reported) for the 2004 to 2007 period. Both the EPS and Average Net Sales Growth criteria will have an equal weight of 50%.

The initial threshold for the Average Annual Net Sales Growth criteria is 4% resulting in the vesting of up to 2 million Performance Shares. Similarly, the first threshold for the annual EPS Growth criteria is 3% resulting in the vesting of up to 2 million Performance Shares. The maximum performance for Average Annual Net Sales Growth criteria is 16% resulting in the vesting of up to 8.5 million Performance Shares. Similarly, the maximum performance for the annual EPS Growth criteria is 12% resulting in the vesting of up to 8.5 million Performance Shares. The EPS percentages above are approximate figures based on the criteria expressed in euro cents. Performance exceeding the set criteria does not increase the number of Performance Shares vesting.

Under the 2004 Program, the maximum performance level for both criteria will result in the vesting of the maximum of 17 million Performance Shares. If the threshold levels of performance are not achieved, none of the Performance Shares will vest. For performance between the threshold and maximum performance levels the payout follows a linear scale. If required performance levels are achieved, the first payout will take place in 2006 up to a maximum of 4 million shares. The second and final payout, if applicable, will be in 2008. The company will determine the method by which the shares are obtained for delivery after vesting, which may also include cash settlement.

Stock Options and Restricted Shares

Under the 2004 program, Nokia will issue significantly fewer Stock Options for incentive purposes than in 2003 when approximately 30 million options were granted under the Stock Option Program out of the maximum of 94.6 million Stock Options as approved by the Annual General Meeting the same year. In 2004, the maximum number of Stock Options to be granted is 7 million.

Going forward, the company will continue to use a limited number of Restricted Shares to recruit, retain, reward and motivate selected high potential and critical employees. In 2004, the maximum number of Restricted Shares to be granted is 2 million.

The maximum number of shares and/or options to be granted under the 2004 Equity Program is 26 million, or approximately 0.6 per cent of all outstanding shares.

Administration of the Program

Following the approval of the program by the Board of Directors, the Personnel Committee will administer the program according to its charter, including the determination of the principles under which grants will be made. The Board of Directors will approve the grants to the CEO and the President.
