Report of the Board of Directors

Pulp Market

The world bleached market pulp capacity was 46 million tonnes in 2006. The capacity rose by 0.5 million tonnes from the previous year. Softwood pulp capacity fell, partly because of mill closures, by 0.5 million tonnes to 22.5 million tonnes. The pulp demand-capacity ratio improved from the previous year, from 93 per cent to 95.5 per cent. Softwood pulp demand increased by three percentage units to 95 per cent.

As a result of the good market situation the pulp price rose from the beginning of the year till the end of December, from USD 600 to USD 730. The pulp price increase in EUR was dampened down by the strengthening of the EUR against the USD, from 1.18 to 1.32.

Operation and Result

The production in 2006, 361,919 tonnes, was a new production record. The earlier record from 2004 was improved by 13,364 tonnes. In November the average daily production was 1,116 tonnes exceeding the 1,100 tonnes/d milestone for the first time. The earlier record improved by 40 tonnes. A three-day strike in May caused a disruption in production. In the previous year 55 days' production was lost due to labour market disturbances.

The pulp stock at the end of the year corresponds to approximately two weeks' production.

	2006	2005	2004
Pulp production, tonnes	361,919	304,082	348,555
Pulp stock, 31 Dec., tonnes	14,373	17,545	15,912
Total number of operating days	353.5	306	349
Total deliveries, tonnes	365,090	302,449	357,532
Deliveries to shareholders, tonnes	314,232	272,180	321,833
Market pulp deliveries, tonnes	50,858	30,269	35,698
Export deliveries, tonnes	162,934	130,316	137,240
Crude tall oil deliveries, tonnes	9,059	5,402	11,505
Turpentine deliveries, tonnes	917	720	1,145

The turnover and operating profit of the accounting period were greatly increased by the higher production and sales volumes as well as higher pulp prices than in the previous year.

	2006	2005	2004

Equity ratio, % *)	50.9	41.4	48.2
*) Group			

Investments

In 2006 investments consist of the barking drum feed head renewal, modernisation of the cooking plant chip silo to improve its operational reliability, and implementing an on-line measurement based on the fibre shape, which enables the characterisation of the pulp quality and the renewal of the electric drive of drying machine 4. The redemption of the net book value of the bleaching plant leasing contract is also included in the investments.

	2006	2005	2004
Investments, EUR million	6.1	6.8	4.8

Personnel and Safety

The average number of personnel was for the first time less than 300. At the end of the year Sunila Oy employed 275 (290) persons on a permanent basis. The average number of persons employed during the year was 297 (311). At the beginning of 2007 Sunilan Mittayhtiö Oy was merged into Sunila Oy, which increased the number of personnel by nine persons.

The number of personnel's absences caused by illness or accidents was high due to several long-term sick leaves.

In the negotiations conducted during the year an agreement on work rearrangements was reached. According to this agreement the number of employees will decrease by 14 persons. The functions affected are cleaning, wood yard operations and pulp stock. The vehicle repair shop work was outsourced.

Safety is one of Sunila Oy's key focus areas. The target is to reduce the number of accidents annually and to increase the number of near miss reports and expressions of concern. In the spring of 2006 an extensive rescue drill was held in cooperation with the local emergency services (Kymenlaakson Pelastuslaitos) simulating a chlorine dioxide leak. A project for a systematic recognition of work safety threats and risks is ongoing in co-operation with a group of experts.

A deposit of the profit sharing system, which is based on the operating profit, is made into the Sunila Oy personnel fund annually. Also a share, decided by the personnel of the fiscal year's productivity bonus, is deposited into the personnel fund. The 2006 share of these, included in the personnel cost, was EUR 0.3 million.

	2006	2005	2004			
Average number of personnel	297	311	321

Accidents, incidents *)	12	8	18			
Near miss reports/expressions						
of concern	82	64	42			
*) Absence from work more than eight hours						

Environmental Protection

The Southeast Finland Regional Environment Centre granted Sunila Oy and Sunilan Puhdistamo Oy new environmental permits in March. Both companies have filed appeals against the decisions to the Administrative Court of Vaasa. The appeals focus on the tightening permit limits of waste water as well as particle emission permit limits for the recovery boiler and lime kiln.

Sunila Oy's emission rights and emissions of carbon dioxide from fossil fuels as well as sold rights are presented in the following table:

	2006	2005
Carbon dioxide emission rights, tonnes	52,400	52,400
Carbon dioxide emissions, tonnes	48,100	42,100
Sale of emission rights, tonnes	10,000	0

An update of the EMAS environmental report from 2004 with the 2006 details will be published in a separate report.

The waste water load was below the permit limits. In the summer 30 m³ of whitewash leaked from the causticizing process through the filtered water sewer into the sea. The leak did not cause any noticeable environmental damage. To prevent the possibility of a new leak it was decided immediately that the sewer system will be altered. The bark boiler flue gas carbon monoxide emission level and the furnace temperature are reported monthly to the Southeast Finland Regional Environment Centre. The burning circumstances of the bark boiler have been actively developed in 2006.

The Sunila Oy Chain of Custody system for wood procurement management was certified according to the FSC-standard in July. The Chain of Custody system for wood procurement management was certified according to the PEFC-standard already in the spring of 2004.

Sunila Oy participates in the Finnish Forest Industries Federation's study on the occurrence of legionella bacteria in waste water treatment at biological purifying plants.

Research and Development

Research and development focused on different wood fractions and running models of the fibre line aiming to improve the product quality and its evenness.

A Master's thesis was made of the factors affecting the pulp strength. In an ongoing product development project the optimal modelling of the various fibre properties of wood raw material fractions is being investigated.

Risks and Insecurities of Operations

The price of pulp has traditionally been cyclical reflecting the general economic trends and pulp supply-demand balance. Pulp pricing is based on the USD and any changes in the exchange rate have a significant impact on the company's profitability. The most important cost factor are the changes in wood prices. The continuous availability of wood is vital for the operation of the mill. Smooth production and high production volume in comparison to capacity are essential for cost and operational efficiency.

The company is protected for property and operation interruption risks by insurance. Risks and production processes are evaluated annually for risk prevention.

The company does not have any currency-based loans in its balance sheet. Some USD-based market pulp accounts receivable are hedged with forward exchange agreements.

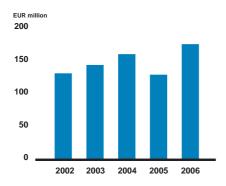

Outlook for the Year 2007

A warm and rainy late autumn and early winter have caused great difficulty for the harvesting of wood and its deliveries to the mill. The volumes of the wood fractions of spruce and saw mill chips, which are important for the product quality, will remain low in the first half of the year.

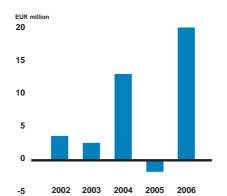

The pulp industry suffers from a lack of wood in the Scandinavian countries and also in Central Europe and Canada.

The softwood pulp market situation is expected to continue good during the early part of the year.

Proposal of the Board of Directors

The Board of Directors proposes to the Annual Shareholders' Meeting that

the profit from the financial year and the profit from the previous years	EUR EUR	14,484,099.91 33,471,929.55
be transferred to the profit and loss account whereafter the profit and loss account will contain a profit of	EUR	47,956,029.46
Consolidated unrestricted shareholders' equity is	EUR	48,023,719.24
dividends to be paid per share totalling	EUR EUR	55.00/share 7,150,000.00
Balance carried forward to the profit and loss account	EUR	40,806,029.46

Notes to the Financial Statements

Accounting Policies

The financial statements have been prepared in accordance with the Finnish Accounting Act and other standards and regulations governing financial statements. The consolidated financial statements include the parent company and those companies in which the parent company owns more than half of the voting shares plus those affiliated companies in which the parent company owns more than 20 per cent. Intercompany transactions, receivables and liabilities have been eliminated in consolidation.

Turnover comprises sales of pulp, by-products and energy, less indirect tax and sales adjustments items. Sales are recorded when the goods have been delivered to the customer in accordance with the agreed terms of delivery. Delivery costs are not normally invoiced separately but they are included in the value of the invoiced goods if Sunila Oy is responsible for transport; the costs of transport are included in other operating expenditure.

Fixed assets are stated in the balance sheet at cost less planned straight-line depreciation. Planned depreciation for vital machinery in 1998 has been defined on the basis of the estimated replacement year, with 10 to 25 years of estimated economic lives. The estimated economic lives of buildings range from 20 to 40 years and those of other machinery from 5 to 10 years. Tangible assets leased through financial leasing contracts are stated in the consolidated financial statements as fixed assets and the liabilities of these contracts are stated as interest-bearing liabilities, and these have no effect on the financial result of the fiscal year or shareholders' equity. Ordinary maintenance and repair charges are expensed as incurred, however, the costs of significant renewals and improvements are capitalized and depreciated over the remaining economic lifetime of the related assets.

Inventories are stated at first in, first out cost, including variable expenses resulting from purchase and manufacture as well as the related proportion of fixed expenses and depreciation, or at a lower, most probable sales price.

Receivables and liabilities in foreign currencies are stated at the exchange rates at year end.

Taxes included in the profit and loss account are stated as accounted.

Auditor's Report

To the Shareholders of Sunila Oy

I have audited the accounting records, the annual report, and the financial statements as well as administration of Sunila Oy for the year ended on 31 December 2006. The Managing Director and the Board of Directors have prepared the annual report and the financial statements, which include the consolidated and parent company income statements, balance sheets, a statement of changes in the financial position and notes to the financial statements. Based on the audit, I express an opinion on the annual report and the financial statements and the company's administration.

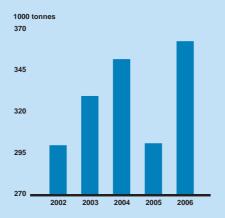

The audit has been conducted in accordance with the Finnish Generally Accepted Auditing Standards. Those standards require that the audit is performed to obtain reasonable assurance about whether the financial statements are free of material misstatement. The purpose of the audit of the administration has been to examine that the Board of Directors and the Managing Director have complied with the rules of the Finnish Companies Act.

In my opinion, the annual report and the financial statements have been prepared in accordance with the Finnish Accounting Act and other rules and regulations governing the preparation of the annual report and financial statements in Finland. The annual report and the financial statements give a true and fair view, as defined in the Accounting Act, of both the group and parent company result of operations, as well as of the financial position. The financial statements with the consolidated financial statements can be adopted and the members of the Board of Directors and the Managing Director of the parent company can be discharged from liability for the period audited by me. The proposal made by the Board of Directors on how to deal with the retained earnings is in compliance with the Finnish Companies Act.

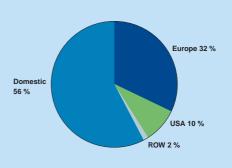

Helsinki, 22 February 2007

Ari Ahti Authorized Public Accountant

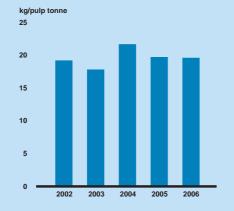

Production, pulp

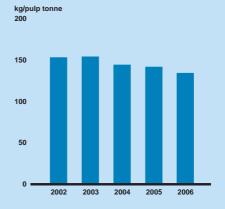

Pulp deliveries by market in 2006

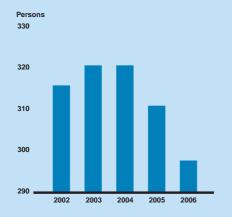

Chemical oxygen demand (COD)

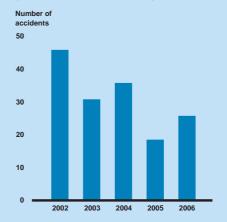

Fossil CO₂ emission

Personnel

Accidents per million work hours (absence more than 8 hours)

Values and Principles

Customer Satisfaction

We supply both our external and internal customers with products and services that meet their needs. This takes place reliably and at the right time.

Profitable Operation

We guarantee the continuation of our operations by utilising our production capability fully and cost-efficiently.

Continuous Improvement

We develop our production and operating processes, our own work and our capabilities continuously.

Responsibility for People and the Environment

We recognise the environmental and safety impacts of our operations. We reduce the harmful impacts of our operations and prevent problems and realisation of risks by applying the best available practises. We follow the principles of sustainable development.

Successful Co-operation

We encourage a positive working environment and good human relations. We interact with the surrounding community and inform of our operations openly.
